Preface.....	ix
Acknowledgments.....	xi
About the Author.....	xiii
List of Abbreviations.....	xv
Chapter 1 Introduction.....	1
1.1 Chirality and chiral discrimination.....	3
1.1.1 Chiral discrimination in biomimetic and nonbiological systems.....	10
1.1.2 Chirality and discrimination in biological systems.....	19
1.2 Enzymes, active sites, and vital biological reactions.....	23
1.2.1 Active sites as reaction centers.....	25
1.2.2 Active site structures in enzymes.....	31
1.3 Chirality and reactions in active sites.....	36
1.3.1 Chiral discrimination and biological reactions.....	36
1.3.2 The influence of the confinement within a nanodimension on the reactions.....	37
References.....	39
Chapter 2 Chiral discrimination in the active site of oxidoreductases.....	47
2.1 Cytochrome P450: discrimination in drug (warfarin) interaction.....	47
2.2 Enantioselectivity of hydride transfer of NADPH by alcohol oxidoreductase and conversion of epoxide to β -keto acid by 2-[(R)-2-hydroxypropylthio]-ethanesulfonate dehydrogenase.....	53
2.3 Lipoxygenase and cyclooxygenase: generation of chiral peroxide from achiral polyunsaturated fatty acid.....	58
2.4 Nitric oxide synthase: effects of substrate and cofactors on chiral discrimination for binding the enantiomeric ligands.....	60
2.5 Enoyl reductase: chirality dependent branching of a growing polyketide chain.....	61
References.....	61

Chapter 3	Transferases and chiral discrimination	65
3.1	Peptidyl transferase center within ribosome: peptide bond formation and chiral discrimination	65
3.2	Chiral discrimination by telomerase	99
3.3	Chiral discrimination by HIV-1 reverse transcriptase	99
3.4	Chiral discrimination and nuclear DNA polymerases	100
	References	101
Chapter 4	Influence of chirality on the hydrolysis reactions within the active site of hydrolases	107
4.1	Chiral discrimination by epoxide hydrolases	107
4.2	Chiral discrimination by lipases	110
	References	115
Chapter 5	Influence of chirality on the reactions in the active site of lyases	117
5.1	Hydroxynitrile lyases: interaction with chiral substrates	117
5.2	Acceptance of both epimers of uronic acid by chondroitin lyase ABC	121
	References	122
Chapter 6	Chiral discrimination in the active site of ligases	123
6.1	Chiral discrimination by germacone D synthases	123
6.2	Chiral discrimination by aminoacyl-tRNA synthetases	125
	References	159
Chapter 7	Summary and future directions	165
	References	177
	Index	183
