Preface xiii

Introduction Darwin and Microbiology 1

Roberto Kolter and Stanley Maloy

Chapter 1 Evolution in Action: A 50,000-Generation Salute to Charles Darwin 9

Richard E. Lenski

Chapter 2 Minimal Genomes and Reducible Complexity 17

Andrés Moya

Chapter 3 Lady Lumps's Mouthguard 25

Jessica Green

Chapter 4 Trying To Make Sense of the Microbial Census 31

Mitchell L. Sogin

Chapter 5 The View from Below 37

Margaret Riley and Robert Dorit

Chapter 6 Running Wild with Antibiotics 43

Roberto Kolter

Chapter 7 Antibiotic Resistance 49

Diarmaid Hughes

Chapter 8 Bacteria Battling for Survival 59

Thomas M. Schmidt

Chapter 9	Phage: An Important Evolutionary Force Darwin Never Knew 65 <i>Forest Rohwer</i>
Chapter 10	The Struggle for Existence: Mutualism 71 <i>Paul E. Turner</i>
Chapter 11	The Secret Social Lives of Microorganisms 77 <i>Kevin R. Foster</i>
Chapter 12	Microbes and Microevolution 85 <i>Evgeni Sokurenko</i>
Chapter 13	Unnecessary Baggage 93 <i>Stanley Maloy and Guido Mora</i>
Chapter 14	Bacterial Adaptation: Built-In Responses and Random Variations 99 <i>Josep Casadesús</i>
Chapter 15	The Impact of Differential Regulation on Bacterial Speciation 109 <i>Eduardo A. Groisman</i>
Chapter 16	An Accidental Evolutionary Biologist: GASP, Long-Term Survival, and Evolution 115 <i>Steven E. Finkel</i>
Chapter 17	How Bacteria Revealed Darwin's Mistake (and Got Me To Read On the Origin of Species) 123 <i>John R. Roth</i>
Chapter 18	The Role of Conjugation in the Evolution of Bacteria 133 <i>Fernando de la Cruz</i>
Chapter 19	Do Bacteria Have Sex? 139 <i>Rosemary J. Redfield</i>
Chapter 20	Better than Sex 145 <i>Harald Brüssow</i>

- Chapter 21** **Darwin in My Lab: Mutation, Recombination, and Speciation** 151
Miroslav Radman
- Chapter 22** **Sexual Difficulties** 159
Howard Ochman
- Chapter 23** **Unveiling *Prochlorococcus*: The Life and Times of the Ocean's Smallest Photosynthetic Cell** 165
Sallie W. Chisholm
- Chapter 24** **Deciphering the Language of Diplomacy: Give and Take in the Study of the Squid-*Vibrio* Symbiosis** 173
Margaret McFall-Ngai and Ned Ruby
- Chapter 25** **The Tangled Banks of Ants and Microbes** 181
Cameron R. Currie
- Chapter 26** **Microbial Symbiosis and Evolution** 191
Nancy A. Moran
- Chapter 27** **Coevolution of *Helicobacter pylori* and Humans** 197
Martin J. Blaser
- Chapter 28** **The Library of Maynard-Smith: My Search for Meaning in the Protein Universe** 203
Frances H. Arnold
- Chapter 29** **In Pursuit of Billion-Year-Old Rosetta Stones** 209
Dianne K. Newman
- Chapter 30** **The Deep History of Life** 217
Andrew H. Knoll
- Chapter 31** **A Glimpse into Microevolution in Nature: Adaptation and Speciation of *Bacillus simplex* from "Evolution Canyon"** 225
Johannes Sikorski

Chapter 32	On the Origin of Bacterial Pathogenic Species by Means of Natural Selection: A Tale of Coevolution	233
	<i>Philippe J. Sansonetti</i>	
Chapter 33	The Evolution of Diversity and the Emergence of Rules Governing Phenotypic Evolution	241
	<i>Paul B. Rainey</i>	
Chapter 34	The Christmas Fungus on Christmas Island	251
	<i>Anne Pringle</i>	
Chapter 35	A New Age of Naturalists	255
	<i>Rachel A. Whitaker</i>	
Chapter 36	The Ship That Led to Shape	263
	<i>Kevin D. Young</i>	
Chapter 37	Postphylogenetics	269
	<i>W. Ford Doolittle</i>	
Chapter 38	Irreducible Complexity? Not!	275
	<i>David F. Blair and Kelly T. Hughes</i>	
Chapter 39	Many Challenges to Classifying Microbial Species	281
	<i>Stephen Giovannoni</i>	
Index		287
