To the Reader.....	ix
Editor.....	xi
Contributors.....	xiii
1 Dosimetry in Bioelectromagnetics	1
<i>Marko Markov</i>	
2 Uncertainty Sources Associated with Low-Frequency Electric and Magnetic Field Experiments on Cell Cultures	25
<i>Lucas A. Portelli</i>	
3 Potential Causes for Nonreplication of EMF BioEffect Results, and What to Do About It	69
<i>Carl F. Blackman</i>	
4 Physical Dynamics: The Base for the Development of Biophysical Treatments	87
<i>Ruggero Cadossi, Stefania Setti, Matteo Cadossi, and Leo Massari</i>	
5 Dose and Exposure in Bioelectromagnetics.....	101
<i>Kjell Hansson Mild and Mats-Olof Mattsson</i>	
6 Physical Aspects of Radiofrequency Radiation Dosimetry	119
<i>Marko S. Andjelković and Goran S. Ristić</i>	
7 Necessary Characteristics of Quality Bioelectromagnetic Experimental Research	139
<i>Ben Greenebaum</i>	
8 External Electric and Magnetic Fields as a Signaling Mechanism for Biological Systems	157
<i>Frank S. Barnes</i>	

9	Duration of Exposure and Dose in Assessing Nonthermal Biological Effects of Microwaves	171
	<i>Igor Belyaev</i>	
10	Practical Principles of Dosimetry in Studying Biological Effects of Extremely High-Frequency Electromagnetic Fields	185
	<i>Andrew B. Gapeyev</i>	
11	Experimental Approaches for Local Heating and Absorption Measurements	207
	<i>Andrei G. Pakhomov</i>	
12	Dosimetry in Electroporation-Based Technologies and Treatments	233
	<i>Eva Pirc, Matej Reberšek, and Damijan Miklavčič</i>	
13	Quantifying in Bioelectromagnetics	269
	<i>Paweł Bienkowski and Hubert Trzaska</i>	
14	Blood and Vascular Targets for Magnetic Field Dosing	285
	<i>Harvey N. Mayrovitz</i>	
15	Methodology of Standards Development for EMF RF in Russia and by International Commissions: Distinctions in Approaches	315
	<i>Yury G. Grigoriev</i>	
16	The Intracellular Signaling System Controlling Cell Hydration as a Biomarker for EMF Dosimetry	339
	<i>Sinerik Ayrapetyan</i>	
17	Clinical Dosimetry of Extremely Low-Frequency Pulsed Electromagnetic Fields	369
	<i>William Pawluk</i>	
18	Enhancement of Nerve Regeneration by Selected Electromagnetic Signals	383
	<i>Betty F. Siskin</i>	
19	The Conundrum of Dosimetry: Its Applications to Pharmacology and Biophysics Are Distinct	399
	<i>Wayne Miller</i>	
	Index	419
