

Contents

Preface.....	ix
--------------	----

I Nutrition and Biomolecules

1 Nutrition and Digestion	1
2 Carbohydrate Structure and Chemistry.....	23
3 Lipid Structure and Chemistry	30
4 Amino Acids and Proteins	38
5 Biochemical Reactions and Enzymes	51
Questions and Answers: Nutrition and Biomolecules.....	66

II Membranes, Transport, and Signaling

6 Membranes and Transport.....	89
7 Cell Signaling	96
Questions and Answers: Membranes, Transport, and Signaling.....	106

III Cellular Respiration

8 Principles of Cellular Respiration.....	112
9 Glycolysis and the Fate of Pyruvate	116
10 Tricarboxylic Acid Cycle.....	127
11 Oxidative Phosphorylation and Mitochondria	136
Questions and Answers: Cellular Respiration	149

IV Metabolism

12 Carbohydrate Metabolism	166
13 Fatty Acid Metabolism	202
14 Cholesterol and Steroid Metabolism	230
15 Protein and Amino Acid Metabolism.....	253
16 Nucleotide and Heme Metabolism	274
Questions and Answers: Metabolism	294

V Genetics and Cell Cycle

17 DNA Replication and Repair	316
18 Transcription	335
19 Translation and Posttranslational Modifications	350
20 Cell Cycle, Apoptosis, and Cancer	366
21 Molecular Biotechniques.....	380
Questions and Answers: Genetics and Cell Cycle	400

Appendix: Normal Laboratory and Physical Exam Values.....	414
---	-----

Index	417
