

Contents

<i>Preface</i>	v
1. Importance of Microorganisms to the Everglades Ecosystem	1
<i>Andrew D. Gottlieb, James A. Entry, Andrew Ogram and Krish Jayachandran</i>	
Section I: Abiotic Factors that Influence Water and Soil Microorganisms	
2. Water Quality in the Everglades Protection Area	11
<i>James A. Entry and Andrew D. Gottlieb</i>	
3. Spatial Distribution of Soil Nutrients in the Everglades Protection Area	38
<i>Todd Z. Osborne, Susan Newman, K. Ramesh Reddy, L. Rex Ellis and Michael S. Ross</i>	
4. Mercury Mass Budget Estimates and Cycling in the Florida Everglades	68
<i>Guangliang Liu, Yong Cai, Georgio Tachiev and Leonel Lagos</i>	
5. Sea Level Rise in the Everglades: Plant-Soil-Microbial Feedbacks in Response to Changing Physical Conditions	89
<i>Lisa G. Chambers, Stephen E. Davis and Tiffany G. Troxler</i>	
Section II: Periphyton	
6. The Importance of Species-Based Microbial Assessment of Water Quality in Freshwater Everglades Wetlands	115
<i>Evelyn E. Gaiser, Andrew D. Gottlieb, Sylvia S. Lee and Joel C. Trexler</i>	
7. Changes in Hydrology, Nutrient Loading and Conductivity in the Florida Everglades, and Concurrent Effects on Periphyton Community Structure and Function	131
<i>Andrew D. Gottlieb, Evelyn E. Gaiser and Sylvia S. Lee</i>	

8. **The Role of Periphyton Mats in Consumer Community Structure and Function in Calcareous Wetlands: Lessons from the Everglades** 155
Joel C. Trexler, Evelyn E. Gaiser, John S. Kominoski and Jessica L. Sanchez
9. **Nitrogenase Activity in Everglades Periphyton: Patterns, Regulators and Use as an Indicator of System Change** 180
Patrick W. Inglett
10. **Structure and Function of Cyanobacterial Mats in Wetlands of Belize** 194
Jiří Komárek, Dagmara Sirová, Jaroslava Komárková and Eliška Rejmánková
11. **Biological Indicators of Changes in Water Quality and Habitats of the Coastal and Estuarine Areas of the Greater Everglades Ecosystem** 218
Anna H. Wachnicka and G. Lynn Wingard
12. **Epiphytic Diatoms along Phosphorus and Salinity Gradients in Florida Bay (Florida, USA), an Illustrated Guide and Annotated Checklist** 241
Thomas A. Frankovich and Anna Wachnicka
13. **Pigment-Based Chemotaxonomy and its Application to Everglades Periphyton** 289
J.W. Louda, C. Grant, J. Browne and S. Hagerthey
14. **Detecting Calcareous Periphyton Mats in the Greater Everglades Using Passive Remote Sensing Methods** 350
Daniel Gann, Jennifer Richards, Sylvia Lee and Evelyn Gaiser

Section III: Microbiology of the Everglades

15. **The Microbial Ecology of Mercury Methylation and Demethylation in the Florida Everglades** 375
Christopher Weidow and Andrew Ogram
16. **Methanogens within the Sawgrass Communities of the Everglades and Biscayne Bay Watersheds** 386
Priyanka Kushwaha, Jacqueline Zayas, Yanie Oliva, Maria Mendoza and DeEtta Mills
17. **Ecological Perspective on the Associations of Syntrophic Bacteria, Methanogens and Methanotrophs in the Florida Everglades WCA-2A Soils** 398
Ashvini Chauhan, Ashish Pathak and Andrew Ogram

18. Potential for Biological Control of Invasive Plants in the Everglades Ecosystem using Native Microorganisms	413
<i>Kateel G. Shetty and Krish Jayachandran</i>	
19. Algal Toxin Degradation by Indigenous Bacterial Communities in the Everglades Region	431
<i>Krish Jayachandran and Kateel G. Shetty</i>	
20. Closing Thoughts on the Role of Microbial Ecology in Management and Monitoring of the Greater Everglades Ecosystem	445
<i>Andrew Ogram, James A. Entry, Andrew Gottlieb, K. Ramesh Reddy and Krish Jayachandran</i>	
Index	469
Color Plate Section	471
