Preface

ix

Structural Genomics and *in silico* Analysis

1. Physical Structure of the Plant Nuclear Genome 3
M. Delseny, M. Echeverria, E. Lasserre
2. The Sequencing of Plant Nuclear Genomes 23
*N. Chaisne, S. Samain, N. Demange, G. Orjeda, L. Michelet,
E. Pelletier, M. Salanoubat, J. Weissenbach, F. Quetier*
3. Introduction to Bioinformatics 53
H. Chiapello, F. Rodolphe
4. Databases in Biology 57
H. Chiapello
5. Gene Prediction 71
P. Nicolas, H. Chiapello
6. Detecting Protein Function from Genome Sequences 87
J.F. Gibrat, A. Marin
7. Large-scale Protein Sequence Comparisons 107
J.L. Risler, S. Pasek, P. Brézellec, A. Louis

Functional Genomics: From Sequence to Function in Plants

8. Gene Transfer to Plants 123
Y. Chapeau, M.R. Davey

9. Mutant Libraries: A High-throughput <i>Arabidopsis</i> Reverse Genetics System F. Granier, D. Bouchez	143
10. DNA Microarrays in Plants P. Dumas, Y. Al-Ghazi, C. Rothan, S. Robin	165
11. Statistical Design and the Analysis of Gene Expression Determined by Independent Component Analysis A. Riva, A.S. Carpentier, B. Torr�sani, A. H�naut	191
12. Proteomics M. Zivy, J. Joyard, M. Rossignol	217
13. Tracking Gene Expression in Plant Cells: Microscopy and Associated Bio-imaging Techniques S. Brown, S. Bolte, B. Satiat-Jeunem�tre	245
14. Tracking Gene Expression in Plant Cells: New Probes for Functional Genomics S. Bolte, Y. Boutt�, S. Kluge, S. Brown, B. Satiat-Jeunem�tre	277
15. Metabolomics A. Krapp, J.F. Morot-Gaudry, S. Boutet, G. Bergot, C. Lelarge, J.L. Prioul, G. Noctor	311
16. Metabolic Fingerprinting and Profiling by Proton NMR A. Moing, C. Deborde, D. Rolin	335
17. Methods for the Qualitative and Quantitative Analysis of Metabolic Fluxes M. Dieuaide-Noubhani, A.P. Alonso, C. Roby, P. Raymond	345
18. The Structure of Metabolic Networks or (Almost) All that is Known about the Simplest Metabolic Network Jean-Pierre Mazat	367

Plant Models in Genomics

19. The Model Species, <i>Arabidopsis thaliana</i> X. Johnson, D. Bouchez	385
20. Rice: A Model Plant for Cereal Genomics M. Delseny	397
21. The Model <i>Medicago truncatula</i> : from Plant-Microbe Symbioses to Crop Legume Breeding Boosted by Cross-Legume Genomics E.P. Journet, P. Gamas	413

22. Tomato: A Model Plant for Solanaceae Genomics	443
<i>R. Stevens, M. Bouzayen, M. Causse, C. Etienne, C. Rothan</i>	
23. Genomics as a Road for Grapevine Improvement	463
<i>A.F. Adam-Blondon, C. Romieu, A. Bouquet</i>	
24. Sugarcane: A Tropical Crop with a Highly Complex Genome	481
<i>J.Y. Hoarau, G. Souza, A. D' Hont, M. Menossi, L. Rossini Pinto, A. Pereira de Souza, L. Grivet, C.F. Martins Menck, E. Cesar Ulian, M. Vincentz</i>	

Genomics, Genetic Variability and Plant Breeding

25. Molecular Markers and High-throughput Genotype Analysis	503
<i>M. Falque, S. Santoni</i>	
26. Transposable Elements and the Analysis of Plant Biodiversity	529
<i>S.M. Tam, C. Mhiri, M.-A. Grandbastien</i>	
27. Analysis of Complex Characters into Elementary Components through the Use of Molecular Quantitative Genetics in <i>Arabidopsis thaliana</i>	559
<i>O. Loudet, F. Daniel-Vedele</i>	
28. Characterization of Major Genes and QTLs by a Candidate Gene Approach	571
<i>R. Stevens, S. Mufios, M. Causse, A. Bendahmane, V. Lefebvre</i>	
29. Molecular Evolution and Validation of Candidate Gene	595
<i>D. Manicacci, J.B. Veyrieras, A. Charcosset</i>	
30. Genomics and Plant Breeding: Maize and Wheat	615
<i>B. Hirel, J. Le Gouis, M. Bernard, P. Perez, M. Falque, F. Quetier, J. Joets, P. Montalent, P. Rogowsky, A. Murigneux, A. Charcosset</i>	

Genomics and Technology

31. From Genomics to Self-assembly	637
<i>V. Planchot, S.G. Ring, A.J. MacDougall, M. Axelos, Y. Popineau, P. Colonna</i>	
32. Metabolic Fingerprinting and Profiling by MID-FT-IR (Middle-Fourier Transformed-InfraRed)	663
<i>G. Mouille and J.N. Johansen</i>	
Glossary	669
<i>C. Meyer, J.F. Morot-Gaudry</i>	
List of Contributors	683
Index	690
