

# Contents

<i>Preface</i>	xi
<b>Chapter 1—Introduction</b>	<b>1</b>
Evolution	3
Scientific Study of Animal Behavior	7
Tinbergen's Four Whys	11
<b>PART I: ANIMAL COGNITION</b>	<b>17</b>
<b>Chapter 2—Sensory and Perceptual Processes</b>	<b>19</b>
Transduction	19
Range of Sensory Worlds	21
Perceptual Organization	26
Perceptual Processes	28
Conclusion	31
<b>Chapter 3—Basic Learning</b>	<b>32</b>
Why Learn?	33
Nonassociative Learning	34
Associative Learning: Classical Conditioning	36
Associative Learning: Operant Conditioning	39
Latent Learning	44
The Misbehavior of Animals: Constraints on Learning	45
Conclusion	49
<b>Chapter 4—Spatial Cognition and Behavior</b>	<b>50</b>
Path Integration	51
Terrestrial Landmarks	54
Geometry	57

Some Neurobiology of Spatial Cognition	59
Cognitive Map	63
<i>Debate:</i> Do Insects Use Cognitive Maps?	64
Global Navigation	68
Conclusion	69
<b>Chapter 5—Timing</b>	<b>71</b>
Circadian Clocks	72
Arranging Behaviors in Circadian Time	75
Interval Timing	76
Multiple Oscillators for Timing	81
Conclusion	82
<b>Chapter 6—Numerical Cognition</b>	<b>83</b>
Analog Magnitude System: Approximate Counts	84
Object-Tracking System: One, Two, Three, Too Many	87
Training Animals to Count	91
Conclusion	92
<b>Chapter 7—Emotions</b>	<b>95</b>
Emotions and Motivation	97
Emotions in Comparative Perspective	98
What about Emotions in Invertebrate Animals?	101
Emotions, Consciousness, and Ethics	102
Conclusion	104
<b>Chapter 8—Animal Communication</b>	<b>106</b>
Signals and Cues	107
Wide Range of Signals	108
Functions of Signals	110
Attention Signals	111
Camouflage Signals	111
Identity Signals	112
Mimicry	112
Aggressive Mimicry	113
Signals of Quality: Sexual Selection at Work	113
Alarm Calls: Warning Signals	115
<i>Debate:</i> How Important Is the Actual Information	
Conveyed through Animal Communication?	119
Cognitive Processes in Communication	124
Conclusion	127

<b>Chapter 9—Complex Cognition</b>	<b>129</b>
Physical Cognition	131
Episodic-Like Memory	135
Prospective Cognition	138
Metacognition	141
<i>Debate: Do Animals Have Metacognition?</i>	141
Self-Recognition: The Mirror Test	147
Social Learning	148
Theory of Mind	151
Conclusion	153
 <b>PART II: CASE STUDIES OF SELECTED ANIMALS</b>	 <b>155</b>
<b>Chapter 10—Honeybees</b>	<b>157</b>
Eusocial Lifestyle	157
Honeybee Cognition	159
Colony Collapse: A Multifaceted Syndrome	163
Conclusion	165
 <b>Chapter 11—Jumping Spiders</b>	 <b>166</b>
Best Arthropod Eyes	166
<i>Myrmarachne</i> : Ant-Mimicking Jumping Spiders	170
<i>Portia</i> : Stalker Playing Mind Games	172
Conclusion	174
 <b>Chapter 12—Cephalopods</b>	 <b>176</b>
Coleoid Nervous Systems: Embodied Intelligence	177
Learning in Cephalopods	180
Play in Octopuses	182
Skin Coloration: Masters of Disguise	184
Conclusion	192
 <b>Chapter 13—Corvids</b>	 <b>194</b>
Clark's Nutcrackers	195
New Caledonian Crows	198
Western Scrub Jays	201
Conclusion	204
 <b>Chapter 14—Parrots</b>	 <b>205</b>
Kea	206
Alex the African Grey Parrot	208
Conclusion	213

<b>Chapter 15—Dolphins</b>	<b>214</b>
Numerical Sense	215
Tool Use	215
Culture	216
Planning and Prospective Cognition	216
Cooperation and Altruism	217
Imitation	218
Artificial "Language"	219
Conclusion	219
<b>Chapter 16—Dogs</b>	<b>221</b>
WEIRD Human and WHOC Dogs	222
Domestication of the Dog: Coevolution of Uncertain Origin	222
Canid Play and Wild Justice	225
Sensitivity to Humans	228
Word Learning in Two Dogs: A Record for Nonprimates	230
Conclusion	233
<b>Chapter 17—Great Apes</b>	<b>236</b>
Primates and Great Apes: Some Basic Biology	236
Manual Skills and Clever Foraging	239
Brain and Intelligence in Primates	241
Nim, Kanzi, and Ape Language	244
Nim	246
Kanzi	249
Conclusion	251
<b>Chapter 18—What about Humans?</b>	<b>254</b>
Brief Summary	254
What about Humans?	256
<i>Debate:</i> What Is Special about Humans?	258
<i>Glossary</i>	269
<i>References and Other Interesting Materials</i>	277
<i>About the Author and Contributors</i>	283
<i>Index</i>	287
