

Contents

<i>Preface</i>	v
1. Phylogeny of the Aphids	1
<i>Lars Podsiadlowski</i>	
2. The Ontogenesis of the Pea Aphid <i>Acyrtosiphon pisum</i>	14
<i>Henrike Schmidtberg and Andreas Vilcinskas</i>	
3. Functional and Evolutionary Genomics in Aphids	52
<i>Denis Tagu, Federica Calevro, Stefano Colella, Toni Gabaldón and Akiko Sugio</i>	
4. Epigenetic Control of Polyphenism in Aphids	89
<i>Krishnendu Mukherjee and Arne F. Baudach</i>	
5. Bacterial Symbionts of Aphids (Hemiptera: Aphididae)	100
<i>Marisa Skaljac</i>	
6. Aphid Immunity	126
<i>Andreas Vilcinskas</i>	
7. Aphid Molecular Stress Biology	135
<i>Laramy S. Enders and Nicholas J. Miller</i>	
8. The Effect of Plant Within-Species Variation on Aphid Ecology	152
<i>Sharon E. Zytynska and Wolfgang Weisser</i>	
9. Chemical Ecology of Aphids (Hemiptera: Aphididae)	171
<i>Antoine Boullis and François J. Verheggen</i>	
10. Aphid Honeydew: Rubbish or Signaler	199
<i>Klaus H. Hoffmann</i>	
11. Function of Aphid Saliva in Aphid-Plant Interaction	221
<i>Torsten Will</i>	
12. Biotechnological Approaches to Aphid Management	238
<i>Benjamin R. Deist and Bryony C. Bonning</i>	
13. Aphid Techniques	255
<i>Torsten Will</i>	
Index	271
