List of Figures	viii
List of Tables	x
Notes on Contributors	xi
Acknowledgments	xvii
Introduction	xviii
<i>Sahotra Sarkar and Anya Plutynski</i>	
Part I Molecular Biology and Genetics	1
1 Gene Concepts	3
<i>Hans-Jörg Rheinberger and Staffan Müller-Wille</i>	
2 Biological Information	22
<i>Stefan Artmann</i>	
3 Heredity and Heritability	40
<i>Richard C. Lewontin</i>	
4 Genomics, Proteomics, and Beyond	58
<i>Sahotra Sarkar</i>	
Part II Evolution	75
5 Darwinism and Neo-Darwinism	77
<i>James G. Lennox</i>	
6 Systematics and Taxonomy	99
<i>Marc Ereshefsky</i>	
7 Population Genetics	119
<i>Christopher Stephens</i>	
8 The Units and Levels of Selection	138
<i>Samir Okasha</i>	

CONTENTS

9	Molecular Evolution <i>Michael R. Dietrich</i>	157
10	Speciation and Macroevolution <i>Anya Plutynski</i>	169
11	Adaptationism <i>Peter Godfrey-Smith and Jon F. Wilkins</i>	186
Part III Developmental Biology		203
12	Phenotypic Plasticity and Reaction Norms <i>Jonathan M. Kaplan</i>	205
13	Explaining the Ontogeny of Form: Philosophical Issues <i>Alan C. Love</i>	223
14	Development and Evolution <i>Ron Amundson</i>	248
Part IV Medicine		269
15	Self and Nonself <i>Moirra Howes</i>	271
16	Health and Disease <i>Dominic Murphy</i>	287
Part V Ecology		299
17	Population Ecology <i>Mark Colyvan</i>	301
18	Complexity, Diversity, and Stability <i>James Justus</i>	321
19	Ecosystems <i>Kent A. Peacock</i>	351
20	Biodiversity: Its Meaning and Value <i>Bryan G. Norton</i>	368
Part VI Mind and Behavior		391
21	Ethology, Sociobiology, and Evolutionary Psychology <i>Paul E. Griffiths</i>	393
22	Cooperation <i>J. McKenzie Alexander</i>	415
23	Language and Evolution <i>Derek Bickerton</i>	431

Part VII Experimentation, Theory, and Themes	453
24 What is Life? <i>Mark A. Bedau</i>	455
25 Experimentation <i>Marcel Weber</i>	472
26 Laws and Theories <i>Marc Lange</i>	489
27 Models <i>Jay Odenbaugh</i>	506
28 Function and Teleology <i>Justin Garson</i>	525
29 Reductionism in Biology <i>Alexander Rosenberg</i>	550
Index	568
