

Contents

Introduction 10

c. 4 Billion BCE Origin of Life 14

c. 3.9 Billion BCE Last Universal Common Ancestor 16

c. 3.9 Billion BCE Prokaryotes 18

c. 2.5 Billion BCE Algae 20

c. 2 Billion BCE Eukaryotes 22

c. 1.4 Billion BCE Fungi 24

c. 570 Million BCE Arthropods 26

c. 530 Million BCE Medulla: The Vital Brain 28

c. 530 Million BCE Fish 30

c. 450 Million BCE Land Plants 32

c. 417 Million BCE Devonian Period 34

c. 400 Million BCE Insects 36

c. 400 Million BCE Plant Defenses against Herbivores 38

c. 360 Million BCE Amphibians 40

c. 350 Million BCE Seeds of Success 42

c. 320 Million BCE Reptiles 44

c. 300 Million BCE Gymnosperms 46

c. 230 Million BCE Dinosaurs 48

c. 200 Million BCE Mammals 50

c. 150 Million BCE Birds 52

c. 125 Million BCE Angiosperms 54

c. 65 Million BCE Primates 56

c. 55 Million BCE Amazon Rainforest 58

c. 350,000 BCE Neanderthals 60

c. 200,000 BCE Anatomically Modern Humans 62

c. 60,000 BCE Plant-Derived Medicines 64

c. 11,000 BCE Wheat: The Staff of Life 66

c. 10,000 BCE Agriculture 68

c. 10,000 BCE Domestication of Animals 70

c. 8000 BCE Coral Reefs 72

c. 7000 BCE Rice Cultivation 74

c. 2600 BCE Mummification 76

c. 2350 BCE Animal Navigation 78

c. 400 BCE Four Humors 80

c. 330 BCE Aristotle's *The History of Animals* 82

c. 330 BCE Animal Migration 84

c. 320 BCE Botany 86

77 Pliny's *Natural History* 88

c. 180 Skeletal System 90

1242 Pulmonary Circulation 92

1489 Leonardo's Human Anatomy 94

1521 Sense of Hearing 96

1543 Vesalius's *De humani corporis fabrica* 98

1611 Tobacco 100

1614 Metabolism 102

1620 Scientific Method 104

1628 Harvey's *De motu cordis* 106

1637 Mechanical Philosophy of Descartes 108

1651 Placenta 110

1652 Lymphatic System 112

1658 Blood Cells 114

1668 Refuting Spontaneous Generation 116

1669 Phosphorus Cycle 118

1670 Ergotism and Witchcraft 120

1674 Leeuwenhoek's Microscopic World 122

1677 Spermatozoa 124

1717 Miasma Theory 126

1729 Circadian Rhythms 128

1755 Blood Pressure	130	1859 Invasive Species	198
1755 Linnaean Classification of Species	132	1861 Localization of Cerebral Function	200
c. 1741 Cerebrospinal Fluid	134	1862 Biological Mimicry	202
1744 Regeneration	136	1866 Mendelian Inheritance	204
1759 Theories of Germination	138	1866 Ontogeny Recapitulates Phylogeny	206
1760 Artificial Selection (Selective Breeding)	140	1866 Hemoglobin and Hemocyanin	208
1786 Animal Electricity	142	1869 Deoxyribonucleic Acid (DNA)	210
1789 Gas Exchange	144	1871 Sexual Selection	212
1791 Nervous System Communication	146	1873 Coevolution	214
1796 Paleontology	148	1874 Nature versus Nurture	216
1798 Population Growth and Food Supply	150	1875 Biosphere	218
1809 Lamarckian Inheritance	152	1876 Meiosis	220
1828 Germ-Layer Theory of Development	154	1876 Biogeography	222
1851 Cell Nucleus	156	1877 Marine Biology	224
1851 Darwin and the Voyages of the <i>Beagle</i>	158	1878 Enzymes	226
1852 Anatomy Act of 1832	160	1880 Phototropism	228
1853 Human Digestion	162	1882 Mitosis	230
1856 Fossil Record and Evolution	164	c. 1882 Thermoreception	232
1857 Nitrogen Cycle and Plant Chemistry	166	1882 Innate Immunity	234
1858 Cell Theory	168	1883 Germ Plasm Theory of Heredity	236
1860 Plant Nutrition	170	1883 Eugenics	238
1862 Urine Formation	172	1884 Gram Stain	240
1862 Apoptosis (Programmed Cell Death)	174	1885 Negative Feedback	242
1863 Venoms	176	1890 Germ Theory of Disease	244
1863 Homology versus Analogy	178	1890 Animal Coloration	246
1865 Photosynthesis	180	1891 Neuron Doctrine	248
1868 Optical Isomers	182	1892 Endotoxins	250
1869 Testosterone	184	1896 Global Warming	252
1870 Trichromatic Color Vision	186	1897 Adaptive Immunity	254
1874 Homeostasis	188	1897 Associative Learning	256
1876 The Liver and Glucose Metabolism	190	1897 Ehrlich's Side-Chain Theory	258
1877 Microbial Fermentation	192	1898 Malaria-Causing Protozoan Parasite	260
1879 Darwin's Theory of Natural Selection	194	1898 Viruses	262
1879 Ecological Interactions	196	1899 Ecological Succession	264
