
Contents

Preface.....	vii
Introduction.....	ix
Editor.....	xv
Contributors.....	xvii

Section I Standardising Biology

1. Synthetic Biology: Culture and Bioethical Considerations.....	3
<i>Marcus K. Dymond</i>	
2. Synthetic Biology Standards and Methods of DNA Assembly.....	35
<i>Philip D. Weyman and Yo Suzuki</i>	
3. Standardised Genetic Output Measurement.....	67
<i>Marcus K. Dymond</i>	

Section II Engineering Biology with Legacy Tools

4. Bacterial Cells as Engineered Chassis.....	101
<i>Yanika Borg, Alexander Templar, Desmond Schofield and Darren N. Nesbeth</i>	
5. Eukaryotae Synthetica: Synthetic Biology in Yeast, Microalgae and Mammalian Cells.....	145
<i>Desmond Schofield, Alexander Templar, Yanika Borg, René Daer, Karmella Haynes and Darren N. Nesbeth</i>	
6. Synthetic Plants.....	183
<i>Nicola J. Patron</i>	

Section III Constructing New Biologies

7. Theory and Construction of Semi-Synthetic Minimal Cells.....	209
<i>Pasquale Stano and Pier Luigi Luisi</i>	
8. Design Tools for Synthetic Biology.....	259
<i>Philipp Boeing, Tanel Ozdemir and Chris P. Barnes</i>	
9. New Genetic Codes.....	281
<i>Heinz Neumann</i>	
Index.....	307
