Preface	v
Contributors	xiii

PART I REVIEWS

1 Homologous Recombination-Mediated DNA Repair and Implications for Clinical Treatment of Repair Defective Cancers	3
<i>Nicole M. Reilly, Brian D. Yard, and Douglas L. Pittman</i>	
2 Resolving Roadblocks to Telomere Replication	31
<i>Emily Mason-Osann, Himabindu Gali, and Rachel Litman Flynn</i>	

PART II CELLULAR ASSAYS TO DETECT AND MEASURE DNA DAMAGE AND DAMAGE RESPONSE

3 In Time and Space: Laser Microirradiation and the DNA Damage Response	61
<i>Jae Jin Kim, Ramhari Kumbhar, Fade Gong, and Kyle M. Miller</i>	
4 Quantification of Double-Strand Breaks in Mammalian Cells Using Pulsed-Field Gel Electrophoresis	75
<i>Kelvin W. Pond and Nathan A. Ellis</i>	
5 Methods to Study Trinucleotide Repeat Instability Induced by DNA Damage and Repair	87
<i>Yanhao Lai, Ruipeng Lei, Yaou Ren, and Yuan Liu</i>	
6 Extracting and Measuring dNTP Pools in <i>Saccharomyces cerevisiae</i>	103
<i>Radha Subramaniam, Natalie A. Lamb, Yoonchan Hwang, Lauren Johengen, and Jennifer A. Surtees</i>	

PART III CELLULAR AND CELL EXTRACT-BASED ASSAYS TO MEASURE DNA REPAIR

7 Conversion Tract Analysis of Homology-Directed Genome Editing Using Oligonucleotide Donors	131
<i>Yinan Kan and Eric A. Hendrickson</i>	
8 Reporter Assays for BER Pathway	145
<i>Dorota Piekna-Przybylska</i>	
9 Methods for Studying DNA Single-Strand Break Repair and Signaling in <i>Xenopus laevis</i> Egg Extracts	161
<i>Yunfeng Lin, Anh Ha, and Shan Yan</i>	

10	Chromatin Immunoprecipitation (ChIP) of Plasmid-Bound Proteins in <i>Xenopus</i> Egg Extracts	173
	<i>Kelly B. Wolfe and David T. Long</i>	
11	Cellular Assays to Study the Functional Importance of Human DNA Repair Helicases	185
	<i>Sanket Awate, Srijita Dhar, Joshua A. Sommers, and Robert M. Brosh Jr.</i>	
12	A Mammalian Genetic Complementation Assay for Assessing Cellular Resistance to Genotoxic Compounds	209
	<i>Nicole M. Reilly and Douglas L. Pittman</i>	
13	Small-Molecule Inhibitor Screen for DNA Repair Proteins	217
	<i>John J. Turchi and Pamela S. VanderVere-Carozza</i>	
PART IV IN VITRO BIOCHEMICAL AND BIOPHYSICAL METHODS TO STUDY DNA REPAIR		
14	Assembling the Human Resectosome on DNA Curtains	225
	<i>Michael M. Soniat, Logan R. Myler, and Ilya J. Finkelstein</i>	
15	Thin-Layer Chromatography and Real-Time-Coupled Assays to Measure ATP Hydrolysis	245
	<i>Christopher W. Sausen, Cody M. Rogers, and Matthew L. Bochman</i>	
16	Gel-Based Assays for Measuring DNA Unwinding, Annealing, and Strand Exchange	255
	<i>Cody M. Rogers, Christopher W. Sausen, and Matthew L. Bochman</i>	
17	In Vitro Assay for Plasmid Length DNA Strand Exchange by Human DMC1	265
	<i>Steven D. Goodson, Russell B. Hawes, Sarah M. Waldvogel, and Michael G. Sehorn</i>	
18	In Vitro Assays for DNA Branch Migration	271
	<i>Andrew A. Kelso, Steven D. Goodson, and Michael G. Sehorn</i>	
19	Stabilization of the Human DMC1 Nucleoprotein Filament	285
	<i>Sarah M. Waldvogel, Steven D. Goodson, and Michael G. Sehorn</i>	
PART V METHODS TO ASSESS TELOMERIC AND REPLICATION-INDUCED DNA DAMAGE AND REPAIR		
20	Measuring UV Photoproduct Repair in Isolated Telomeres and Bulk Genomic DNA	295
	<i>Elise Fouquerel, Ryan P. Barnes, Hong Wang, and Patricia L. Opresko</i>	
21	Single-Molecule DNA Fiber Analyses to Characterize Replication Fork Dynamics in Living Cells	307
	<i>Srijita Dhar, Arindam Datta, Taraswi Banerjee, and Robert M. Brosh Jr.</i>	
22	Direct Visualization of DNA Replication at Telomeres Using DNA Fiber Combing Combined with Telomere FISH	319
	<i>Himabindu Gali, Emily Mason-Osann, and Rachel Litman Flynn</i>	

23	Telomere and G-Quadruplex Colocalization Analysis by Immunofluorescence Fluorescence In Situ Hybridization (IF-FISH)	327
	<i>Miaomiao Zhang, Rui Liu, and Feng Wang</i>	
24	FISHing for Damage on Metaphase Chromosomes	335
	<i>P. Logan Schuck and Jason A. Stewart</i>	
	<i>Index</i>	349
