

CONTENTS

AUTHORS INFORMATION	IX
INTRODUCTION	XI
CHAPTER 1.	
PECULIARITIES OF CONNECTIVE TISSUE	
HISTOPHYSIOLOGY, BIOCHEMISTRY	
AND MOLECULAR BIOLOGY	
1.1. Definitions, organization principles, and classification of connective tissue.....	2
1.2. Basic definitions, principles and emphasis of modern biochemistry and molecular biology	4
1.3. General biochemical aspects of connective tissue	8
1.4. Formation and histogenesis of connective tissue.....	11
1.4.1. Embryology and histogenesis of connective tissue ...	11
1.4.2. Molecular and biochemical regularities of initial stages of connective tissue structures formation.....	13
CHAPTER 2.	
CELLULAR ELEMENTS OF CONNECTIVE TISSUE	
2.1. Proper cells of connective tissue	18
2.2. Fibroblastic differon	19
2.2.1. Histophysiologic characteristics of fibroblastic differon.....	19
2.2.2. Biochemical and molecular biological characteristics offibroblastic differon.....	45
2.3. Adventitious cells.....	56
2.4. Adipose cells (lipocytes, adipocytes)	56
2.4.1. Histophysiologic characteristics of adipose cells.....	56
2.4.2. Biochemical and molecular biological characteristics of adipose cells	64
2.5. Cells associated with connective tissue	68
2.5.1. Macrophages.....	68
2.5.2. Mast cells (tissue basophiles) (mc)	72
2.5.3. Plasma cells (plasmocytes)	76
CHAPTER 3.	
EXTRACELLULAR MATRIX OF CONNECTIVE TISSUE.	
HISTOPHYSIOLOGY, BIOCHEMISTRY AND MOLECULAR	
BIOLOGY	
3.1. Fibrous structures	80
3.1.1. Collagen fibrous structures.....	80
3.1.1.1. Biochemistry of collagenous proteins. Collagen classification. Collagen biosynthesis.....	80
3.1.1.2. Collagen fibrillogenesis and fiber formation	93
3.1.1.3. Composition of collagen fibrous structures.....	95
3.1.2. Elastic fibrous structures	107
3.1.2.1. Biochemistry of fibrillin microfibrils	107
3.1.2.2. Elastin biochemistry	109
3.1.2.3. Formation of elastic fibers	112
3.1.2.4. Structure of elastic fibers	112
3.1.2.5. Organ peculiarities of elastic fiber structure.....	118
3.2. Integrating buffer metabolic medium (ground substance) of connective tissue extracellular matrix.....	121
3.2.1. Biochemical characteristics of glycoconjugates and their classification.....	121
3.2.1.1. Glycoproteins: structure and functions.....	125
3.2.1.2. Proteoglycans: structures, properties and biosynthesis	132
3.2.1.3. Structural organization of connective tissue integrating buffer metabolic medium (ground substance)	140
3.3. Basement membranes	144
3.3.1. Structure of basement membranes	144
3.3.2. Biochemistry of basement membranes	144
3.4. Interstitial (interfibrous and intercellular) space of connective tissue.....	152
3.5. Structural peculiarities of connective tissue various types and their organ specificity.....	152
3.5.1. Morphological characteristics of connective tissue of various types	152
3.5.2. Peculiarities of organ structure of fibrous connective tissue	157
3.5.3. Biochemical and molecular biological characteristics of fibrous dense connective tissue	171
3.6. General regularities of molecular and supramolecular organization of connective tissue extracellular matrix. Molecular mechanisms of cells and matrix interaction	177
3.6.1. Main general peculiarities of macromolecular components of extracellular matrix	177
3.6.2. Interaction of extracellular matrix macromolecular components and morphogenetic role of these interactions	179
3.6.3. Proteins of cell (cytoplasmic) membrane. Cells' interactions with extracellular matrix	181
3.7. Catabolism of macromolecular components extracellular of the matrix	185
3.7.1. Metalloproteases (metalloproteinases)	185
3.7.2. Inhibitors of metalloproteases	189

CHAPTER 4.**REGULATION OF CONNECTIVE TISSUE
METABOLIC FUNCTIONS**

- 4.1. Systemic factors of regulation 192
 4.2. Local factors of regulation 193

CHAPTER 5.**BIOCHEMICAL AND MOLECULAR
MECHANISMS AND MANIFESTATIONS
OF CONNECTIVE TISSUE AGEING 199****CHAPTER 6.****BONE—AN ORGAN OF THE SUPPORT AND LOCOMOTOR
APPARATUS CONTAINING ALL TYPES OF CONNECTIVE
TISSUE**

- 6.1. Overview of bone structure and function 208
 6.2. General structural and functional characteristics
 of bone components 209

CHAPTER 7.**CARTILAGE—CARTILAGINOUS TISSUE: STRUCTURAL,
BIOCHEMICAL AND MOLECULAR BIOLOGICAL
CHARACTERISTICS**

- 7.1. Overview of structure and composition
 of cartilage tissue 246
 7.2. Hyaline cartilages—cartilage tissues 249
 7.2.1. Hyaline articular cartilages 249
 7.2.1.1. Cartilage cells differon 249
 7.2.1.1.1. Morphology and histophysiology
 of chondroblast and chondrocyte 249
 7.2.1.1.2. Biochemical and molecular biological
 characteristics of chondroblast and chondrocyte 265
 7.2.1.2. Extracellular matrix 271
 7.2.1.2.1. Fibrillar components of cartilaginous tissue 271
 7.2.1.2.1.1. Biochemical characteristics 271
 7.2.1.2.1.2. Morphologic characteristics 275
 7.2.1.2.2. Structure of articular cartilage minerals 286
 7.2.1.2.3. Organization of articular cartilage interstitial
 space 294
 7.2.1.2.4. Glycoconjugates of cartilaginous tissue 294
 7.2.1.2.4.1. Biochemical characteristics of glycoproteins
 and proteoglycans 294
 7.2.1.2.4.2. Morphological characteristic of structured
 polysaccharide complexes 307
 7.2.1.3. Cartilaginous tissue as an integrated system
 (structural functional unity of cells and matrix) 311

- 7.2.1.4. Metabolism of cartilaginous tissue 314
 7.2.1.5. Regulation of cartilaginous tissue metabolic
 functions 317
 7.2.1.5.1. Systemic factors of regulation 317
 7.2.1.5.2. Local factors of regulation 320
 7.2.1.6. Biomechanical (mechanochemical) aspects
 of articular cartilage 323
 7.2.2. Hyaline non-articular cartilages—cartilaginous
 tissues 326
 7.2.2.1. Morphologic characteristic 326
 7.3. Elastic cartilages—cartilaginous tissue 327
 7.3.1. Morphologic characteristic 327
 7.4. Fibrous cartilages—cartilaginous tissue 334
 7.4.1. Morphologic characteristic 334

CHAPTER 8.**BONE TISSUE: THE STRUCTURAL-FUNCTIONAL,
BIOCHEMICAL AND BIOMOLECULAR CHARACTERISTICS
OF ITS COMPONENTS**

- 8.1. General overview of bone tissue structure
 and composition 342
 8.1.1. The structure of bone tissue 342
 8.1.2. Chemical composition of bone tissue 343
 8.2. Differons of bone cells 346
 8.2.1. Osteogenic cells (osteoblasts, osteocytes)
 and their progenitors 346
 8.2.1.1. Morphology of preosteoblasts and osteoblasts 346
 8.2.1.2. Molecular biological and biochemical
 characteristics of osteoblasts 354
 8.2.1.3. Morphology of osteocytes 358
 8.2.1.4. Biochemical and molecular biological
 characteristics of osteocytes 358
 8.2.2. Osteoclasts. Osteoclastic resorption of bone
 tissue 361
 8.2.2.1. Morphology of osteoclasts 361
 8.2.2.2. Functions of osteoclasts and biochemical
 mechanisms of osteoclastic bone tissue
 resorption 362
 8.3. Extracellular matrix of bone tissue 370
 8.3.1. Organic component of bone matrix 370
 8.3.1.1. Biochemical characteristic of bone matrix
 organic component 370
 8.3.1.1.1. Collagenous components of matrix. Fibrillin 370
 8.3.1.1.2. Non-collagen components of bone matrix 371
 8.3.1.1.3. Matrix non-specific components 374
 8.3.1.2. Morphological characteristic of organic
 component of bone matrix 375
 8.3.2. Mineral component of bone matrix 376

8.3.2.1. Chemical characteristic of mineral component.....	376
8.3.2.2. Morphologic (structural) arrangement of mineral component.....	386
8.3.2.3. Dynamics and biochemical mechanisms of structuring (mineralization) bone minerals.....	387
8.3.2.4. Structuring of bone minerals in reparative bone regeneration.....	400
8.3.2.5. Demineralization of bone matrix <i>in vitro</i> and subsequent structuring (crystallization) of bone minerals dissolved on its surface.....	405
8.3.2.6. Structure of coral skeleton.....	410
8.3.2.7. Structure of sea-shell mineral.....	410
8.3.2.8. Role of mineral component in bone biomechanical properties.....	410
8.4. Interstitial space of bone tissue.....	411
8.4.1. Morphologic characteristic of bone canals.....	411
8.4.2. Physico-chemical characteristics of interstitial space of bone tissue.....	419
8.5. Regulation mechanisms of bone tissue metabolism and functions.....	421
8.5.1. Systemic factors and regulation mechanisms (hormones, neuroendocrine factors, vitamins).....	421
8.5.2. Local (short distance) regulation factors of bone tissue metabolic functions.....	443
8.6. Remodeling of bone tissue.....	450
8.6.1. Definition, classification, general characteristic.....	450
8.6.2. Molecular and biochemical mechanisms of bone tissue remodeling.....	450
8.7. Tooth connective tissue.....	457
8.7.1. Structural organization.....	457
8.7.1.1. Pulp.....	457
8.7.1.2. Dentin.....	457
8.7.1.3. Enamel.....	468

CHAPTER 9.

BIOCHEMICAL CHARACTERISTIC OF SYNOVIAL MEMBRANE AND SYNOVIA

9.1. Synovial membrane.....	474
9.2. Synovia (synovial fluid).....	476
9.2.1. General characteristics of synovia. Protein components.....	476
9.2.2. Synovia hyaluronan.....	480
9.2.3. Molecular mechanisms of synovia lubricating function.....	482

CHAPTER 10.

MOLECULAR BIOLOGICAL AND BIOCHEMICAL REGULARITIES OF CONNECTIVE TISSUE STRUCTURES ONTOGENESIS

10.1. Molecular biological and biochemical mechanisms of mesenchyme condensation. Regulation systems of connective tissue structure morphogenesis.....	486
10.2. Differentiation of connective tissue cells.....	500
10.2.1. Molecular biological and biochemical mechanisms of fibroblast differentiation and formation of fibrous (dense) connective tissue structures.....	500
10.2.2. Molecular biological and biochemical mechanisms of chondroblastic differentiation.....	500
10.2.3. Molecular biological and biochemical mechanisms of osteoblastic differentiation.....	507
10.2.4. Molecular biological mechanisms of osteoclastogenesis and its regulation.....	518
10.3. Molecular biological and biochemical regularities of skeleton formation and growth.....	520
10.3.1. Molecular biological and biochemical regularities of bone formation.....	520
10.3.1.1. Ossification types. Endochondral ossification.....	520
10.3.1.2. Molecular biological and biochemical regularities of metaepiphyseal cartilage function.....	521
10.3.1.3. Intramembraneous ossification.....	529
10.3.1.4. Type x collagen.....	533
10.4. Molecular biological and biochemical mechanisms of joint formation.....	534
10.4.1. Mechanisms of joint formation.....	534
10.4.2. Molecular factors of regulation of joint formation.....	537
