

Brief Contents

<i>Preface</i>	<i>xii</i>
----------------	------------

PART 1

<i>Introduction</i>	<i>1</i>
Chapter 1 The Study of Mammals	2
Chapter 2 History of Mammalogy	8
Chapter 3 Methods for Studying Mammals	22
Chapter 4 Phylogeny and Diversification of Mammals	50
Chapter 5 Evolution and Dental Characteristics	62
Chapter 6 Biogeography	82

PART 2

<i>Structure and Function</i>	<i>109</i>
Chapter 7 Integument, Support, and Movement	110
Chapter 8 Modes of Feeding	132
Chapter 9 Control Systems and Biological Rhythms	162
Chapter 10 Environmental Adaptations	176
Chapter 11 Reproduction	214

PART 3

<i>Adaptive Radiation and Diversity</i>	<i>237</i>
Chapter 12 Monotremes and Marsupials	242
Chapter 13 Tenrecoidea, Macroscelidea, Scandentia, Dermoptera, Solenodonta, Soricomorpha, and Erinaceomorpha	270
Chapter 14 Chiroptera	288
Chapter 15 Primates	314
Chapter 16 Pilosa and Cingulata (Xenarthrans), Pholidota, and Tubulidentata	338

Chapter 17 Carnivora	352
Chapter 18 Rodentia and Lagomorpha	374
Chapter 19 Proboscidea, Hyracoidea, and Sirenia	402
Chapter 20 Perissodactyla and Artiodactyla	418
Chapter 21 Cetacea	444

PART 4

<i>Behavior and Ecology</i>	<i>467</i>
Chapter 22 Communication, Aggression, and Spatial Relations	468
Chapter 23 Sexual Selection, Parental Care, and Mating Systems	484
Chapter 24 Social Behavior	500
Chapter 25 Dispersal, Habitat Selection, and Migration	514
Chapter 26 Populations and Life History	530
Chapter 27 Community Ecology	548

PART 5

<i>Special Topics</i>	<i>569</i>
Chapter 28 Parasites and Diseases	570
Chapter 29 Domestication and Domesticated Mammals	590
Chapter 30 Conservation	604
<i>Glossary</i>	<i>624</i>
<i>References</i>	<i>644</i>
<i>Credits</i>	<i>702</i>
<i>Index</i>	<i>705</i>

Contents

Preface

xii

PART 1

Introduction

1

Chapter 1 The Study of Mammals

2

- What Is Mammalogy? 2
- Why Study Mammals? 3
- Resources for Mammalogists 4
- Organization of the Book 6
- Summary 7
- Suggested Readings 7
- Discussion Questions 7

Chapter 2 History of Mammalogy

8

- First Interest in Mammals 9
- 17th- and 18th-Century Natural History 10
- 19th-Century Mammalogy 12
- Emergence of Mammalogy as a Science 17
- Summary 20
- Suggested Readings 20
- Discussion Questions 21

Chapter 3 Methods for Studying Mammals

22

- Field Methods 23
- Laboratory and Museum Methods 28
- Systematic Methods 39
- Summary 47
- Suggested Readings 48
- Discussion Questions 49

Chapter 4 Phylogeny and Diversification of Mammals

50

- Relationships and Classification of Living Mammalian Orders 50
- Timing of the Mammalian Radiations 56
- Summary 60
- Suggested Readings 60
- Discussion Questions 61

Chapter 5 Evolution and Dental Characteristics

62

- Synapsid Lineage 62
- Pelycosaurs and Therapsids 63
- The First Mammals 68
- Cenozoic Mammals and Mammalian Radiation 71

- Anatomical Trends in Organization from Mammal-Like Amniotes to Mammals 73
- Characteristics of Modern Mammals 76
- Dentition 76
- Summary 80
- Suggested Readings 80
- Discussion Questions 81

Chapter 6 Biogeography

82

- Global Provincialism of Mammal Distributions 83
- Historical Biogeography 86
- Ecological Biogeography 100
- Summary 105
- Suggested Readings 107
- Discussion Questions 107

PART 2

Structure and Function

109

Chapter 7 Integument, Support, and Movement

110

- Integument 110
- Basic Skeletal Patterns 118
- Muscles 122
- Modes of Locomotion 123
- Summary 129
- Suggested Readings 130
- Discussion Questions 131

Chapter 8 Modes of Feeding

132

- Foods and Feeding 132
- Foraging Strategies 155
- Summary 159
- Suggested Readings 161
- Discussion Questions 161

Chapter 9 Control Systems and Biological Rhythms

162

- Nervous System 162
- Endocrine System 167
- Immune System 169
- Integration of Control Systems 170
- Biological Rhythms 170
- Summary 174
- Suggested Readings 175
- Discussion Questions 175

Chapter 10	Environmental Adaptations	176	Chapter 15	Primates	314
Heat Transfer and Temperature Regulation	177		Ordinal Characteristics	315	
Adaptations to Cold	178		Morphology	316	
Avoidance and Resistance	179		Fossil History	316	
Adaptations to Heat	197		Economics and Conservation	318	
Summary	212		Suborder Strepsirrhini	319	
Suggested Readings	212		Suborder Haplorrhini	325	
Discussion Questions	213		Summary	336	
			Suggested Readings	337	
Chapter 11	Reproduction	214	Discussion Questions	337	
The Reproductive Systems	215		Chapter 16	Pilosa and Cingulata (Xenarthrans), Pholidota, and Tubulidentata	338
Gestation and Parturition	226		Superorder Xenarthra	339	
Reproductive Variations	228		Order Pholidota	346	
Parturition	231		Order Tubulidentata	348	
Lactation	231		Summary	350	
Summary	233		Suggested Readings	350	
Suggested Readings	234		Discussion Questions	351	
Discussion Questions	235				
PART 3			Chapter 17	Carnivora	352
<i>Adaptive Radiation and Diversity</i>	237		Morphology	354	
Chapter 12	Monotremes and Marsupials	242	Fossil History	356	
Monotremata	242		Economics and Conservation	357	
Marsupials	247		Suborders and Families	357	
Summary	268		Summary	371	
Suggested Readings	269		Suggested Readings	372	
Discussion Questions	269		Discussion Questions	373	
Chapter 13	Tenrecoidea, Macroscelidea, Scandentia, Dermoptera, Solenodonta, Soricomorpha, and Erinaceomorpha	270	Chapter 18	Rodentia and Lagomorpha	374
Morphology	271		Rodentia	374	
Fossil History	271		Lagomorpha	397	
Economics and Conservation	271		Summary	401	
Orders and Families	272		Suggested Readings	401	
Summary	287		Discussion Questions	401	
Suggested Readings	287		Chapter 19	Proboscidea, Hyracoidea, and Sirenia	402
Discussion Questions	287		Proboscidea	403	
Chapter 14	Chiroptera	288	Hyracoidea	408	
Suborders and Superfamilies	289		Sirenia	411	
Morphology	289		Summary	416	
Fossil History	296		Suggested Readings	416	
Economics and Conservation	298		Discussion Questions	416	
Suborder Yinpterochiroptera	299		Chapter 20	Perissodactyla and Artiodactyla	418
Suborder Yangochiroptera	303		Perissodactyla	419	
Summary	312		Artiodactyla	426	
Suggested Readings	313		Summary	442	
Discussion Questions	313		Suggested Readings	443	
			Discussion Questions	443	

Chapter 21	Cetacea	444
Morphology		445
Fossil History		452
Economics and Conservation		453
Parvorders and Families		454
Summary		464
Suggested Readings		465
Discussion Questions		465

PART 4

Behavior and Ecology 467

Chapter 22 **Communication, Aggression, and Spatial Relations** **468**

Communication	468
Aggression and Competition	478
Spatial Relations	479
Summary	482
Suggested Readings	483
Discussion Questions	483

Chapter 23 **Sexual Selection, Parental Care, and Mating Systems** **484**

Anisogamy and the Bateman Gradient	484
Sex Ratio	485
Sexual Selection	487
Parental Investment	491
Parent-Offspring Conflict	493
Mating Systems	494
Summary	497
Suggested Readings	498
Discussion Questions	499

Chapter 24 **Social Behavior** **500**

Examples of Cooperative Social Behavior	500
Why Mammals Live in Groups	503
How Social Behavior Evolves	505
Summary	512
Suggested Readings	513
Discussion Questions	513

Chapter 25 **Dispersal, Habitat Selection, and Migration** **514**

Dispersal from the Place of Birth	514
Habitat Selection	517
Migration	521
Homing	524
Summary	528
Suggested Readings	528
Discussion Questions	529

Chapter 26 **Populations and Life History** **530**

Population Processes	530
Life-History Traits	533
Population Growth and Equilibrium	537
Summary	546
Suggested Readings	547
Discussion Questions	547

Chapter 27 **Community Ecology** **548**

The Ecological Niche	549
Species Interactions and Community Structure	549
Community Function	559
Community Patterns	561
Summary	566
Suggested Readings	566
Discussion Questions	567

PART 5

Special Topics 569

Chapter 28 **Parasites and Diseases** **570**

Parasite Collection	571
Effects of Parasites on Host Populations	571
Coevolution of Parasites and Mammalian Hosts	572
Mammalian Parasites and Diseases	574
Vector-Borne Zoonoses	579
Nonvector Zoonoses	584
Summary	588
Suggested Readings	588
Discussion Questions	589

Chapter 29 **Domestication and Domesticated Mammals** **590**

Why Domesticate Mammals?	591
How Domestication Began	591
Probable Stages of Mammal Domestication	592
Shared Behavioral and Physiological Characteristics	592
Mammals That Have Been Domesticated	593
Morphological Effects of Domestication	600
Domestication: Evolutionary Process or Human Artifact?	601
Current Initiatives	601
Summary	602
Suggested Readings	603
Discussion Questions	603

Chapter 30 Conservation	604
Nature of the Problem	605
Solutions to Conservation Problems	616
Case Studies	619
Summary	622
Suggested Readings	623
Discussion Questions	623
Glossary	624
References	644
Credits	702
Index	705
