

Contents

<i>Preface</i>	v
1. Rapid, Automated and Online Detection of Indicator Bacteria in Water	1
<i>Trude Møvig, Henrik Braathen and Helene Stenersen</i>	
2. Automated Near-real-time Monitoring of Enzymatic Activities in Water Resources	23
<i>P. Stadler, G. Ryzinska-Paier, T. Lendenfeld, W. Vogl, A.P. Blaschke, P. Strauss, H. Stadler, M. Lackner, M. Zessner and A.H. Farnleitner</i>	
3. Advances in Electrochemically Active Bacteria: Physiology and Ecology	42
<i>A.C. Marques, L. Santos, J.M. Dantas, A. Gonçalves, S. Casaleiro, R. Martins, C.A. Salgueiro and E. Fortunato</i>	
4. Application of Quantitative Real-time PCR for Microbial Community Analysis in Environmental Research	77
<i>Sevcan Aydin</i>	
5. In Vitro Diagnostics for Early Detection of Bacterial Wound Infection	87
<i>Gregor Tegl, Andrea Heinze, Eva Sigl and Georg M. Guebitz</i>	
6. Biofilm Impedance Monitoring	102
<i>Jacobo Paredes, Imanol Tubía and Sergio Arana</i>	
7. Rapid Microbial Water Quality Measurement by Automated Determination of the Fecal Indicator Bacterium <i>Escherichia coli</i>: A Review	137
<i>Maximilian Lackner</i>	
8. Real-time Monitoring of Microorganisms in Potable Water Using Online Sensors	161
<i>Samendra P. Sherchan</i>	

Glossary

171

Maximilian Lackner, Philipp Stadler, Ida Maylen Øverleir, Jacobo Paredes, Imanol Tubía, Sergio Arana, Gregor Tegl, Ana Carolina Cardoso Marques and Sevcen Aydin
