<i>Preface</i>	v
<i>Gene Nomenclature</i>	xi
<i>The History of Stem Cells</i>	xiii

PART I: BASIC STEM CELL BIOLOGY

1. Cell Cycle Regulation of Pluripotent Stem Cells <i>Amar M. Singh and Stephen Dalton</i>	3
2. Asymmetric Cell Divisions and Nuclear Migrations of Neural Progenitors: Two Mechanisms that Influence Neurogenesis <i>Paula Alexandre, Jonathan Clarke and Yoichi Kosodo</i>	23
3. Epigenetic Regulation of Adult Stem Cells <i>Frank Rosenbauer and Margaret A. Goodell</i>	53
4. Hematopoietic Stem Cell Aging and Oxidative Stress <i>June-Won Cheong, Ayako Nakamura-Ishizu, Eriko Nitta and Toshio Suda</i>	88
5. Bioelectric Controls of Stem Cell Function <i>Vaibhav P. Pai and Michael Levin</i>	106

PART II: TISSUE FORMATION DURING DEVELOPMENT

6. Development from the Fertilized Egg to the Three Germ Layers and its Relevance to Signaling and Lineage Commitment of Embryonic Stem Cells <i>Paul W. Burridge and Kenneth R. Boheler</i>	151
7. Hematopoiesis During Embryonic Development <i>Rachel Golub, Paulo Vieira and Ana Cumano</i>	185
8. Neural Progenitors and Evolution of Mammalian Neocortex <i>Iva Kelava and Wieland B. Huttner</i>	213

9. Dynamic Gene Networks in Neural Stem Cell Regulation	258
<i>Ryoichiro Kageyama, Toshiyuki Ohtsuka, Hiromi Shimojo and Itaru Imayoshi</i>	
10. Stem Cells in the Development, Regeneration and Repair of the Retina	277
<i>Thomas A. Reh</i>	
11. Progenitor Cells in Embryonic and Adult Lungs	308
<i>Emily Fox, Michael L. Litvack and Martin Post</i>	
12. Stem Cells During Tooth Development	342
<i>Abigail S. Tucker and Paul T. Sharpe</i>	
13. Liver and Pancreas: Mechanisms of Development and Size Control	358
<i>Ravi Maddipati and Ben Z. Stanger</i>	

PART III: MODEL ORGANISMS

14. Developmental Regulation and <i>De Novo</i> Formation of Stem Cells in Plants	403
<i>Erin E. Sparks, Akihiro Imai, Mitsuyasu Hasebe and Philip N. Benfey</i>	
15. Planarian Totipotent Stem Cells	433
<i>Teresa Adell, Francesc Cebrià and Emili Saló</i>	
16. Zebrafish in Stem Cell Research	473
<i>Katy L. Lawson and Leonard I. Zon</i>	
17. Deer Antler Stem Cells—New Aspects and Findings	507
<i>Hans J. Rolf and K. Günter Wiese</i>	
18. Genetic Manipulations of Pluripotent Stem Cells	535
<i>Konstantinos Anastassiadis</i>
