
Contents

Series Preface.....	vii
Preface.....	ix
Editors.....	xi
Contributors.....	xiii

Chapter 1	Immunofluorescence: Applications for Analysis of Connexin Distribution and Trafficking.....	1
	<i>Sandra A. Murray and T. I. Shakespeare</i>	
Chapter 2	Imaging Gap Junctions in Living Cells.....	21
	<i>Matthias M. Falk, Charles G. Fisher, Rachael M. Kells Andrews, and Tia J. Kowal</i>	
Chapter 3	FRAP for the Study of Gap Junction Nexus Macromolecular Organization.....	63
	<i>Randy F. Stout, Jr. and David C. Spray</i>	
Chapter 4	Patch Clamp Analysis of Gap Junction Channel Properties.....	93
	<i>Donglin Bai and John A. Cameron</i>	
Chapter 5	What Do You Need to Measure Gap Junctional Permselectivity?	115
	<i>José F. Ek Vitorín</i>	
Chapter 6	Recording Gap Junction-Mediated Synaptic Transmission in Vivo at Mixed Synapses on the Goldfish Mauthner Cells	151
	<i>Roger Cachope, Sebastian Curti, and Alberto E. Pereda</i>	
Chapter 7	Assessing Connexin Hemichannel Function during Ischemic Injury and Reperfusion	169
	<i>Yeri Kim and Colin R. Green</i>	

Chapter 8	Whole-Cell Patch Clamp Recordings of Unitary Connexin 43 Hemichannel Currents	189
	<i>Nan Wang, Alessio Lissoni, Maarten De Smet, Karin R. Sipido, and Luc Leybaert</i>	
Chapter 9	Functional Characterization of Connexin Hemichannels Using <i>Xenopus</i> Oocytes and the Two-Electrode Voltage Clamp Technique	203
	<i>Juan Manuel Valdez Capuccino and Jorge E. Contreras</i>	
Chapter 10	Functional Assays of Purified Connexin Hemichannels.....	215
	<i>Mohamed Kreir and Guillermo A. Altenberg</i>	
Chapter 11	Methods to Determine Formation of Heteromeric Hemichannels.....	239
	<i>Agustín D. Martínez, Oscar Jara, Ricardo Ceriani, Jaime Maripillán, Paula Mujica, and Isaac E. García</i>	
Chapter 12	Methods to Examine the Role of Gap Junction and Pannexin Channels in HIV Infection.....	253
	<i>Courtney A. Veilleux and Eliseo A. Eugenín</i>	
Index.....		275
