Foreword	ix
Editors	xi
Contributors	xiii
Reviewers	xix

Section I Introduction

1. A Global Vision for Monitoring Ecosystem Services with Satellite Sensors	3
<i>D. Alcaraz-Segura and C. M. Di Bella</i>	

Section II Ecosystem Services Related to the Carbon Cycle

2. Ecosystem Services Related to Carbon Dynamics: Its Evaluation Using Remote Sensing Techniques	17
<i>J. M. Paruelo and M. Vallejos</i>	
3. Recent Advances in the Estimation of Photosynthetic Stress for Terrestrial Ecosystem Services Related to Carbon Uptake	39
<i>M. F. Garbulsky, I. Filella, and J. Peñuelas</i>	
4. Earth Observation of Carbon Cycling Pools and Processes in Northern High-Latitude Systems	63
<i>H. E. Epstein</i>	
5. Monitoring the Ecosystem Service of Forage Production	87
<i>J. G. N. Irisarri, M. Oesterheld, M. Oyarzabal, J. M. Paruelo, and M. Durante</i>	
6. Missing Gaps in the Estimation of the Carbon Gains Service from Light Use Efficiency Models	105
<i>A. J. Castro Martínez, J. M. Paruelo, D. Alcaraz-Segura, J. Cabello, M. Oyarzabal, and E. López-Carrique</i>	
7. Biomass Burning Emission Estimation in Amazon Tropical Forest ...	125
<i>Y. E. Shimabukuro, G. Pereira, F. S. Cardozo, R. Stockler, S. R. Freitas, and S. M. C. Coura</i>	

Section III Ecosystem Services Related to Biodiversity

8. Earth Observation for Species Diversity Assessment and Monitoring 151
N. Fernández
9. Ecosystem Services Assessment of National Parks Networks for Functional Diversity and Carbon Conservation Strategies Using Remote Sensing 179
J. Cabello, P. Lourenço, A. Reyes, and D. Alcaraz-Segura
10. Catchment Scale Analysis of the Influence of Riparian Vegetation on River Ecological Integrity Using Earth Observation Data 201
T. Tormos, K. Van Looy, P. Kosuth, B. Villeneuve, and Y. Souchon

Section IV Ecosystem Services Related to the Water Cycle

11. Evaluation of Hydrological Ecosystem Services through Remote Sensing 229
C. Carvalho-Santos, B. Marcos, J. Espinha Marques, D. Alcaraz-Segura, L. Hein, and J. Honrado
12. Assimilation of Remotely Sensed Data into Hydrologic Modeling for Ecosystem Services Assessment 261
J. Herrero, A. Millares, C. Aguilar, F. J. Bonet, and M. J. Polo
13. Detecting Ecosystem Reliance on Groundwater Based on Satellite-Derived Greenness Anomalies and Temporal Dynamics 283
S. Contreras, D. Alcaraz-Segura, B. Scanlon, and E. G. Jobbágy
14. Surface Soil Moisture Monitoring by Remote Sensing: Applications to Ecosystem Processes and Scale Effects 303
M. J. Polo, M. P. González-Dugo, C. Aguilar, and A. Andreu
15. Snowpack as a Key Element in Mountain Ecosystem Services: Some Clues for Designing Useful Monitoring Programs 329
F. J. Bonet, A. Millares, and J. Herrero

Section V Ecosystem Services Related to the Land-Surface Energy Balance

16. Characterizing and Monitoring Climate Regulation Services 351
D. Alcaraz-Segura, E. H. Berbery, O. V. Müller, and J. M. Paruelo

17. Ecosystem Services Related to Energy Balance: A Case Study of Wetlands Reflected Energy	379
<i>C. M. Di Bella and M. E. Beget</i>	
18. Energy Balance and Evapotranspiration: A Remote Sensing Approach to Assess Ecosystem Services	399
<i>V. A. Marchesini, J. P. Guerschman, and J. A. Sobrino</i>	
19. Urban Heat Island Effect	417
<i>J. A. Sobrino, R. Oltra-Carrió, and G. Soria</i>	
Section VI Other Dimensions of Ecosystem Services	
20. Multidimensional Approaches in Ecosystem Services Assessment	441
<i>A. J. Castro Martínez, M. García-Llorente, B. Martín-López, I. Palomo, and I. Iniesta-Arandia</i>	
Index	469
