

CONTENTS

Preface	vii
Chapter 1 Microarray Image Analysis and Spot Segmentation <i>Alan Wee-Chung Liew, Hong Yan and Mengsu Yang</i>	1
Chapter 2 Gene Microarray Cross Platform Study: Normalization, Comparison and Meta-analysis <i>Xiaobo Zhou, Kuang-Yu Liu and Stephen T.C. Wong</i>	39
Chapter 3 A General FDR-Based Computational Framework for Sample Size Planning in Microarray Studies <i>Danh V. Nguyen, Hao Liu and Damla Sentürk</i>	55
Chapter 4 Biological Sequence Analysis by Vector-Valued Functions: Revisiting Alignment-Free Methodologies for DNA and Protein Classification <i>Susana Vinga</i>	71
Chapter 5 Segmentation of Genomic DNA Sequences <i>Rajeev K. Azad, Jeffrey G. Lawrence, Vivek Thakur and Ram Ramaswamy</i>	107
Chapter 6 A Method for Constructing Large DNA Codesets <i>Vinhthuy Phan</i>	127
Chapter 7 Modeling Methods for Cell Phase Classification <i>Dat T. Tran, Tuan D. Pham, Xiaobo Zhou and Stephen T.C. Wong</i>	143
Chapter 8 A Hybrid Approach Based on Genetic Algorithms in Conjunction with Statistical Methods for the Diagnosis of Breast Cancer <i>Brijesh Verma, Ping Zhang and Kuldeep Kumar</i>	167
Chapter 9 Webprot: Online Mining and Annotation of Biomedical Literature Using Google <i>Rune Sætre, Martin T. Ranang, Tonje S. Steigedal, Astrid Kamilla Stunes, Kristine Misund, Liv Thommesen and Astrid Lægreid</i>	189
Index	207
