Preface

v

PART 1: An Overview on Fish Migration Research

- 1. History of Fish Migration Research** 3
Pedro Morais and Françoise Daverat
- 2. Definitions and Concepts Related to Fish Migration** 14
Pedro Morais and Françoise Daverat
- 3. Trends and Challenges in Fish Migration Research** 20
Pedro Morais and Françoise Daverat

PART 2: Life Histories of Migratory Fishes

- 4. Life Histories of Potamodromous Fishes** 29
Russell F. Thunrow
- 5. Life Histories of Anadromous Fishes** 55
Marie-Laure Acolas and Patrick Lambert
- 6. Life Histories of Catadromous Fishes** 78
Michael J. Miller
- 7. Life Histories of Amphidromous Fishes** 102
Gerard P. Closs and Manna Warburton
- 8. Life Histories of Oceanodromous Fishes** 123
Ana Couto, Miguel Baptista, Miguel Furtado, Lara L. Sousa and Nuno Queiroz

PART 3: Technical Apparatus, Analytical Techniques and Data Analyses Used in Fish Migration Research

- 9. Microchemical and Schlerochronological Analyses Used to Infer Fish Migration** 149
Françoise Daverat and Jean Martin

10. Tracing the Origins, Migrations, and Other Movements of Fishes Using Stable Isotopes	169
<i>Joel C. Hoffman</i>	
11. Use of Drift Nets to Infer Fish Transport and Migration Strategies in Inland Aquatic Ecosystems	197
<i>Michal Janáč and Martin Reichard</i>	
12. Methodologies for Investigating Diadromous Fish Movements: Conventional, PIT, Acoustic and Radio Tagging and Tracking	214
<i>Marie-Laure Bégout, Frédérique Bau, Anthony Acou and Marie-Laure Acolas</i>	
13. Methodologies for Investigating Oceanodromous Fish Movements: Archival and Pop-up Satellite Archival Tags	251
<i>Kurt M. Schaefer and Daniel W. Fuller</i>	
General Index	291
Species Index	305
