

Contents

Preface	x
Introduction	1
1 The Associations between Fishes and Luminescent Bacteria	6
Luminescent Bacteria	6
Symbiotic Luminescent Bacteria in Fish Light Organs	8
Flashlight Fishes	11
<i>Taxonomy and Distribution</i>	11
<i>The Light Organs</i>	13
<i>The Eye and the Light Organ</i>	17
<i>Reproduction, Larval and Light Organ Development</i>	18
<i>The Photophobic Response</i>	20
<i>The Use of Light by Flashlight Fishes</i>	21
School Formation	22
Territorial Defense	22
Sexual Signaling	22
Deep Sea Ceratioid Anglerfishes	24
<i>Structure, Diversity and Distribution</i>	24
<i>Reproductive Strategies</i>	25
Obligatory Sexual Parasitism	26
Temporary Associations	28
Facultative Sexual Parasitism	29
<i>Light Organ Structure and Development: Light and the Mechanisms Controlling its Emission</i>	29
<i>The Use of Lures by Anglerfishes</i>	34
Ponyfishes	37
<i>Structure, Distribution and Taxonomy</i>	37
<i>The Light Organ System (LOS) and Diversity of the Generated Light Patterns</i>	38
Disruptive Illumination	40
Discrete Projected Luminescence (DPL)	41
Ventral Body Flash	41
Opercular Flash	42
Buccal Luminescence	42
Sex-Specific Signaling	43
<i>Inception of the Association between Luminescent Bacteria and Ponyfishes</i>	43
<i>Sexual Dimorphism of the LOS, Sex-Specific Signaling and the Role of Sexual Selection in the Evolution of Leiognathid Fishes</i>	44
Specificity of the Partnerships between Luminescent Bacteria and Fishes	47
Optimization of the Benefits to Fishes from their Association with Bacteria	48
The Evolution of the Partnerships between Fishes and Luminescent Bacteria	49
References	52

2 The Associations between Fishes and Sponges	58
Sponges	58
Predator Deterrence by Sponges	59
Multiple Species Assemblages in Sponges	61
Obligatory Fish Symbionts and Adaptations for Living in Association with Sponges	62
Nutrition, Reproduction and Sponge Occupation by Obligatory Symbiotic Fishes	68
Partner Specificity and Sponge Sharing by Obligatory Symbiotic Fishes	69
Evolution of the Partnership Between Obligatory Fish Symbionts and Sponges	70
Sponges as Living Incubators of Fish Eggs	72
Facultative Partnerships Between Fishes and Sponges	74
References	75
3 The Associations between Fishes and Anthozoans	79
Sea Anemones	79
<i>The Stinging Cells and their Release Mechanism</i>	80
Obligatory Associations with Sea Anemones of Fishes of the Genera	
<i>Amphiprion and Premnas</i>	81
<i>The Taxonomy, Distribution and Ecology of Host Sea Anemones and their Associated Fishes</i>	81
<i>The Protection of Anemone Fishes from Sea Anemones</i>	86
<i>Recognition, Attraction to and Selection of Sea Anemones by Anemone Fishes</i>	93
Partner Specificity	104
Host Preference	106
Competitive Interactions	106
Stochastic Processes	109
Habitat Preference	109
Geographical Overlap	109
Protection from Sea Anemones	109
Species Coexistence	110
Adaptations of Anemone Fishes for Living with Sea Anemones	111
Protandric Sex Reversal	111
Monogamy and Mate Recognition	114
Step-fathering	118
Social Control of Growth and the Tolerance of Nonbreeders by the Breeders	118
Fish Territoriality, Aggression and the Sea Anemone	121
Limited Larval Dispersal and Natal Recruitment	124
Benefits and Costs to Anemone Fishes and Sea Anemones from being	
Associated and their Short-term Mutual Impacts	128
The Evolution of the Anemone Fish-Sea Anemone Partnership	134
The Facultative Associations Between Fishes and Sea Anemones	135
Protection from Sea Anemones	140
Partner Specificity	141
Settlement and Recruitment of <i>D. trimaculatus</i> to Sea Anemones	142
The Sharing of Sea Anemones with Anemone Fishes	143
Benefits and Costs to Facultative Fish Partners and Sea Anemones	144
The Associations Between Fishes and Scleractinian Corals	145
Scleractinian Corals	145
Microhabitat Selection by Coral Dwelling Fishes	146
Attraction of Pomacentrid Fishes to Corals	146
Attraction of Pomacentrids to Corals Inhabited by Conspecifics	150
Coral Occupation, Competition and Coexistence of Coral Dwelling Gobies	153
Adaptations to Habitat by Coral Dwelling Gobies	157

Small Size and Morphology	157
Noxious Skin	158
Hypoxia Tolerance and Air Breathing	158
Bidirectional Sex Reversal	159
Monogamy	161
Social Control of Growth	162
<i>Multiple Species Assemblages Involving Coral Dwelling Gobies and Crustaceans</i>	164
<i>Benefits and Costs to Fishes and Corals for being Associated</i>	169
Benefits to Fishes	169
Costs to Fishes	173
Benefits to Corals	177
Costs to Corals	180
<i>Social Structure and Mating System Evolution in Coral Dwelling Damsel-fishes of the Genus Dascyllus</i>	181
References	186
4 The Associations between Fishes and Siphonophores	202
Siphonophores	202
<i>Physalia physalis</i> –the Portuguese Man-of-War	203
Fishes Associated with Siphonophores other than <i>Physalia physalis</i>	204
Fishes Associated with <i>Physalia physalis</i>	207
References	209
5 The Associations between Fishes and Scyphozoan Medusae	212
Scyphozoan medusae	212
Predation on Scyphozoan Medusae and their Structural and Behavioral	
Antipredator Defenses	214
Fishes Associated with Scyphozoan Medusae	215
The Protection of Fishes from Scyphozoan Medusae	217
Recognition and Attraction to Scyphozoan Medusae by Associated Fishes	217
Partner Specificity, Duration of the Medusa–Fish Bond and the Effects of	
the Medusae Size on the Associated Fishes	219
Benefits and Costs to Fishes and Medusae from being Associated	221
The Effects of Medusae on Fish Recruitment	225
The Association of Fishes with Floating Objects and the Fish–Medusa Partnership	226
References	227
6 The Associations between Fishes and Molluscs	230
The Association between Fishes and Cephalopods	230
Cephalopods	230
Octopus Dens, Foraging and Antipredatory Behavior	231
Scavenging Fishes Associated with Octopus Dens	233
Fishes Associated with Foraging Octopuses	234
Octopuses and Cleaning Symbiosis	238
Transport Associations between Octopuses and Fishes	239
Fishes Associated with Squid Schools	239
The Association between Fishes and Gastropods	241
Gastropods	241
Predation on Conchs, Antipredatory Strategies and Foraging in Conchs	241
The Association between Cardinal Fishes and Conchs	242
The Association between Nudibranchs and Gobiid Fishes	245
The Association between a Pearlfish and an Opisthobranch Gastropod	246

The Association between Fishes and Bivalves	246
<i>Bivalves</i>	246
<i>The Glochidia Larvae of Freshwater Mussels and their Host Fishes</i>	247
<i>Bitterlings and their Freshwater Mussel Hosts</i>	248
<i>Attraction of the European Bitterling to Mussels and Choice of Oviposition Sites</i>	250
<i>Adaptations of Bitterling for Development Inside Freshwater Mussels</i>	252
<i>Male Reproductive Behavior and the Mussel</i>	254
<i>Female Reproductive Behavior and the Mussel</i>	257
<i>Host Utilization by Sympatric Bitterling Species</i>	260
<i>Costs and Benefits for the Mussel and Possible Coevolution of the Bitterling-Mussel Partnership</i>	263
<i>Pearl Fishes Associated with Bivalves</i>	265
<i>The Association of Snailfish and Red Hake with Sea Scallops</i>	265
References	269
 7 The Associations between Fishes and Crustaceans	 276
The Associations between Fishes and Cleaner Shrimps	276
<i>Cleaning Symbiosis and Shrimp</i>	276
<i>Taxonomy, Morphology, Coloration and Distribution of Cleaner Shrimp</i>	276
<i>Cleaner Shrimp Activity</i>	287
<i>Associations between Cleaner Shrimp and Sea Anemones</i>	288
<i>Communication between Fishes and Cleaner Shrimp</i>	292
<i>Removal of Parasites versus Mucus by Cleaner Shrimp</i>	294
<i>Costs and Benefits for Cleaner Shrimp and Fish Clients and the Proximate Mechanisms for Cleaning</i>	296
<i>The Evolution of the Cleaner Shrimp-Fish Partnership</i>	298
Feeding Associations between Fishes and Crustaceans	299
Mixed Species Schools of Fishes and Crustaceans	300
Liparid Fishes Associated with Lithodid Crabs	301
The Associations between Fishes and Burrowing Brachyuran Crabs	303
Gobiid Fishes Associated with Burrowing Thalassinid Shrimp	305
<i>Thalassinid Shrimp and their Burrows</i>	305
The Facultative Association of <i>Clevelandia ios</i> with <i>Callinassa californiensis</i> and <i>Upogebia pugettensis</i>	307
The Obligatory Association of the Blind Goby <i>Typhlogobius californiensis</i> with <i>Callinassa affinis</i>	311
<i>The Obligatory Association of <i>Austrolethops wardi</i> with <i>Neaxius acanthus</i></i>	313
<i>The Obligatory Association of <i>Didogobius amicuscardis</i> with <i>Axiopsis serratifrons</i></i>	314
Gobiid Fishes Associated with Burrowing Alpheid Shrimps	316
<i>Systematics of Gobies and Shrimps</i>	316
<i>Biogeography</i>	318
<i>Diet and Feeding Behavior</i>	319
<i>Habitat Specificity</i>	322
<i>Population Structure and Dynamics</i>	324
<i>Burrow Structure, Construction and Dynamics</i>	326
<i>Activity Rhythms</i>	330
<i>Aggressive Behavior and Territoriality of Goby and Shrimp</i>	334
<i>Reproduction of Goby and Shrimp</i>	336
<i>Interspecific Communication</i>	338
<i>Communication under Natural Conditions in Indo-Pacific Partnerships</i>	338
<i>Warning Signal Generation by Indo-Pacific Gobies in Response to Predators and Models of Predators</i>	340
<i>Sequence and Information Analyses in Indo-Pacific Partnerships</i>	342

Film Analysis of the Communication between the Goby <i>Amblyeleotris steinitzi</i> and the Shrimp <i>Alpheus purpurilenticularis</i>	344
Communication between Gobies and Shrimp in the Western Atlantic	347
Partner Specificity	349
Field Observations	349
Laboratory Experiments	350
The Mechanism Regulating Specificity	352
Goby-Shrimp Phylogeography	353
Costs and Benefits for Goby and Shrimp	357
Evolution	358
References	360
8 The Associations between Fishes and Echinoderms	371
The Association between Fishes and Sea Urchins	371
Sea Urchins	371
Sea Urchin Structural Defenses, Predation by Fishes and Antipredatory Strategies	371
Associated Fishes, their Size, Coloration and Sea Urchin Hosts	373
The Attraction of Associated Fishes to Sea Urchins	386
Benefits and Costs of the Fish-Sea Urchin Partnership	388
Partner Specificity in the Fish-Sea Urchin Association	390
The Evolution of the Fish-Sea Urchin Partnership	390
Mimicry of Sea Urchins by Fishes	391
The Association between Fishes and Crinoids	392
Crinoids	392
Predation on Crinoids by Fishes and Antipredatory Strategies of Feather Stars and Sea Lilies	393
Multiple Species Assemblages in Crinoids	394
Associated Fishes and Adaptations for Living with Crinoids	395
Attraction of Associated Fishes to Crinoids and Partner Specificity	398
Benefits and Costs of the Fish-Crinoid Partnership	398
Scarcity of Knowledge	398
The Association between Fishes and Sea Cucumbers	399
Sea Cucumbers	399
Predation on Sea Cucumbers by Fishes and their Structural and Behavioral Antipredatory Defenses	400
Fishes Associated with Sea Cucumbers and their Life Cycles	401
Host Location, Penetration and Occupation by Pearlfishes	405
Pearlfish Nutrition	406
Pearlfish Reproductive Biology	408
Ecology and Partner Specificity of Pearlfish-Holothurian Associations	410
Acoustic Communication in Pearlfishes	414
Morphological and Physiological Adaptations to Inquilism	415
Benefits and Costs of the Pearlfish-Sea Cucumber Partnership	417
The Evolution of the Partnership between Pearlfishes and their Hosts	417
The Association between Fishes and Sea Stars	418
Sea Stars	418
Sea Star Structural and Behavioral Antipredatory Defenses	419
Feeding Associations between Sea Stars and Fishes	420
Cardinal Fishes Sheltering among Sea Star Spines	421
Pearlfishes Associated with Sea Stars	421
References	423
Species Index	431
Subject Index	443
