

contents

preface.....	xiii
about the authors	xv
1 important biological features	1
introduction	1
stocks and strains.....	1
nomenclature	3
behavior	5
anatomic and physiologic features	6
normative values	8
Basic Biologic Parameters	8
Clinical Chemistry	9
Urinalysis	9
hematology	11
immunodeficient mice.....	12
wild mice.....	15
references	17
2 husbandry.....	21
housing	21
Caging.....	21
Housing Systems	24
Bedding.....	26
Environmental Enrichment.....	27
barriers and containment.....	28
personal protective equipment (PPE)	31
special considerations for immunodeficient mice.....	32

environment.....	33
Temperature and Humidity.....	33
Ventilation.....	34
Illumination.....	34
Noise and Vibration.....	34
sanitation and pest control.....	35
Sanitation.....	35
Cage cleaning.....	35
Room cleaning.....	36
Quality control.....	37
Pest Control.....	37
nutrition.....	38
water.....	39
breeding.....	39
Basic Genetics.....	39
Breeding Schemes.....	41
Pheromone Influences.....	43
Timed Pregnancy.....	44
Genetic Monitoring.....	45
identification and record keeping.....	46
Identification.....	46
Records.....	48
transportation.....	49
Between Institutions.....	49
Within the Institution.....	50
references.....	51
3 management.....	57
regulatory agencies and compliance.....	57
Institutional Animal Care and Use Committee (IACUC).....	59
IACUC Composition.....	59
Responsibilities of the IACUC.....	60
occupational health and zoonotic diseases.....	60
references.....	63
4 clinical medicine.....	67
basic veterinary supplies.....	67
physical examination of the mouse.....	68
common spontaneous and noninfectious diseases.....	70
Common Conditions Involving the Alimentary System....	71

Non-neoplastic conditions.....	71
Alimentary tumors.....	72
Common Conditions Involving the Cardiovascular System.....	73
Non-neoplastic conditions.....	73
Cardiovascular tumors.....	74
Common Conditions Involving the Endocrine System.....	75
Non-neoplastic conditions.....	75
Endocrine tumors	75
Hematopoietic and Immune System	76
Non-neoplastic conditions.....	76
Hematopoietic and immune system tumors	76
Common Conditions Involving the Integumentary System.....	78
Non-neoplastic conditions.....	78
Tumors of skin and adnexae.....	78
Common Conditions Involving the Musculoskeletal System.....	80
Non-neoplastic conditions.....	80
Musculoskeletal tumors	81
Common Conditions Involving the Nervous System.....	81
Non-neoplastic conditions.....	81
Nervous system tumors	83
Common Conditions Involving the Respiratory System....	83
Non-neoplastic conditions.....	83
Respiratory tumors	83
Common Conditions Involving the Urogenital System	84
Non-neoplastic conditions.....	84
Urogenital tumors	84
Common Systemic or Multisystem Conditions.....	85
Amyloidosis	85
Hyalinosis	85
Conditions related to nutritional status.....	85
Stress-related changes	86
common infectious diseases	86
Diagnostic Methods	87
Viral Agents and Diseases	91
Mouse adenoviruses (MAV 1 and 2).....	91
Lymphocytic choriomeningitis virus (LCMV)	91
Lactate dehydrogenase-elevating virus (LDV, LDEV)	92
Murine noroviruses (MNV)	92

Mouse hepatitis virus (MHV)	93
Hantaviruses (Han)	94
Herpesviruses	94
Ectromelia virus (ECT)	94
Papovaviruses	95
Paramyxoviruses	95
Parvoviruses	96
Encephalomyocarditis virus (EMCV)	97
Theiler's mouse encephalomyelitis virus (TMEV, GDVII)	97
Mouse rotavirus (MRV, EDIM)	97
Reovirus 3 (REO3)	98
Murine retroviruses	98
Bacterial Agents and Diseases	100
<i>Bordetella</i> species	100
Cilia-associated respiratory bacillus (CAR bacillus, CARB)	100
<i>Citrobacter rodentium</i>	101
<i>Chlamydiae</i>	101
<i>Clostridium</i> species	101
<i>Corynebacterium</i>	102
<i>Helicobacter</i>	102
<i>Klebsiella</i>	103
<i>Lactobacillus</i>	104
<i>Leptospira</i>	104
<i>Mycobacterium</i>	104
<i>Mycoplasma</i>	104
<i>Pasteurella pneumotropica</i>	105
<i>Proteus mirabilis</i>	106
<i>Pseudomonas aeruginosa</i>	106
Segmented filamentous bacteria (SFB) of the distal small intestine of mammals and birds	106
<i>Salmonella enteritidis</i> (serotype <i>typhimurium</i>)	106
<i>Staphylococcus</i>	107
<i>Streptobacillus moniliformis</i>	107
<i>Streptococcus</i> (and <i>Enterococcus</i>)	108
Fungal Agents and Diseases	109
<i>Trichophyton mentagrophytes</i> (<i>T. quinckeanum</i>)	109
<i>Encephalitozoon cuniculi</i>	110
<i>Kazachstania</i>	110
Opportunistic fungi	110
<i>Pneumocystis murina</i>	111

081	Protozoal Agents and Diseases.....	111
081	<i>Cryptosporidium</i>	112
081	<i>Eimeria</i> spp.	112
081	<i>Entamoeba muris</i>	113
181	Enteric flagellate protozoa in large intestine	113
381	<i>Giardia muris</i>	113
381	<i>Klossiella muris</i>	114
381	<i>Sarcocystis muris</i>	114
	<i>Toxoplasma gondii</i>	114
	<i>Spironucleus muris</i>	114
	Parasitic Agents and Diseases	115
	Arthropods.....	115
	Helminths	118
	treatment and supportive care of sick mice.....	122
	Drug Dosages	122
	General treatment of open skin lesions.....	123
	General treatment of weak mice	124
	Treatment of dystocia	125
	clinical endpoints	126
	treating disease on a colony basis.....	129
	Emergency Planning.....	130
	Prevention of Spread	130
	Approaches to Elimination.....	132
	Depopulation.....	132
	Test and cull	132
	Burnout	133
	Medical treatment	133
	Facility Decontamination	134
	references	134
5	preventive medicine	139
	receiving.....	139
	— Reviewing Health Reports	139
	Options for Newly Imported Mice.....	142
	Transport directly to barrier	142
	Quarantine	142
	Rederivation.....	144
	Cryopreservation	146
	testing of biological materials	146
	Risks for Humans and Animals	146
	Types and Sources of Biological Materials	148

Agents Identified	149
Test Methods	150
health surveillance and monitoring	150
Principles	150
Selection of Animals for Monitoring	151
Diagnostic Testing	152
disease prevention through sanitation	152
references	153
6 experimental methodology	157
restraint	157
Cage Transfer	157
Restraint for Manipulation	158
Restraint Devices	158
sampling methods	159
Blood	159
Urine	166
Feces	166
Samples for DNA Analysis	166
Vaginal Swabs	167
compound administration	167
Oral (PO)	168
Intramuscular (IM)	169
Intraperitoneal (IP)	169
Subcutaneous (SC)	170
Intradermal (ID)	170
Intravenous (IV)	171
Retro-orbital (RO)	172
Implantable Cannulas and Pumps	172
phenotyping	173
anesthesia and analgesia	175
Anesthesia	175
Methods and drugs	177
Periprocedural Care	185
Analgesia	187
euthanasia	189
Laws, Regulations, and Guidelines	189
Management Considerations	190
Scientific Considerations	191
Experimental Endpoints	191
Euthanasia Methods	192

necropsy.....	193
Equipment and Materials.....	194
Necropsy Procedure	196
External examination	196
Dissection and specimen collection	196
Trimming tissues for histology	199
Histopathology	200
Reporting and archiving data and specimens.....	200
references.....	201
7 resources and additional information	207
organizations.....	207
American Association for Laboratory Animal Science	
(AALAS), http://www.aalas.org	207
Laboratory Animal Management Association (LAMA),	
http://www.lama-online.org	208
American Society of Laboratory Animal Practitioners	
(ASLAP), http://www.aslap.org	208
American College of Laboratory Animal Medicine	
(ACLAM), http://www.aclam.org	208
Laboratory Animal Welfare Training Exchange	
(LAWTE), http://www.lawte.org	209
Institute for Laboratory Animal Research (ILAR),	
http://www.dels.nas.edu/ilar	209
Association for Assessment and Accreditation of	
Laboratory Animal Care, International (AAALAC,	
International), http://www.aaalac.org	209
publications.....	209
Books	210
Guideline Documents.....	211
Periodicals	211
electronic resources.....	212
appendix a.....	215
glossary of phenotyping terminology and tests	215
appendix b.....	219
suggested cassette numbering system and some	
trimming suggestions.....	219
index.....	223
