Abbreviations and Glossary	xv
Preface.....	xvii
Acknowledgments.....	xix
About the Author	xxi

Chapter 1	Detection of Whole Viruses	1
1.1	Introduction	1
1.2	Historical Background.....	3
1.2.1	Introduction	3
1.2.2	Need for New Detection System	3
1.2.3	Statement of Problem	4
1.2.4	Historic Methods	4
1.2.5	History of IVDS	5
1.2.5.1	Collection Stage	5
1.2.5.2	Separation Stage	6
1.2.5.3	Purification Stage.....	7
1.2.5.4	Detection Stage.....	7
1.2.6	Developmental Risks.....	8
1.2.6.1	Collection Stage	8
1.2.6.2	Extraction Stage.....	8
1.2.6.3	Purification (Concentration) Stage.....	8
1.2.6.4	Detection Stage.....	8
1.2.7	Summary	9
1.3	It Works! The Eureka Moment.....	9
1.4	Flowchart for Virus Detection.....	10
1.4.1	Introduction	10
1.4.2	Collecting Stage	11
1.4.3	First Purifying and Concentrating Stage.....	11
1.4.4	Separating Stage.....	11
1.4.5	Second Purifying and Concentration Stage	12
1.4.6	Detection Stage	12
1.4.7	Data Processing	12
1.5	Concept of IVDS Operation	12
1.6	IVDS Systems and Operations.....	13
1.6.1	Functions	13
1.6.2	Challenges	13
1.6.3	Objectives of Invention.....	15
1.6.4	Operational Details	15
1.6.4.1	Collection.....	17
1.6.4.2	Centrifugation.....	17

1.6.4.3	Density Gradient.....	19
1.6.4.4	Virus Window.....	20
1.6.4.5	Purification	22
1.6.4.6	Detection.....	23
1.6.4.7	DMA Function.....	24
1.6.4.8	Automation	25
1.6.5	Early Virus Detection Examples.....	26
1.6.5.1	Filtration	26
1.6.5.2	Detection.....	27
1.6.5.3	Results.....	27
1.7	Organization of This Book.....	28
Chapter 2	Instrumentation	31
2.1	Introduction	31
2.2	Descriptions of IVDS Components.....	31
2.2.1	Purifier-Concentrator.....	31
2.2.2	Electrospray (ES) Injection	32
2.2.3	Differential Mobility Analyzer (DMA)	34
2.2.4	Condensation Particles Counter (CPC)	36
2.3	IVDS-Beta.....	37
2.3.1	Improvements and Testing	37
2.3.2	Background	38
2.3.3	System Description.....	38
2.3.3.1	Ultrafiltration (UF) Module.....	39
2.3.3.2	GEMMA Unit.....	40
2.3.4	Upgrades.....	42
2.3.5	Testing of Improvements	43
2.3.5.1	General Test Protocols.....	43
2.3.6	Processing and Analysis of MS2 from Cell Culture ..	45
2.3.6.1	Standards and Specifications	45
2.3.6.2	Cultures Tested	46
2.3.7	Test Matrix	46
2.3.8	Test Results.....	47
2.3.8.1	MS2 Bacteriophage Virus Standard	47
2.3.8.2	T7 Bacteriophage.....	53
2.3.8.3	Particle Size Standards	53
2.3.8.4	Standardized Salt Solutions.....	55
2.3.9	Ultrafiltration and GEMMA Tandem Analysis of MS2	56
2.3.10	Ultrafiltration and GEMMA Tandem Analysis of MS2 with Thyroglobulin.....	59
2.3.11	Summary of Classification Testing	60
2.4	Commercial IVDS.....	61
2.5	RapidDx-IVDS	62
2.6	Capillary Diameter Effect and IVDS Stability	63

2.6.1	Introduction	63
2.6.2	Capillary Procedures for MS2	64
2.6.3	Capillary Procedures for Buffer Solution	65
2.6.4	Results	66
2.7	Electrospray Stability	66
2.7.1	Procedure	67
2.7.2	Results	68
Chapter 3	Proof Concept Using MS2.....	71
3.1	Introduction	71
3.2	Physical Basis of Invention.....	71
3.2.1	Different Sized Viruses	71
3.2.2	Virus Window	73
3.3	MS2 as Test Virus	75
3.4	Characterization of MS2 Using IVDS	75
3.4.1	Introduction	75
3.4.2	Results	75
3.4.3	Analysis and Discussion.....	80
3.5	Removing Complex Growth Media.....	81
3.5.1	Introduction	81
3.5.2	Results of MS2 with Growth Media.....	82
3.5.2.1	Ultrafiltration of MS2 with Growth Media	82
3.5.2.2	Counting MS2 after Removal of Growth Media.....	83
3.5.3	Results of MS2 with Albumin.....	85
3.5.4	Results of MS2 with Cesium Chloride	86
3.5.4.1	Ultrafiltration of MS2 with Cesium Chloride	86
3.5.4.2	Counting MS2 after Removal of Cesium Chloride	86
3.5.5	MS2 Purification	87
3.5.6	Use of MS2 for Testing: Conclusions	88
3.6	Filtration Characteristics of MS2 Bacteriophage	89
3.6.1	Introduction	89
3.6.2	Filter Study	89
3.6.2.1	Slant (Wedge) Filters	90
3.6.2.2	Cross-Flow or Tangential Flow Filters	92
3.6.3	Results of Filter Study	96
3.7	Summary	96
Chapter 4	Concentration of Viruses.....	97
4.1	Introduction	97
4.2	Concentrator Device	97

4.2.1	Background	97
4.2.2	New Concentrator Device	98
4.2.3	Components and Functions	98
4.2.4	Testing	103
Chapter 5	Cause and Effect Curves	107
5.1	Introduction	107
5.2	Effects of Temperature on MS2 Survival.....	107
5.2.1	Procedures.....	107
5.2.2	Results	108
5.2.3	Conclusions	112
5.3	Dose Response Curves for MS2 (High pH)	112
5.3.1	Procedures.....	112
5.3.2	Results	112
5.3.3	Conclusions	114
5.4	Dose Response Curves for MS2 (Low pH).....	115
5.4.1	Procedures.....	115
5.4.2	Results	117
5.4.3	Conclusions	118
Chapter 6	Isolating Single Viruses from Multivirus Mixtures.....	121
6.1	Introduction	121
6.2	Procedure.....	121
6.3	Differential Mobility Separation	124
6.3.1	Aerosol Collection.....	125
6.3.2	Electrostatic Collection	126
6.3.3	Polystyrene Collection.....	128
6.4	Conclusions.....	128
6.5	Summary	129
Chapter 7	Analyzing Various Viruses	131
7.1	Introduction	131
7.2	IVDS.....	131
7.2.1	Purifier/Concentrator.....	132
7.2.2	Electrospray Injection.....	132
7.2.3	Differential Mobility Analyzer (DMA)	132
7.2.4	Condensation Particles Counter	133
7.3	Sample Analysis Procedures	133
7.3.1	General Principles	133
7.4	Analyses of and Results for Specific Viruses.....	135
7.4.1	GD7 Virus	135
7.4.2	Kilham Rat Virus (KRV).....	136

7.4.3	MAD-K87 Adenovirus.....	138
7.4.4	Mouse Hepatitis Virus (MHV) or Coronaviridae	138
7.4.5	MVM Parvovirus	138
7.4.6	Reo-3 Reovirus.....	142
7.4.7	Sendai Rodent Virus	145
7.5	Analysis of Complex Media	145
7.5.1	Detection of Viruses in Drinking Water	145
7.5.2	Recovery of MS2 from "Spiked" Blood Plasma	145
7.5.3	Analysis of Marine Water	145
7.5.4	Analysis of Saliva.....	147
7.5.5	Analysis of Environmental Air Samples.....	147
7.6	Water Sample Analysis.....	149
7.6.1	Introduction	149
7.6.2	Water Sample Analysis	149
7.6.3	Chlorinated Water Samples.....	149
7.6.4	Standard Reverse Osmosis Samples.....	152
7.6.5	Natural Water Samples.....	152
7.6.6	Discussion.....	156
7.7	Recovery of Viruses from Surfaces	156
7.7.1	Introduction	156
7.7.2	IVDS Components	157
7.7.3	Test Procedure.....	157
7.7.4	Results	158
7.7.5	Discussion.....	160
7.8	Detection of Viruses in Bark Beetles	161
7.8.1	Introduction	161
7.8.2	Methods.....	161
7.8.2.1	Adults (1.4g).....	161
7.8.2.2	Larvae (4.2g).....	162
7.8.2.3	Preparation for IVDS Processing	162
7.8.3	Results	162
Chapter 8	Detection of Other Nanoparticles	165
8.1	Introduction	165
8.2	Particle Size Results: Comparison of Malvern Nano ZS and IVDS.....	165
8.2.1	Method	166
8.2.2	Results	166
Chapter 9	Direct Counting of Pili.....	175
9.1	Introduction	175
9.2	Detecting Pili.....	175

9.3	Testing Procedures	177
9.3.1	IVDS	177
9.3.2	Mass Spectrometry	179
9.3.2.1	Electrospray Ionization Mass Spectrometry (ESI MS) Parameters	179
9.3.2.2	Automated Deconvolution Algorithm Analysis	179
9.3.3	Results	179
9.3.3.1	IVDS	179
9.3.3.2	Mass Spectrometry	179
9.4	Conclusions	182
Chapter 10	Detecting Viruses in Honeybees	185
10.1	Introduction and Formation of BVS, Inc.	185
10.1.1	Early Objectives	186
10.1.2	Equipment and Methods	187
10.1.3	Results and Lessons Learned	187
10.1.4	Early Accomplishments	190
10.2	Detection of Viruses from Single Honeybee	194
10.3	Rosetta Stone Project	194
10.3.1	Introduction	194
10.3.2	Detection Comparative Analysis	195
10.3.3	Methods	196
10.3.4	Results	196
10.3.5	Conclusion	197
10.4	Honeybee Nutrition Study	197
10.4.1	Introduction	197
10.4.2	Objectives	198
10.4.3	Materials and Methods	198
10.4.4	Results and Discussion	198
10.5	Essential Oils Study	199
10.5.1	Materials and Methods	199
10.5.1.1	Sample Collection	200
10.5.1.2	Sample Processing	200
10.5.1.3	Preparation for IVDS	200
10.5.2	Objectives	200
10.5.2.1	Essential Oils as Viral and Nosema Controls in Honeybees	200
10.5.2.2	Viral Load Relationship to Pests, Parasites, Diseases, and Stress of Managed Honeybees	200
10.5.3	Challenges	201
10.5.4	Virus Relationship to Stress	201
10.5.5	Results and Discussion	202

10.6	Snapshots of Viral Loads in Honeybees.....	203
10.6.1	Objectives.....	203
10.6.2	Results.....	203
10.6.3	Project Summary.....	205
10.7	Conclusions.....	205
Chapter 11	Pulsed Lamp Decontamination.....	207
11.1	Introduction.....	207
11.2	Methods.....	207
11.2.1	Pulsed Light.....	207
11.2.2	Filter Data.....	209
11.2.3	IVDS.....	210
11.2.4	Experimental Arrangement.....	210
11.3	Results.....	211
11.3.1	MS2 Bacteriophage.....	211
11.3.2	TBSV.....	214
11.4	Discussion and Conclusions.....	215
Chapter 12	Current and Future Trends.....	221
12.1	Introduction.....	221
12.2	Potential Applications of IVDS.....	221
12.3	New RapidDx Instrument.....	222
12.3.1	Concept of Operation and Applications.....	222
12.3.2	Electronic Amplification.....	223
12.3.3	Miniaturization.....	223
12.3.4	Balance of System.....	223
12.4	The Future.....	223
