Preface.....	xiii
Acknowledgments	xv
Authors	xvii
Chapter 1 Introduction to bio-imaging	1
1.1 Introduction.....	1
1.1.1 What is bio-imaging?	2
1.1.2 Need for bio-imaging.....	3
1.1.3 Ease of use and cost effectiveness of bio-imaging.....	5
1.2 Current applications.....	6
1.3 Research studies and potential future applications	7
1.3.1 Agriculture	7
1.3.2 Grain.....	7
1.3.3 Fruits and vegetables	8
1.3.4 Other foods.....	8
1.3.5 Meat	9
1.3.6 Aquaculture.....	10
1.3.7 Packaged food	10
1.4 Conclusions	11
Chapter 2 Image acquisition and processing	13
2.1 Introduction.....	13
2.2 Image acquisition.....	14
2.2.1 Illumination.....	14
2.2.2 Image acquisition using different types of sensors.....	16
2.2.2.1 Image acquisition using X-ray.....	16
2.2.2.2 Thermal imaging detectors	18
2.2.2.3 MRI	19
2.3 Image preprocessing	19
2.3.1 Local preprocessing	21
2.3.2 Image restoration.....	21
2.3.3 Noise.....	22
2.4 Image segmentation	23
2.4.1 Thresholding.....	24
2.4.1.1 Otsu's thresholding.....	27
2.4.2 Region-based segmentation	28
2.4.3 Edge-based (gradient-based) segmentation.....	29

2.5	Image representation and description.....	32
2.5.1	Methods of shape representation	33
2.5.1.1	Contour-based global shape representation	34
2.5.1.2	Region-based shape representation	35
2.5.2	Feature extraction	35
2.5.2.1	Morphological features	35
2.5.2.2	Color features	36
2.5.2.3	Textural features	38
2.5.3	Classification of food based on shape and size features.....	41
2.5.4	Classification of food based on texture and color features	41
Chapter 3	Classification: Statistical and neural network	45
3.1	Introduction.....	45
3.1.1	Classifiers for pattern recognition.....	46
3.2	Artificial neural networks.....	47
3.2.1	Basic concept of ANNs.....	47
3.2.2	Categorization of ANNs	48
3.2.2.1	Multilayer neural network.....	48
3.2.2.2	Kohonen network or self-organizing map	49
3.2.2.3	Radial basis function neural network.....	49
3.2.2.4	General regression neural network.....	50
3.2.2.5	Multilayer perceptron	51
3.2.2.6	Probabilistic neural network.....	51
3.2.2.7	Deep learning	52
3.2.3	Potential of neural network classifiers for image classification related to food and agriculture applications	52
3.3	Statistical classifiers.....	57
3.3.1	Different types of statistical classifiers.....	57
3.3.1.1	Linear and quadratic discriminant analysis.....	57
3.3.1.2	Mahalanobis distance classifier	57
3.3.1.3	K-nearest neighbor	58
3.3.1.4	Support vector machine	59
3.3.2	Potential of statistical classifiers for image classification related to food and agriculture applications	60
3.3.3	Studies involving both statistical and neural network classifiers	63
3.4	Comparison of statistical and neural network classifiers.....	65
3.5	Fuzzy logic.....	66
3.6	Conclusions	68
Chapter 4	Imaging in the visible spectrum.....	71
4.1	Introduction.....	71
4.2	Image sensors and components of an imaging system	71
4.2.1	Sensors	71
4.2.1.1	Charge-coupled device sensors	72
4.2.1.2	Complementary metal-oxide silicon sensors.....	74
4.2.2	Performance of image sensors	74
4.2.3	Comparison of CCD and CMOS sensors	74
4.2.4	Line and area scan imaging.....	75

1.5 Comparison of line and area scan imaging.....	76
---	----

6.3.4.7 Other medical and pharmaceutical applications.....	181
6.4 Advantages, limitations, and future of thermal imaging.....	181
6.4.1 Advantages.....	181
6.4.2 Limitations.....	181
6.4.3 Future.....	182

5.3.4.3	Meat	132
5.3.4.4	Aquaculture	137
5.3.4.5	Sanitation in food industry	139
5.3.5	Engineering	140
5.3.6	Medicine	141
5.3.6.1	Cancer	143
5.3.6.2	Diabetes	144
5.3.6.3	Blood vessel detection	145
5.3.6.4	Counterfeit drug detection	146
5.4	Advantages, limitations, and future of hyperspectral imaging	146
5.4.1	Advantages	146
5.4.2	Limitations	147
5.4.3	Future	147
Chapter 6	Thermal imaging	149
6.1	Introduction	149
6.2	Principle and components of thermal imaging	149
6.2.1	Principle	149
6.2.2	Components	151
6.2.2.1	Infrared lens	151
6.2.2.2	Detector	151
6.2.2.3	Video signal processing	152
6.2.2.4	Display	152
6.2.2.5	Important factors to be considered in selection of camera	152
6.3	Applications of thermal imaging	153
6.3.1	Agriculture	153
6.3.1.1	Soil water status	153
6.3.1.2	Estimate canopy temperature and identify plant stress	153
6.3.1.3	Measurement of leaf temperature	156
6.3.1.4	Insect and fungal damage in grain	157
6.3.2	Food	159
6.3.2.1	Quality of fruits and vegetables	159
6.3.2.2	Harvesting and yield estimation	165
6.3.2.3	Detection of foreign bodies in food	166
6.3.2.4	Meat	166
6.3.3	Applications of thermal imaging in engineering	169
6.3.4	Applications of thermal imaging in bio-medicine	174
6.3.4.1	Cancer/tumor	174
6.3.4.2	Diabetes	176
6.3.4.3	Pediatrics	176
6.3.4.4	Arthritis and arteriosclerosis	176
6.3.4.5	Sports medicine	178
6.3.4.6	Ophthalmology	179
6.3.4.7	Other medical and pharmaceutical applications	180
6.4	Advantages, limitations, and future of thermal imaging	181
6.4.1	Advantages	181
6.4.2	Limitations	182
6.4.3	Future	182

Chapter 7 X-ray imaging	185
7.1 Introduction.....	185
7.2 Components and principles of an X-ray imaging system.....	185
7.2.1 X-ray source	185
7.2.2 Image intensifier	186
7.2.3 Detectors and camera.....	187
7.2.4 Image processing system (A/D converter, frame grabber, and computer)...	187
7.2.5 Principle	187
7.2.6 X-ray machine specification and type	188
7.2.6.1 Vertical beam X-ray system	188
7.2.6.2 Horizontal beam X-ray system.....	188
7.2.6.3 Combination beam system	188
7.3 Present applications in bio-industries	189
7.3.1 Detection of contamination.....	189
7.3.2 Shell removal from whelk	191
7.3.3 Inspection of pumped products	191
7.3.4 Determination of composition.....	192
7.3.5 Detection of defects in products.....	192
7.3.6 Monitoring packaging and sealing	192
7.4 Agricultural and food product inspection and quality evaluation	193
7.4.1 X-ray quarantine for agricultural products	193
7.4.2 Dynamic X-ray imaging	193
7.4.3 Quantification and flow rate measurements	195
7.4.4 Detection of insect infestation	195
7.4.4.1 Grain.....	195
7.4.4.2 Produce.....	198
7.4.4.3 Nuts.....	198
7.4.5 Quality evaluation of agricultural products using X-ray imaging	199
7.4.5.1 Detection of body composition.....	201
7.4.5.2 Aquaculture (bone detection)	201
7.4.5.3 Wood.....	202
7.5 Medical applications of X-ray.....	203
7.6 Applications of X-ray imaging in engineering industry.....	204
7.7 Advantages and limitations of product inspection using X-rays	206
7.7.1 Advantages	206
7.7.2 Limitations.....	206
7.8 Cost comparison, safety, and future applications.....	207
7.8.1 Economics	207
7.8.2 Safety	208
7.8.3 Shielding	208
7.8.4 Future applications.....	208
Chapter 8 X-ray computed tomography imaging	211
8.1 Introduction.....	211
8.2 Computed tomography.....	211
8.2.1 Principle of X-ray CT	211
8.2.2 Common configurations of X-ray CT.....	214

8.2.3	Instrumentation or components of X-ray CT.....	215
8.2.3.1	X-ray source	215
8.2.3.2	X-ray detectors.....	215
8.2.3.3	Image processor (digital acquisition system).....	215
8.2.4	Microtomography	216
8.3	Applications of X-ray CT	216
8.3.1	Forestry and agriculture.....	216
8.3.1.1	Knot detection in wood	216
8.3.1.2	Assessment of wood decay.....	216
8.3.1.3	Tree ring measurement	219
8.3.1.4	Assessment of soil structure	219
8.3.1.5	Hydrology	220
8.3.1.6	Plant development study	220
8.3.1.7	Grain	221
8.3.2	Food	222
8.3.2.1	Fruits.....	222
8.3.2.2	Ripening assessment.....	223
8.3.2.3	Cereal products	224
8.3.2.4	Bread	225
8.3.2.5	Frying of potato.....	226
8.3.2.6	Chocolate	226
8.3.2.7	Bouillon	226
8.3.2.8	Meat	227
8.3.3	Aquaculture.....	228
8.3.4	Livestock management	229
8.3.5	Engineering applications.....	230
8.3.6	Applications of X-ray CT in medicine	232
8.3.6.1	Cardiology	233
8.3.6.2	Lung and related diseases	234
8.3.6.3	CT colonography	234
8.4	Advantages, limitations, and future of X-ray CT.....	236
8.4.1	Advantages	236
8.4.2	Limitations.....	236
8.4.3	Future	237
Chapter 9	Magnetic resonance imaging.....	239
9.1	Introduction.....	239
9.2	Magnetic resonance imaging.....	239
9.2.1	Principle	239
9.2.2	Components of MRI scanner	240
9.2.2.1	Magnet.....	240
9.2.2.2	Radio frequency coil.....	240
9.2.2.3	Gradient coil	240
9.2.2.4	Processor	241
9.3	Applications of MRI	241
9.3.1	Agriculture	241
9.3.1.1	Soil.....	241
9.3.1.2	Wood.....	242
9.3.1.3	Cereal grains.....	242

9.3.2	Aquaculture.....	244
9.3.2.1	Effect of freezing.....	244
9.3.2.2	Evaluation of quality.....	244
9.3.2.3	Sex determination and gonad development.....	245
9.3.3	Meat.....	246
9.3.3.1	Body composition.....	246
9.3.3.2	Fat content and quality evaluation.....	247
9.3.4	Food.....	248
9.3.4.1	Confectionery.....	249
9.3.4.2	Dairy food.....	249
9.3.4.3	Moisture migration.....	250
9.3.4.4	Detection of spoilage.....	253
9.3.5	Fruits and vegetables.....	254
9.3.5.1	Apple.....	254
9.3.5.2	Pomegranate.....	255
9.3.5.3	Tomato.....	256
9.3.5.4	Pears.....	257
9.3.5.5	Wine grapes.....	257
9.3.5.6	Avocado and cherry.....	258
9.3.5.7	Courgettes (zucchini).....	258
9.3.5.8	Strawberry.....	259
9.3.6	Medical applications.....	259
9.3.6.1	Lung diseases.....	261
9.3.6.2	Cancer.....	262
9.3.6.3	Cardiac diseases.....	263
9.3.6.4	Kidney.....	264
9.3.6.5	Arthritis.....	265
9.3.6.6	MRI in tissue engineering.....	266
9.3.7	Engineering applications.....	266
9.4	Advantages, limitations, and future of MRI.....	268
9.4.1	Advantages.....	268
9.4.2	Limitations.....	269
9.4.3	Future.....	269
Chapter 10 Optical coherence tomography imaging.....		271
10.1	Introduction.....	271
10.2	Principle of optical coherence tomography.....	271
10.3	Applications of OCT.....	273
10.3.1	Agriculture.....	273
10.3.1.1	Detection of viral infection.....	273
10.3.1.2	Seed structure.....	274
10.3.1.3	Hull thickness.....	275
10.3.1.4	Plant tissue.....	276
10.3.1.5	Rice varieties.....	277
10.3.2	Fruits and vegetables.....	278
10.3.2.1	Botanical samples.....	278
10.3.2.2	Defects in onion.....	278
10.3.2.3	Wax coating in apple.....	279
10.3.2.4	Microstructure of apple peel.....	279

10.3.2.5	Fungal disease detection	280
10.3.2.6	Extruded cereals	280
10.3.2.7	Quality control of foil	280
10.3.3	Applications of OCT in engineering	281
10.3.3.1	Aerospace materials	281
10.3.3.2	Printed electronic board	282
10.3.3.3	Glass fiber-reinforced polymer	282
10.3.3.4	Subsurface defect detection	283
10.3.3.5	Paper making	283
10.3.4	Medical applications of OCT	283
10.3.4.1	Cancer	284
10.3.4.2	Cardiology	285
10.3.4.3	Dentistry	286
10.3.4.4	Pharmacy	287
10.4	Advantages, limitations, and future of OCT	288
10.4.1	Advantages	288
10.4.2	Limitations	289
10.4.3	Future	290
Chapter 11	Imaging-based automation in the food and agriculture industry	291
11.1	Introduction	291
11.2	Need for automation with focus on imaging	292
11.2.1	Typical product flow in food processing industry	293
11.3	Current uses of imaging-based automation in agriculture and food industries	294
11.3.1	Agriculture	294
11.3.1.1	Weeding	294
11.3.1.2	Identification of plants in field/harvesting	295
11.3.1.3	Grading/sorting	297
11.3.2	Food	299
11.3.2.1	Bakery inspection	299
11.3.2.2	Pizza/tortilla	300
11.3.2.3	Cheese	301
11.3.2.4	Monitoring fill levels	301
11.3.2.5	Label inspection and validation	301
11.3.2.6	Sealing inspection	304
11.3.2.7	To determine weak chain link in conveyer	304
11.3.2.8	Meat	305
11.4	Advantages and limitations of machine vision technology	305
11.4.1	Advantages	305
11.4.2	Concerns and limitations	307
11.4.3	Costs	308
11.4.3.1	Maintenance of machine vision systems	309
11.4.3.2	Myths about machine vision	309
11.5	Future of machine vision in food and agriculture	310
11.5.1	Machine vision systems based on smart cameras versus PCs	310
11.5.2	Growth of machine vision	310
