

ISSUE

The Year in Evolutionary Biology

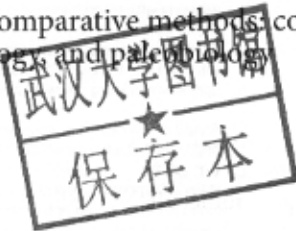

ISSUE EDITORS

Timothy A. Mousseau^a and Charles W. Fox^b

^aUniversity of South Carolina and ^bUniversity of Kentucky

TABLE OF CONTENTS

- 1 Specific-gene studies of evolutionary mechanisms in an age of genome-wide surveying
Ward B. Watt
- 18 Nine-spined stickleback (*Pungitius pungitius*): an emerging model for evolutionary biology research
Juha Merilä
- 36 Gene loss, thermogenesis, and the origin of birds
Stuart A. Newman, Nadezhda V. Mezentseva, and Alexander V. Badyaev
- 48 The evolutionary consequences of interspecific aggression
Gregory F. Grether, Christopher N. Anderson, Jonathan P. Drury, Alexander N. G. Kirschel, Neil Losin, Kenichi Okamoto, and Kathryn S. Peiman
- 69 Biodiversity and evolutionary history: useful extensions of the PD phylogenetic diversity assessment framework
Daniel P. Faith
- 90 An integrative view of phylogenetic comparative methods: connections to population genetics, community ecology, and paleobiology
Matthew W. Pennell and Luke J. Harmon

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the authors and issue editors of *Annals of the New York Academy of Sciences* are their own and not necessarily those of the Academy unless specifically stated. The Academy has no intent to influence legislation by providing such forums.
