

CONTENTS

Preface		vii
Chapter 1	Applications of Micropropagation in Plant Biotechnology	1
	<i>André Luís Lopes da Silva, Paula Kielse, Micheli Angelica Horbach, Gilvano Ebling Brondani, Juline Marta Walter, Leandro Freire dos Santos, Peyman Habibi and Jairton Fraga Araújo</i>	
Chapter 2	Micropropagation Strategy Focused on the Conservation of Genetic Resources: Aspects of Some Species from the Brazilian Atlantic Rainforest	25
	<i>Lia Rejane Silveira Reiniger, Aline Ritter Curti, Charlene Moro Stefanel, Diego Pascoal Golle, Karol Buuron da Silva, Silvia Machado Rabaiolli and Tatiane Laís Pires Andreolla</i>	

Chapter 3	When Micro Becomes Nano: Using Nanoparticles in Micropropagation <i>Paulo Roberto Diniz da Silva, Fernanda Illamas Gallon, Marina Junges, Denise Czarnescki da Silva and Suelen Martinez Guterres</i>	53
Chapter 4	Temporary Immersion Bioreactors: Cultivation of Sweet Potato from Meristems <i>Diego Pascoal Golle, Jana Koefender, Juliane Nicolodi Camera, Cristiane Kaiper and Roberta Cattaneo Horn</i>	71
Chapter 5	Microscopic Evaluation of Stomatal Complex in <i>In Vitro</i> Propagated Plants <i>Paulo Roberto Diniz da Silva, Ferdinando Bisogno de Castro, Tatiana Silveira de Moura, Denise Czarnescki da Silva, João Rafael Goulart da Silva and Larissa Farias Leite</i>	85
Chapter 6	Tissue Cultures in Apples and Their Implications in Genetic Breeding: A Review <i>Adriana Cibeles de Mesquita Dantas and Valdir Marcos Stefenon</i>	97
Chapter 7	Molecular Markers for Analysis of Genetic Stability in Tissue Culture of Forest Species <i>Diego Pascoal Golle, Lia Rejane Silveira Reiniger, Jana Koefender and Roberta Cattaneo Horn</i>	159
