Preface.....	vii
Editors.....	ix
Contributors.....	xi
Chapter 1 Behavior and physiology: An ecological and evolutionary viewpoint on the energy and water relations of ectothermic amphibians and reptiles	1
<i>Harvey B. Lillywhite</i>	
Chapter 2 Acclimation, acclimatization, and seasonal variation in amphibians and reptiles	41
<i>Alexander G. Little and Frank Seebacher</i>	
Chapter 3 Physiological and biochemical correlates of calling behavior in anurans with different calling strategies	63
<i>Catherine R. Bevier</i>	
Chapter 4 Digestive physiology in reptiles with special reference to pythons.....	81
<i>Sanne Enok, Lasse Stærdal Simonsen, Peter Funch, Aksel Kruse, Jens Frederik Dahlerup, and Tobias Wang</i>	
Chapter 5 Effects of feeding on the respiration of ectothermic vertebrates	115
<i>José Eduardo de Carvalho, Denis Vieira de Andrade, and William K. Milsom</i>	
Chapter 6 Temperature effects on the metabolism of amphibians and reptiles: Caveats and recommendations.....	129
<i>Denis Vieira de Andrade</i>	

Chapter 7	Physiological ecology and conservation of anuran amphibians.....	155
	<i>Carlos A. Navas, Fernando R. Gomes, and Eleonora Aguiar De Domenico</i>	
Chapter 8	Assessing the physiological sensitivity of amphibians to extreme environmental change using the stress endocrine responses	189
	<i>Edward J. Narayan</i>
