

CONTENTS

Preface		vii
Chapter 1	The Significance of E3 Ubiquitin Ligases in Cell Cycle and Genome Stability (DNA Replication and DNA Damage) <i>Ota Fuchs</i>	1
Chapter 2	E3 Ubiquitin Ligases Involved in Pathogenesis and Treatment of Del(5q) Myelodysplastic Syndrome and Other Hematologic Malignancies <i>Ota Fuchs</i>	33
Chapter 3	Targeting of Neddylation of Cullin-RING E3 Ubiquitin Ligases with an NEDD8-Activating Enzyme Inhibitor Pevonedistat (MLN4924) in Hematologic Malignancies <i>Ota Fuchs</i>	63
Chapter 4	Ring Finger E3 Ubiquitin Ligase CBL Protein and Its Functional Roles and Mutations in Myeloid Malignancies <i>Ota Fuchs</i>	87
Chapter 5	E3 Ubiquitin Ligases Mdm2 and MdmX Regulate the Stability, Translation, Subcellular Localization and TranscriptionAL Activity of p53 Protein <i>Ota Fuchs</i>	109

Chapter 6	Roles of E3 Ubiquitin Ligases with a Tripartite Motif (TRIM) in Innate Immune Regulation	131
	<i>Ota Fuchs</i>	
Chapter 7	Paving the Notch Pathway with Ubiquitin Ligases	147
	<i>Neta Erez and Amir Orian</i>	
Index		191
