

Contents

Preface.....	xv
Acknowledgments.....	xvii
Author	xix
Chapter 1 Introduction	1
Chapter 2 Handling of Plant Chromosome.....	7
2.1 Introduction	7
2.2 Squash Technique: Mitotic and Meiotic Chromosomes.....	7
2.2.1 Collection of Roots.....	7
2.2.2 Pretreatment of Roots.....	7
2.2.2.1 Ice-Cold Water.....	8
2.2.2.2 8-Hydroxyquinoline.....	8
2.2.2.3 Colchicine	9
2.2.2.4 α -Bromonaphthalene	9
2.2.2.5 Para-Dichlorobenzene	9
2.2.3 Fixation.....	9
2.2.3.1 Carnoy's Solution 1.....	9
2.2.3.2 Carnoy's Solution 2.....	9
2.2.3.3 Propionic Acid Alcohol Solution.....	9
2.2.4 Staining of Chromosomes	10
2.2.4.1 Aceto-Carmine Staining.....	10
2.2.4.2 Feulgen Staining	10
2.2.4.3 Alcoholic-Hydrochloric Acid-Carmine.....	12
2.2.4.4 Lacto-Propionic-Orcein.....	13
2.2.4.5 Carbol Fuchsin Staining	13
2.2.4.6 Giemsa Staining.....	15
2.3 Smear Technique for Plant Chromosomes	21
2.3.1 Chromosome Preparation from Roots.....	21
2.3.2 Chromosome Preparation from Cell Suspension and Callus	22
2.3.2.1 Suspension Culture of Celery (<i>Apium graveolens</i>).....	22
2.3.2.2 Callus Culture of <i>Brassica carinata</i>	22
2.3.3 Chromosome Preparation from Flowers	23
2.3.4 Chromosome Preparation from Shoots	23
2.4 Pollen Staining	24
2.4.1 Pollen Fertility.....	24
2.4.2 Chromosome Count in Pollen	25
2.4.3 Differential Staining of Pollen	26
2.4.3.1 Ingredient.....	26
2.4.3.2 Staining of Pollen with Thin Walls	26
2.4.3.3 Staining of Pollen with Thick and Spiny Walls, or Both	26
2.5 Pollen-Stigma Incompatibility.....	27
2.5.1 Staining Pistils by Aniline Blue.....	27
2.5.2 Cleared-Pistil Technique.....	27
2.5.3 Modified Cleared-Pistil Technique	29

2.6	Fluorescence <i>In Situ</i> Hybridization (FISH).....	29
2.6.1	Chromosome Preparation.....	30
2.6.1.1	Collection, Pretreatment, and Fixation of Roots	30
2.6.1.2	Preparation of Buffer	30
2.6.1.3	Enzyme Solution.....	30
2.6.1.4	Preparation of Slides.....	30
2.6.2	Fluorescence <i>In Situ</i> Hybridization Procedure (FISH).....	31
2.6.2.1	Prehybridization Method	31
2.6.2.2	Hybridization	31
2.6.2.3	Observation and Photography.....	33
2.6.3	Genomic <i>In Situ</i> Hybridization (GISH).....	33
2.6.4	Multicolor Genomic <i>In Situ</i> Hybridization (McGISH)	34
2.6.5	Primed <i>In Situ</i> (PRINS) DNA Labeling	34
2.6.6	Fluorescence <i>In Situ</i> Hybridization on Extended DNA Fibers: Fiber-Fish.....	36
2.6.6.1	Protocol-I: Fiber-FISH on Extended Nuclear DNA Fibers	36
2.6.6.2	Protocol-II: Fiber-FISH Using BAC and Circular Molecules as Targets.....	39
2.6.6.3	Protocol-III: Staining Fibers (Yo-Yo Staining)	40
2.6.6.4	Source of Chemicals.....	40
2.7	Total DNA Extraction: Plant Genomic DNA	40
2.7.1	Protocol-I.....	40
2.7.1.1	Solutions	40
2.7.1.2	Procedure	40
2.7.2	Protocol-II	42
2.7.2.1	Solutions	42
2.7.2.2	Procedure	42
2.7.3	Protocol-III.....	42
2.7.3.1	Buffer/Tissue	42
2.7.3.2	Procedure	43
2.7.3.3	Determination of DNA Yields and Susceptibility to Restriction Enzymes	43
2.7.4	Protocol-IV.....	44
2.7.4.1	Background.....	44
2.7.4.2	Buffer/Tissue	45
2.7.4.3	Procedure	45
2.8	Determination of Nuclear DNA Content of Plants by Flow Cytometry	46
2.8.1	Introduction	46
2.8.2	Protocol-I.....	47
2.8.2.1	Stock Solutions	47
2.8.2.2	Final Solutions	47
2.8.2.3	Procedure	47
2.8.3	Protocol-II	49
2.8.3.1	Flow Cytometry after DAPI Staining.....	49
2.8.3.2	Flow Cytometry after Propidium Iodide (PI) Staining	50
2.8.4	Protocol-III.....	51
2.8.4.1	Procedure.....	51
2.8.4.2	Fluorescent Staining of Nuclear DNA.....	51
2.8.4.3	Cell Cycle in Higher Plants	51
2.8.4.4	Nuclear DNA Content and the Cell Cycle.....	52

2.8.4.5	Determination of Nuclear Genome Size.....	52
2.8.4.6	Resolution of DNA Content Histograms	53
2.8.4.7	Instrument Calibration.....	53
2.8.4.8	Preparation of Fixed CRBC Nuclei for Instrument Alignment	53
2.8.4.9	CRBC Buffers.....	53
2.8.4.10	Determination of Ploidy in Plants by Flow Cytometry	54
2.8.4.11	Identification of Interspecific Hybrids.....	54
2.8.4.12	Identification of Aneuploid Lines	54
2.8.5	Protocol-IV.....	54
2.8.5.1	Chemicals	54
2.8.5.2	Extraction Buffers.....	55
2.8.5.3	Stain Solution A (10 mL)	55
2.8.5.4	Stain Solution B (10 mL)	55
2.8.5.5	Isolation and Staining of Nuclei	55
2.8.6	Validity of Genome Size Measurements by Flow Cytometry	56
2.9	Karyotyping and Sorting of Plant Chromosomes by Flow Cytometry.....	57
2.9.1	Protocol-I.....	57
2.9.1.1	Accumulation of Mitotic Metaphase	57
2.9.1.2	Analysis of the Degree of the Metaphase Synchrony.....	58
2.9.2	Protocol-II	59
2.9.2.1	Suspensions of Plant Chromosomes	59
2.9.2.2	Alignment of Flow Cytometer for Chromosome Analysis and Sorting.....	60
2.9.3	Protocol-III.....	61
2.9.3.1	Univariate Flow Karyotyping and Sorting of Plant Chromosomes	61
2.9.3.2	Bivariate Flow Karyotyping and Chromosome Sorting.....	63
2.9.4	Protocol-IV.....	64
2.9.4.1	Physical Mapping of DNA Sequences Using PCR.....	64
2.9.4.2	Two-Step Sorting	65
2.9.4.3	Reagents and Solutions	65
2.10	Production of Wide Hybrids through <i>In Vitro</i> Technique	66
Chapter 3	Methods in Plant Cytogenetics.....	67
3.1	Introduction	67
3.2	Mendelian Genetics	67
3.2.1	Monohybrid Inheritance.....	67
3.2.2	Dihybrid Inheritance	69
3.2.2.1	Gene Interaction and Expression	71
3.2.2.2	Genetic Mapping of Chromosomes	76
3.3	Rise and Decline of Plant Cytogenetics	83
Chapter 4	Cell Division.....	85
4.1	Introduction	85
4.2	Mitosis	85
4.2.1	Process of Mitosis	85
4.2.1.1	Interphase	85
4.2.1.2	Prophase.....	85

4.2.1.3	Metaphase	86
4.2.1.4	Anaphase	87
4.2.1.5	Telophase	88
4.2.1.6	Cytokinesis	88
4.2.2	Duration of Mitosis	88
4.2.3	Chromosome Orientation at Interphase and Prophase.....	88
4.2.4	Somatic Association	90
4.3	Meiosis.....	91
4.3.1	Process of Meiosis.....	92
4.3.1.1	Cycle 1	92
4.3.1.2	Cycle 2	95
4.3.2	Duration of Meiosis.....	96
4.3.3	Gametogenesis.....	97
4.4	Differences between Mitosis and Meiosis.....	98
Chapter 5	Genetic Control of Meiosis.....	101
5.1	Introduction	101
5.2	Synaptic Mutants	101
5.2.1	Distribution of Synaptic Mutants	102
5.2.2	Origin of Synaptic Mutants	102
5.2.3	Cytological Behavior of Synaptic Mutants	107
5.2.4	Synaptic Mutants and Recombinations	109
5.2.5	Factors Influencing Pairing in Synaptic Mutants.....	110
5.3	Genetic Control of Recombination.....	110
5.4	Genes Responsible for Chromosome Disjunction.....	111
5.5	Other Meiotic Mutants	112
5.6	Role of Heterochromatin in Chromosome Pairing.....	113
5.7	Diploid-Like Meiosis in Allopolyploids.....	113
5.7.1	The 5-B System in Wheat ($2n = 6x = 42$).....	113
5.7.2	Origin of the <i>Ph</i> Gene	114
5.8	Haploidy	114
5.8.1	Mechanism of Chromosome Elimination	115
5.8.2	Genetics of Chromosome Elimination.....	115
5.8.3	Haploid-Initiator Gene in Barley.....	117
5.9	Male Sterility.....	117
5.9.1	Classification of Male Sterility.....	117
5.9.2	Mechanism of Male Sterility.....	118
Chapter 6	Mode of Reproduction in Plants.....	119
6.1	Introduction	119
6.2	Sexual Reproduction.....	119
6.3	Asexual Reproduction	119
6.3.1	Apomixis.....	120
6.3.1.1	The Compilospecies Concept	121
6.3.1.2	Sources of Apomixis	121
6.3.1.3	Distribution of Apomixis.....	123
6.3.1.4	Types of Apomixis.....	123
6.3.1.5	Endosperm Development in Apomixis.....	126
6.3.1.6	Identification of Apomixis.....	127

6.3.1.7	Classification of Plants Based on Natural Crossing	127
6.3.1.8	Regulation of Apomixis.....	128
6.3.1.9	Apomixis in Crop Improvement.....	129
6.3.2	Vegetative Reproduction	130
6.4	The Chromosomal Basis of Sex Determination in Plants	132
6.4.1	System of Sex Determination.....	132
6.4.1.1	Male Heterogametic (Female XX; Male XY = X-Y System).....	132
6.4.1.2	Male Heterogametic (Female XX; Male XO = X-O System).....	133
6.4.1.3	Male Heterogametic (But with One Extra Chromosome).....	133
6.4.1.4	Female Heterogametic (Female XY (ZW); Male XX (ZZ) (Z-W System)).....	133
6.4.1.5	Compound Chromosomes (Interchanges among X, Y, and Autosomes).....	133
6.4.2	Determination of Heterogametic Sex in Plants.....	133
6.4.2.1	Cytological Identification	133
6.4.2.2	Sex Linkage Inheritance.....	134
6.4.2.3	Crosses between Dioecious and Monoecious <i>Bryonia</i> Species.....	135
6.4.3	Sex Expression	135
6.4.4	The Evolution of Dioecism.....	136
6.5	Incompatibility	137
6.5.1	Self- and Cross-Incompatibility	137
6.5.2	Microsporogenesis.....	138
6.5.3	Gametogenesis.....	139
6.5.4	Nature of Pollination	139
6.5.5	Flower Modification for Cross-Pollination.....	139
6.6	Barriers to Crossability in Plants	139
Chapter 7	Karyotype Analysis.....	141
7.1	Introduction	141
7.2	Nomenclature of Chromosomes	141
7.3	Karyotype Analysis by Mitotic Metaphase Chromosomes.....	143
7.4	Karyotype Analysis by Pachytene Chromosomes	148
7.5	Karyotype Analysis by Flow Cytometry.....	148
7.6	Karyotype Analysis by Image Analysis.....	149
7.7	Chromosome Number of Economically Important Plants.....	151
Chapter 8	Chromosomal Aberrations	153
8.1	Structural Chromosome Changes.....	153
8.1.1	Deficiencies	153
8.1.1.1	Introduction	153
8.1.1.2	Origin and Identification of Deficiencies.....	153
8.1.1.3	Meiotic Chromosome Pairing in Wheat Deficiency Line	157
8.1.1.4	Transmission of Deficiencies	158
8.1.1.5	Genetic Studies	159

8.1.1.6	Use of Deficiencies in Hybrid Maize Breeding	159
8.1.1.7	Ring Chromosomes	161
8.1.2	Duplications	163
8.1.2.1	Introduction	163
8.1.2.2	Origin of Duplications and Deficiencies	163
8.1.2.3	Identification of Duplications and Deficiencies	164
8.1.2.4	Transmission of Duplications and Deficiencies	164
8.1.2.5	Use of Duplications and Deficiencies in Genetic Studies	164
8.1.3	Interchanges	165
8.1.3.1	Introduction	165
8.1.3.2	Identification of Interchanges	166
8.1.3.3	Robertsonian Translocations	169
8.1.3.4	Interchanges in Genetic Studies	169
8.1.3.5	Principles of Producing Interchange Testers	172
8.1.3.6	Identification of Interchanged Chromosomes	172
8.1.3.7	B-A Interchanges	174
8.1.3.8	Role of Interchanges in Evolution of Crops	176
8.1.4	Inversions	179
8.1.4.1	Introduction	179
8.1.4.2	Types of Inversions	179
8.2	Numerical Chromosome Changes (Heteroploidy)	185
8.2.1	Euploidy	185
8.2.1.1	Introduction	185
8.2.1.2	Classification of Euploidy	185
8.2.2	Aneuploidy: Trisomics	202
8.2.2.1	Primary Trisomics	202
8.2.2.2	Secondary Trisomics	228
8.2.2.3	Tertiary Trisomics	234
8.2.2.4	Telotrisomics	238
8.2.2.5	Acrotrisomics	253
8.2.2.6	Compensating Trisomics	257
8.2.2.7	Novel-Compensating Diploid	258
8.2.2.8	Monosomics and Nullisomics	263
8.2.2.9	Alien Addition Lines	278
8.2.2.10	Alien Substitution Lines	292
Chapter 9	Genome Analysis	305
9.1	Introduction	305
9.2	Classical Taxonomy and Genome Designations	305
9.3	Genomic Relationships among Diploid Species	307
9.3.1	Crossing Affinity	307
9.3.2	Chromosome Pairing	308
9.3.2.1	Intragenomic Chromosome Pairing	309
9.3.2.2	Intergenomic Chromosome Pairing	312
9.3.2.3	Variable and Minimum Chromosome Pairing	312
9.4	Genomes of <i>Glycine</i>	315
9.5	Genomes of <i>Gossypium</i>	317
9.6	Ancestors of Allopolyploid Species	321

9.6.1	<i>Brassica</i> (<i>B. carinata</i> $2n = 4x = 34$; <i>B. juncea</i> $2n = 4x = 36$; <i>B. napus</i> $2n = 4x = 38$)	321
9.6.2	<i>Glycine</i> (<i>G. tomentella</i> $2n = 4x = 80$)	323
9.6.3	<i>Gossypium</i> (<i>G. hirsutum</i> ; <i>G. barbadense</i> ; <i>G. mustelinum</i> ; <i>G. tomentosum</i> ; <i>G. darwinii</i> , $2n = 4x = 52$)	323
9.6.4	<i>Nicotiana</i> (<i>N. tabacum</i> $2n = 4x = 48$)	327
9.6.5	<i>Triticum</i> (<i>T. aestivum</i> , $2n = 6x = 42$)	328
9.6.5.1	The Source of the A Genome	330
9.6.5.2	The Source of the B Genome	330
9.6.5.3	The Source of the D Genome	330
9.7	Genome Analysis by Molecular Methods	331
9.7.1	Genome Analysis by Nucleotide Sequence Variation	331
9.7.2	Genome Analysis by Multicolor FISH	334
Chapter 10	Cytogenetic Aberrations in Tissue Culture	335
10.1	Introduction	335
10.2	Chromosomal Aberrations in Callus	335
10.2.1	Media Composition	335
10.2.2	Age of Callus	337
10.2.3	Nature of Callus (Morphogenic vs. Nonmorphogenic)	337
10.2.4	Genetic Background of the Explants	340
10.2.5	Kind of Media (Solid vs. Liquid)	341
10.3	Mechanism of Chromosomal Aberrations in Culture	342
10.4	Chromosomal Aberrations in Regenerated Plants	343
10.4.1	Diploid versus Polyploid Species	344
10.4.2	Age of Callus	347
10.4.3	Source of Explant Materials	348
10.4.4	Culture Conditions	348
10.5	Chromosomal Aberrations in Haploid Callus and Their Regenerants	348
10.6	Chromosomal Aberrations in Somatic Hybrids	350
10.6.1	Stable Somatic Hybrids	350
10.6.2	Partially Stable Somatic Hybrids	350
10.6.3	Unstable Somatic Hybrids	352
Chapter 11	Transgenic Crops	355
11.1	Introduction	355
11.2	Present Status of Transgenic Crops	355
11.3	Production of Transgenic Crops	356
11.4	Chromosomal Aberrations in Transgenic Crops	358
11.4.1	Time in Culture with 2, 4-D Prior to Transformation	358
11.4.2	Genetic Background of the Explant	363
11.4.3	Seed Fertility in the Transgenic Crops	364
11.5	Cytological Basis of Gene Silencing	366
Chapter 12	Relationship between Cytogenetics and Plant Breeding	369
12.1	Introduction	369
12.2	Gene Pool Concept	370
12.2.1	Primary Gene Pool (GP-1)	370

12.2.2 Secondary Gene Pool (GP-2).....	372
12.2.3 Tertiary Gene Pool (GP-3).....	372
12.3 Cytogenetic Techniques and Plant Breeding.....	373
12.4 Recombination in Plant Breeding.....	375
12.5 Mutation in Plant Breeding.....	376
12.6 Polyploidy in Plant Breeding.....	376
12.7 Plant Introduction in Plant Breeding.....	376
12.8 Wide Hybridization and Plant Breeding.....	378
12.9 Conclusion.....	382
Glossary.....	383
Appendix A.....	419
Appendix B.....	445
References.....	457
Index.....	515
