
Contents

Preface.....	ix
Editors.....	xv
Contributors	xvii

PART I Template Preparation

Chapter 1 Pre-PCR Processing Strategies	3
<i>Johannes Hedman, Maria Lövenklev, Petra Wolffs, Charlotta Löfström, Rickard Knutsson, and Peter Rådström</i>	
Chapter 2 Use of a Liposomal Internal Control Vehicle for Whole-Process Quality Assurance of Nucleic Acid Amplification.....	19
<i>Einar S. Berg and Tania Nolan</i>	

PART II Reaction Components

Chapter 3 Oligonucleotide Synthesis and Purification	39
<i>Yannick Fillon, Theresa Creasey, Qin Xiang, and Carlos Martinez</i>	
Chapter 4 Augmenting PCR: Effects of Additives in the Polymerase Chain Reaction.....	57
<i>Ernest J. Mueller</i>	
Chapter 5 Real-Time Fluorescent PCR by Labeled Primer with a Single Fluorescent Molecule.....	63
<i>Hong Yan and Liu Xiao Kun</i>	
Chapter 6 Using Scorpion Primers for Genotyping.....	75
<i>David Whitcombe</i>	
Chapter 7 LNATM: Adding New Functionality to PCR.....	87
<i>Søren M. Echwald, Ditte Andreassen, and Peter Mouritzen</i>	
Chapter 8 Modified dNTPs: A Toolbox for Use in PCR	103
<i>Natasha Paul, Olga Adelfinskaya, Elena Hidalgo Ashrafi, Tony Le, and Sabrina Shore</i>	

PART III Instruments

- Chapter 9** Thermocycler Calibration and Analytical Assay Validation 125
Mary Span, Marc Verblakt, and Tom Hendrikx
- Chapter 10** Ultra-High-Speed PCR Instrument Development..... 143
Nick Burroughs and Emmanouil Karteris
- Chapter 11** Dropletization of Bioreactions: How Single-Cell Quantitative Analyses May Improve Gene Measurement and Cancer Diagnosis 159
Ehsan Karimiani, Amelia Markey, and Philip Day

PART IV Design, Optimization, QC, and Standardization

- Chapter 12** Assay Design for Real-Time qPCR..... 177
Gregory L. Shipley
- Chapter 13** Primer Design for Large-Scale Multiplex PCR and Arrayed Primer Extension 199
Maido Remm, Kaarel Krjutškov, and Andres Metspalu
- Chapter 14** Development and Use of qPCR Assays for Detection and Study of Neglected Tropical and Emerging Infectious Diseases..... 209
Ashley R. Heath, Norha Deluge, Maria Galli de Amorim, and Emmanuel Dias-Neto
- Chapter 15** MIQE: Guidelines for Reliable Design and Transparent Reporting of Real-Time PCR Assays 221
Tania Nolan and Stephen A. Bustin

PART V Data Analysis

- Chapter 16** Hypothesis-Driven Approaches to Multivariate Analysis of qPCR Data 233
Anders Bergkvist, Azam Sheikh Muhammad, and Peter Damaschke
- Chapter 17** Experiment Design, Data Management, and Univariate Statistical Analysis of Gene-Expression Data Obtained by Real-Time Quantitative PCR 245
Ales Tichopad, Tzachi Bar, Malin Edling, Boel Svanberg, Tania Nolan, and Anders Bergkvist
- Chapter 18** Biomarker Discovery via RT-qPCR and Bioinformatical Validation 259
Christiane Becker, Irmgard Riedmaier, and Michael W. Pfaffl

Chapter 19 Optimization of Quantitative Real-Time PCR for Studies in Cartilage Mechanobiology	271
<i>Oto Akanji, Donald Salter, and Tina Chowdhury</i>	

PART VI Applications

Chapter 20 Enriching DNA Sequences with Nucleotide Variation by Thymidine Glycosylases Combined with Suppression PCR	285
<i>Xinghua Pan, Alexander E. Urban, and Sherman M. Weissman</i>	
Chapter 21 Chromosome Walking by Inverse PCR	299
<i>Michael Gotesman, Selwyn A. Williams, Jorge A. Garcés, and Ray H. Gavin</i>	
Chapter 22 Expression Profiling of MicroRNAs by Quantitative Real-Time PCR: The Good, the Bad, and the Ugly	307
<i>Mirco Castoldi, Paul Collier, Tania Nolan, and Vladimir Benes</i>	
Chapter 23 Dye-Based High-Throughput qPCR in Microfluidic Platform BioMark™	323
<i>David Svec, Vendula Rusnakova, Vlasta Korenkova, and Mikael Kubista</i>	
Chapter 24 Surface Plasmon Resonance-Based Biosensor Technology for Real-Time Detection of PCR Products	339
<i>Giordana Feriotto and Roberto Gambari</i>	
Chapter 25 Current Innovations in the Development and Application of qPCR in a Resource-Limited Setting	355
<i>Clare Watt and Jim Huggett</i>	
Chapter 26 A Review of Isothermal Nucleic Acid Amplification Technologies	363
<i>Gavin J. Nixon and Claire A. Bushell</i>	
Chapter 27 Proximity Ligation Assay for Protein Quantification	393
<i>David W. Ruff, Mark E. Shannon, Shiaw-Min Chen, Simon Fredriksson, and Ulf Landegren</i>	
Chapter 28 High-Resolution Melt Analysis	409
<i>Einar S. Berg and Tania Nolan</i>	
Index	423
