

Contents

Preface.....	ix
Editors.....	xi
Contributors	xiii
Chapter 1 Advanced Electron Paramagnetic Resonance Studies of the Oxygen-Evolving Complex	1
<i>Troy A. Stich and R. David Britt</i>	
Chapter 2 Radical SAM Enzymes and Their Roles in Complex Cluster Assembly	59
<i>Jeremiah N. Betz, Eric M. Shepard, and Joan B. Broderick</i>	
Chapter 3 Density Functional Theory-Based Treatments of Metal-Binding Sites in Metalloenzymes: Challenges and Opportunities	95
<i>Mercedes Alfonso-Prieto and Michael L. Klein</i>	
Chapter 4 Catalysis of Methane Oxidation by the Tricopper Cluster in the Particulate Methane Monooxygenase and Biomimetic Tricopper Complexes	117
<i>Suman Maji, Steve S.-F. Yu, and Sunney I. Chan</i>	
Chapter 5 Oxygen-Evolving Complex of Photosystem II: Insights from Computation and Synthetic Models	165
<i>Jacob S. Kanady, Jose Mendoza-Cortes, William A. Goddard III, and Theodor Agapie</i>	
Chapter 6 Electrifying Metalloenzymes.....	205
<i>Fraser A. Armstrong</i>	
Chapter 7 Iron Uptake Mechanism in Ferritin from <i>Helicobacter pylori</i>	223
<i>Sella Kim and Kyung Hyun Kim</i>	

Chapter 8	Multiple-Step Electron Flow in Proteins.....	235
	<i>Jeffrey J. Warren, Maraia E. Ener, Jay R. Winkler, and Harry B. Gray</i>	
Chapter 9	Modeling of Ligand Binding to Metalloproteins	253
	<i>Art E. Cho</i>	
Index.....		267
