

Table of Contents

Preface	vii
Chapter 1 Equilibrium in the Population of the Plants	1
Chapter 2 Waves in Biological Populations	19
Chapter 3 Plankton Models and Its Attractors in a Local Approximation	59
Chapter 4 Spatial Dissipative Structures in Excitable Media (Plankton, Soil Bacteria. . .).....	91
Chapter 5 Dimension of Molecules of Compounds of Biogenic Elements.....	127
Chapter 6 Functional Dimensions of Biomolecules	154
Chapter 7 Three-Dimensional Models of a Five-Carbon Sugar Molecule and Nucleic Acids	178
Chapter 8 The Geometry of the Structure of Nucleic Acids With Regard to the Higher Dimension of the Components.....	203
Related Readings	219
Index	231
