Preface, xi

Contributors, xiii

SECTION I Introduction: Historical and Methodological Context

CHAPTER 1 ■ Introduction 3

MARGARIDA BASTOS

CHAPTER 2 ■ From Classical Thermochemistry to Monitoring of Living Organisms 17

INGEMAR WADSO

CHAPTER 3 ■ A Journey in the Land of Biocalorimetry: A Quest for Knowledge 41

LEE D. HANSEN

CHAPTER 4 ■ An Odyssey in Calorimetric Development: From Past to Future 63

JAAP SUURKUIJSK, MALIN SUURKUIJSK, AND PETER VIKEGARD

CHAPTER 5 ■ Enzyme-Catalyzed Reactions 79

ROBERT N. GOLDBERG

SECTION II Membrane Characterization and Partition to Membranes

CHAPTER 6 ■ Temperature-Induced and Isothermal Phase Transitions of Pure and Mixed Lipid Bilayer Membranes Studied by DSC and ITC 103

ALFRED BLUME

CHAPTER 7 ■ Thermotropic Properties of Ceramides in Aqueous or Lipidic Environments	137
ALICIA ALONSO AND FELIX M. GOÑI	
CHAPTER 8 ■ Peptide–Membrane Interactions Studied by Isothermal Titration Calorimetry	153
JOHANNES KLINGLER AND SANDRO KELLER	
CHAPTER 9 ■ DSC Studies on the Modulation of Membrane Lipid Polymorphism and Domain Organization by Antimicrobial Peptides	169
KARL LOHNER	
CHAPTER 10 ■ Kinetics of the Interaction of Amphiphiles with Lipid Bilayers Using ITC	191
PATRICIA A. T. MARTINS AND MARIA JOÃO MORENO	
SECTION III Nucleic Acids and Proteins: Stability and Their Interactions with Ligands	
CHAPTER 11 ■ Calorimetry of DNA: Energetic Basis of the Double Helix	209
PETER L. PRIVALOV	
CHAPTER 12 ■ Allostery and Cooperative Interactions in Proteins Assessed by Isothermal Titration Calorimetry	223
ADRIAN VELAZQUEZ-CAMPOY	
CHAPTER 13 ■ Protein Stability in Crowded Environments	247
MICHAEL SENSKE, SIMON EBBINGHAUS, AND CHRISTIAN HERRMANN	
CHAPTER 14 ■ Isothermal Titration Calorimetry and Fluorescent Thermal and Pressure Shift Assays in Protein–Ligand Interactions	261
VYTAUTAS PETRAUSKAS, LINA BARANAUSKIENĖ, ASTA ZUBRIENĖ, AND DAUMANTAS MATULIS	
CHAPTER 15 ■ Joining Thermodynamics and Kinetics by kinITC	281
PHILIPPE DUMAS	
CHAPTER 16 ■ Calorimetric Approaches to Studying Complex Protein Structure–Function–Stability Relationships in Conformational Diseases: The Case of Cystathionine β -Synthase	301
ANGEL L. PEY, TOMAS MAJTAN, AND JAN P. KRAUS	

SECTION IV Calorimetry as a Tool in Applied Fields

CHAPTER 17 ■ An Account in Calorimetric Research: From Fundamentals to Pharmaceuticals	323
PATRICK CONNELLY	
CHAPTER 18 ■ Calorimetry for Monitoring Mixed Bacterial Populations and Biofilms	345
SIMON GAISFORD	
CHAPTER 19 ■ Isothermal Microcalorimetry for the Investigation of Clinical Samples: Past and Present	363
OLIVIER BRAISSANT, GERNOT BONKAT, AND ALEXANDER BACHMANN	
CHAPTER 20 ■ Calorimetric Assays for Heterogeneous Enzyme Catalysis: Hydrolysis of Cellulose and Biomass	381
PETER WESTH AND KIM BORCH	

INDEX, 395
