Foreward by Lord May	v
Foreward by Jordi Bascompte, Ph.D.	vii
Abstract	xi
Preface	x
Acknowledgments	xiii
Chapter 1 The Beginning	1
1.1 Introduction	1
1.2 Menu	2
Chapter 2 Characterizing the Niche	7
2.1 A Problem of Incompatible Dimensions	7
2.2 Handling the Dimensionality Problem	8
2.2.1 The Consumer Overlap Graph	9
2.2.2 The Resource Graph: A Tinker Toy Model	12
2.2.3 Species as Convex Polyhedra	14
2.3 Trophic Equivalence	17
Summary	18
Chapter 3 Holes in Niche Space	21
3.1 The Mathematical Structure of Holes	24
3.1.1 Standard Homology for $K_c(R; \lambda^{-1})$	24
3.1.2 Computing $\beta_j(K)$ from $G_c(R; \lambda^{-1})$	30
3.2 Homology of Real Food Webs	33
3.2.1 Results	33
3.2.2 Statistical Significance of Results	38
3.2.3 Interpretation of Results	41
3.3 Robustness: Do Holes Appear Across Variable Thresholds?	46
3.3.1 Cody's Community Matrices	47
3.3.2 Quasiconvexity in the Niche	52
Summary	54
Chapter 4 Intervals: Tip of an Iceberg	57
4.1 Necessary and Sufficient Conditions for Intervals	58
4.2 Rigid Circuits: A Robust Property of Real Communities	61
4.3 Holes, Rigidity, and Intervals	64

4.4 Assembly Rules Implied by the Rigid Circuit	
Property in $G_r(C; \lambda)$	70
4.5 Assembly and Holes in $K_c(R; \lambda^{-1})$	75
4.6 Assembly and Intervals	76
Summary	77
Chapter 5 Hierarchical Organization in the Niche	79
5.1 Structural Hierarchy	80
5.1.1 Trees: A Characterization of Rigid Circuit Graphs	80
5.2 Hierarchy in Real Communities	83
5.3 Functional Hierarchy	87
5.3.1 Compatibility Between Structural and Functional Portraits	88
Summary	91
Chapter 6 Dynamic Linkages and Topological Patterns	93
6.1 Triangulation and Stability: A Simple Example	95
6.2 Triangulation and Stability: Dynamic Selection	98
6.3 Hierarchy and Stability	104
6.3.1 Structural Hierarchy	104
6.3.2 Functional Hierarchy	107
Summary	108
Chapter 7 Hierarchies of Abundance	109
7.1 The Niche Hierarchy Model	110
7.2 Supporting Evidence for Niche Hierarchy	115
7.2.1 The Geometric Series and Broken Stick Patterns as Special Cases	115
7.2.2 A Deductive Approach	115
7.2.3 A Direct Approach	119
7.2.4 Implications of a Correspondence Between Organization and Abundance	121
7.3 Related Results	124
7.3.1 Moments of Species Abundance Distributions	124
7.3.2 Abundance Patterns Implied by Dynamic Models	125
Summary	126
Appendix A	127
Appendix B	129
Appendix C	173
Appendix D	183
References	189
