

BRIEF CONTENTS

PART 1 Evolution and Species

- 1** Intellectual Origins of the Theory of Biological Evolution 3
- 2** Species and Their Relationships 19
- 3** Similarity and Patterns of Evolution... 41

PART 2 The First Ten Billion Years: 13.7–3.7 Bya

- 4** Universe and Earth Arise 69
- 5** The Atmosphere, Rocks, and Continents 81

PART 3 From Molecules to Organisms: 3.7–1.5 Bya

- 6** Origin of the Molecules of Life 101
- 7** Molecules, Membranes, and Protocells 125
- 8** The First Cells and Organisms Arose 3.5 Bya 141
- 9** Eukaryotic Organelles, Genes, and Organisms Arose 1.8 Bya 173

PART 4 Theories of Evolution and Heredity

- 10** Voyages of Discovery, Natural Selection, and Evolution 195
- 11** The Theory of Evolution by Natural Selection 211
- 12** Mendel, Inheritance, and a Theory of Heredity 225
- 13** Genes, Environment, and Inheritance 245

PART 5 Natural Selection in Action

- 14** Types of Natural Selection 269
- 15** Natural Selection, Phenotypes, and Genotypes 285

PART 6 Sources of Variation in Individuals and in Populations

- 16** Chromosomes and Genomes as Sources of Individual Variation 301
- 17** Mutations and Gene Regulation as Sources of Individual Variation 327
- 18** Genetic Variation in Populations... 363
- 19** Demes, Gene Flow, and Genetic Drift .. 387

PART 7**Populations, Speciation,
and Extinctions**

- 20** Competition, Predation,
and Population Biology 405
- 21** Coevolution 419
- 22** Phenotypic Plasticity and
Sympatric Speciation 433
- 23** Allopatric Speciation
and Hybridization 455
- 24** Mass Extinctions, Opportunities,
and Adaptive Radiations 471

PART 8**Human Origins, Evolution,
and Influence**

- 25** Human Origins 499
- 26** Cultural and Social Evolution 529
- 27** Human Influences on Evolution 543
- 28** Culture, Religion, and Evolution 561
- Glossary 579
- Index 621

CONTENTS

	<i>Preface</i>	xix
1	<i>Intellectual Origins of the Theory of Biological Evolution</i>	3
	CHAPTER SUMMARY	3
	UNIVERSAL PROPERTIES OF ORGANISMS	4
	EVOLUTION AS DEVELOPMENT OF INDIVIDUALS	4
	EVOLUTION AS SPONTANEOUS GENERATION	7
	EVOLUTION AS TRANSFORMATION BETWEEN GENERATIONS	7
	ONLY A THEORY AND NOT SCIENCE?	11
	EVOLUTION AND THE SCIENTIFIC METHOD	13
2	<i>Species and Their Relationships</i>	19
	CHAPTER SUMMARY	19
	WHAT IS A SPECIES AND HOW ARE THEY RELATED?	20
	SPECIES	20
	CLASSIFICATION AND RELATIONSHIPS	26
	SPECIES CONCEPTS	28
	CLASSIFICATION REFLECTS EVOLUTIONARY RELATIONSHIPS	32
3	<i>Similarity and Patterns of Evolution</i>	41
	CHAPTER SUMMARY	41
	INTRODUCTION	42
	SIMILARITY: KNOWING WHEN CHARACTERS ARE THE SAME OR DIFFERENT	42
	SIMILARITY AND PATTERNS OF EVOLUTION	46
	HOMOLOGY	46
	PARALLELISM	53
	CONVERGENCE	54
	COMPARATIVE EMBRYOLOGY AS EVIDENCE FOR SHARED SIMILARITY AND EVOLUTION	55
	FOSSILS AS THE PHYSICAL EVIDENCE OF EVOLUTION	56

PART 1

Evolution and Species

PART 2

The First Ten Billion Years: 13.7–3.7 Bya

4	<i>Universe and Earth Arise</i>	69
	CHAPTER SUMMARY	69
	INTRODUCTION	70
	THE FIRST 380,000 YEARS	70
	THE UNIVERSE EVOLVES	72
	THE FUTURE OF THE UNIVERSE	74
	ORIGIN OF THE SOLAR SYSTEM	74
	EARTH'S FIRST 700 MILLION YEARS: THE HADEAN ERA	76
	ATMOSPHERES FORM	77
	WHAT MAKES EARTH SO SPECIAL?	79

5	<i>The Atmosphere, Rocks, and Continents</i>	81
	CHAPTER SUMMARY	81
	INTRODUCTION	82
	EARTH'S CHANGING ATMOSPHERE	82
	EARTH'S STRUCTURE	83
	GEOLOGICAL STRATA	85
	ORIGIN AND MOVEMENT OF CONTINENTS	87
	BIOLOGICAL CONSEQUENCES OF CONTINENTAL DRIFT	94

PART 3

From Molecules to Organisms: 3.7–1.5 Bya

6	<i>Origin of the Molecules of Life</i>	101
	CHAPTER SUMMARY	101
	INTRODUCTION	102
	MOLECULES OF LIFE	103
	THE DOUBLE HELIX AND REPLICATION OF DNA	105
	POSSIBLE SITES FOR THE ORIGIN OF EARLY MOLECULES	109

7	<i>Molecules, Membranes, and Protocells</i>	125
	CHAPTER SUMMARY	125
	THE CENTRAL DOGMA OF TRANSCRIPTION AND TRANSLATION	126
	RNA FIRST	130
	RNA DIVERSIFIES	132
	MEMBRANES: THE FIRST STRUCTURES	132
	PROTOCELLS	132
	WHEN DID LIFE ARISE?	138
	ORIGIN OF POPULATIONS AND NATURAL SELECTION	138
8	<i>The First Cells and Organisms Arose 3.5 Bya</i>	141
	CHAPTER SUMMARY	141
	EARTH'S ATMOSPHERE(S) AND THE FIRST CELLS/ORGANISMS	142
	THE EARLIEST FOSSIL CELLS: CYANOBACTERIA	145
	PROKARYOTIC AND EUKARYOTIC CELLS	149
	PROKARYOTES AND EUKARYOTES: KINGDOMS OF LIFE	151
9	<i>Eukaryotic Organelles, Genes, and Organisms Arose 1.8 Bya</i>	173
	CHAPTER SUMMARY	173
	ORGANELLES	174
	EVOLUTION OF EUKARYOTIC ORGANELLES	175
	GENE STRUCTURE	180
	HORIZONTAL GENE TRANSFER AND THE TREE(S) OF LIFE	183
	EVOLUTION OF EUKARYOTES	184
	CONSTRUCTING TREES OF LIFE	187

PART 4

Theories of Evolution and Heredity

10	<i>Voyages of Discovery, Natural Selection, and Evolution</i>	195
	CHAPTER SUMMARY	195
	INTRODUCTION	195
	EVOLUTION BY NATURAL SELECTION BEFORE DARWIN AND WALLACE	196
	CHARLES DARWIN AND ALFRED WALLACE	196
	VOYAGES OF DISCOVERY	200
	DARWIN RETURNS TO ENGLAND	204
	GALÁPAGOS ISLANDS	205
11	<i>The Theory of Evolution by Natural Selection</i>	211
	CHAPTER SUMMARY	211
	THE DARWIN-WALLACE THEORY OF EVOLUTION BY NATURAL SELECTION	212
	REV. THOMAS MALTHUS, DARWIN, AND WALLACE	212
	PUBLICATION OF THE DARWIN-WALLACE THEORIES ON EVOLUTION BY NATURAL SELECTION	216
	WALLACE COMMUNICATES WITH DARWIN	217
	ARTIFICIAL AND NATURAL SELECTION	218
	SELECTION ON SMALL CONTINUOUS VARIATION	220
12	<i>Mendel, Inheritance, and a Theory of Heredity</i>	225
	CHAPTER SUMMARY	225
	INTRODUCTION	226
	SEEKING A MECHANISM OF HEREDITY	226
	CONSTANCY AND VARIATION	229
	MENDEL'S EXPERIMENTS	230

13	<i>Genes, Environment, and Inheritance</i>	245
	CHAPTER SUMMARY	245
	DEVIATIONS FROM MENDELIAN GENETICS	246
	OTHER MODES OF INHERITANCE	248
	SEXUAL REPRODUCTION	251
	SEX DETERMINATION	251
	GENETIC SEX DETERMINATION	252
	ENVIRONMENTALLY INITIATED SEX DETERMINATION	254
	FERTILIZED VERSUS UNFERTILIZED EGGS AND SEX DETERMINATION	257
	TRANSFORMATION OF CHROMOSOMAL TO ENVIRONMENTAL SEX DETERMINATION	258
	ENVIRONMENT DICTATES PHENOTYPE	258
14	<i>Types of Natural Selection</i>	269
	CHAPTER SUMMARY	269
	INTRODUCTION	270
	SURVIVAL OF THE FITTEST	270
	TYPES OF SELECTION	271
	STABILIZING SELECTION	271
	DIRECTIONAL SELECTION	272
	DISRUPTIVE SELECTION	275
	SEXUAL SELECTION	275
	GROUP SELECTION	278
	POPULATION GROWTH	403
	GENE REGULATION AS A SOURCE OF VARIATION	403
	BIOLOGICAL INTERACTIONS	403
	COMPETITION	403
	HOMEBOX GENES	414
	NICHE SEGREGATION	414
	GENE REGULATION AND NATURAL SELECTION	413
	PREDATION	413
	SYMBIOSIS	416

PART 5

Natural Selection in Action

Populations, Speciation, and Extinctions

*Theories of
Evolution
and Heredity*

PART 6

*Sources of
Variation in
Individuals
and in
Populations*

15	<i>Natural Selection, Phenotypes, and Genotypes</i>	285
	CHAPTER SUMMARY	285
	INTRODUCTION	285
	SELECTION ON FEATURES OF ONE SPECIES CAN AFFECT OTHER SPECIES	286
	SELECTION AND CONSTRAINT	286
	SELECTION, CHANGING ENVIRONMENTS, AND PLASTICITY	289
	SELECTION AND FITNESS	290
	SELECTION AND BALANCED POLYMORPHISM	291
16	<i>Chromosomes and Genomes as Sources of Individual Variation</i>	301
	CHAPTER SUMMARY	301
	INTRODUCTION	302
	VARIATION IN CHROMOSOME NUMBER, INCLUDING WHOLE GENOME DUPLICATION	303
	OTHER CHANGES IN THE PHENOTYPE OF CHROMOSOMES	306
	GENE DUPLICATION AND DIVERGENCE	311
	FUNCTIONAL DIVERGENCE WITHIN GENE FAMILIES	312
	TRANSPOSONS	313
17	<i>Mutations and Gene Regulation as Sources of Individual Variation</i>	327
	CHAPTER SUMMARY	327
	INTRODUCTION	327
	MUTATIONS AS A SOURCE OF GENETIC VARIATION	328
	GENE REGULATION	332
	GENE REGULATION AS A SOURCE OF VARIATION	335
	GENE REGULATION AND ANIMAL ORIGINS	335
	HOMEBOX GENES	340
	GENE REGULATION AND NATURAL SELECTION	343

18	<i>Genetic Variation in Populations</i>	363
	CHAPTER SUMMARY	363
	INTRODUCTION	364
	INDIVIDUALS, POPULATIONS, AND EVOLUTION	364
	FEATURES OF MUTATIONS IN POPULATIONS	366
	MUTATION RATES	367
	GENETIC POLYMORPHISM	368
	CONTINUOUS VARIATION	369
	THE GENETICS OF CONTINUOUS VARIATION	372
	POPULATION GENETICS AND GENE (ALLELE) FREQUENCIES IN POPULATIONS	375
19	<i>Demes, Gene Flow, and Genetic Drift</i>	387
	CHAPTER SUMMARY	387
	INTRODUCTION	388
	STANDING GENETIC VARIATION	389
	GENE FLOW	390
	GENETIC DRIFT	391
	VARIATION AND SELECTION FOR INCREASED FITNESS	394
	PHYLOGEOGRAPHY	396
20	<i>Competition, Predation, and Population Biology</i>	405
	CHAPTER SUMMARY	405
	INTRODUCTION	406
	POPULATION GROWTH	406
	BIOLOGICAL INTERACTIONS WITHIN POPULATIONS	406
	COMPETITION	408
	NICHE SEGREGATION	414
	PREDATION	414
	SYMBIOSIS	416

*Human
Origins,
Evolution,
and*

PART 7

*Populations,
Speciation,
and
Extinctions*

21	<i>Coevolution</i>	419
	CHAPTER SUMMARY	419
	INTRODUCTION	419
	PARASITISM AND VIRAL PATHOGENS	421
	INSECTS AND HOST PLANTS	423
	PLANT EVOLUTION	424
22	<i>Phenotypic Plasticity and Sympatric Speciation</i>	433
	CHAPTER SUMMARY	433
	INTRODUCTION	433
	SPECIES CAN CHANGE WITHOUT SPECIATION BEING INITIATED	435
	PHENOTYPIC PLASTICITY	435
	ISOLATING MECHANISMS AND SIBLING SPECIES	440
	MODES OF SPECIATION	441
	SPECIATION WITHOUT GEOGRAPHICAL ISOLATION: SYMPATRIC SPECIATION	442
	RING SPECIES	449
23	<i>Allopatric Speciation and Hybridization</i>	455
	CHAPTER SUMMARY	455
	INTRODUCTION	456
	SPECIATION INITIATED BY GEOGRAPHICAL ISOLATION: ALLOPATRIC SPECIATION	456
	FORMS OF GEOGRAPHICAL ISOLATION	458
	MECHANISMS FACILITATING REPRODUCTIVE ISOLATION AND SPECIATION	459
	HYBRIDS AND HYBRIDIZATION	464
	SPECIATION AND HYBRIDIZATION ZONES	466
	FREQUENCY AND IMPACT OF HYBRIDIZATION IN NATURE	467

24 *Mass Extinctions, Opportunities, and Adaptive Radiations* 471

CHAPTER SUMMARY 471

INTRODUCTION 472

EXTINCTION 472

EXTRATERRESTRIAL IMPACTS 473

MASS EXTINCTIONS 474

DINOSAURS AND LATE CRETACEOUS MASS EXTINCTIONS 474

RADIATIONS OF MAMMALS 478

INVADING THE AIR: FLYING REPTILES 481

AVIAN DINOSAURS: BIRDS 483

INSECTS CONQUER LAND AND AIR 485

SOCIAL ORGANIZATION 486

25 *Human Origins* 499

CHAPTER SUMMARY 499

PRIMATES: A RAPID SURVEY OF 85 MILLION YEARS OF EVOLUTION 500

CHIMPANZEES AND HUMANS 500

THE EARLIEST HOMININS 505

AUSTRALOPITHECINES: THE SOUTHERN APES OF AFRICA 505

BIPEDALISM AND BRAIN SIZE: HYPOTHESES
ABOUT EARLY HUMAN EVOLUTION 507

ORIGINS OF *HOMO* 508

OUT OF AFRICA 512

HUMANS AS HUNTER-GATHERERS 515

26 *Cultural and Social Evolution* 529

CHAPTER SUMMARY 529

INSTINCTS AND LEARNED BEHAVIOR 530

LEARNING, SOCIETY, AND CULTURE 532

CULTURAL EVOLUTION OUTPACES PHENOTYPIC EVOLUTION 534

SOCIAL DARWINISM 537

INHERITANCE OF SOCIAL BEHAVIOR 540

PART 8

*Human
Origins,
Evolution,
and
Influence*

27	<i>Human Influences on Evolution</i>	543
	CHAPTER SUMMARY	543
	INTRODUCTION	543
	HUMAN INFLUENCES OVER HUMAN EVOLUTION	544
	GENETIC BIRTH DEFECTS	545
	MAINTENANCE OF "DELETERIOUS" ALLELES	547
	EUGENICS	548
	THE RISE OF AGRICULTURE	551
	DOMESTICATION	552
	GENETIC ENGINEERING OF FOOD CROPS AND ANIMALS	553
	OUR INFLUENCE ON THE EVOLUTION OF OTHER SPECIES AND THEIR ENVIRONMENTS	556

28	<i>Culture, Religion, and Evolution</i>	561
	CHAPTER SUMMARY	561
	BELIEF, RELIGION, AND SPIRITUALITY	562
	SCIENCE AND SOCIETY	562
	LAWS OF NATURE	564
	THE QUESTION OF DESIGN	564
	BASES AND EVOLUTION OF RELIGIOUS BELIEFS	570
	EVOLUTION AND RELIGION	571
	CREATIONISM AND INTELLIGENT DESIGN	573
	LAST WORDS	575

	<i>Glossary</i>	579
--	-----------------------	-----

	<i>Index</i>	621
