

Contents in Brief

CHAPTER 1

The Science of Plant Systematics 1

CHAPTER 2

Methods and Principles of Biological Systematics 13

CHAPTER 3

Classification and System in Flowering Plants: Historical Background 49

CHAPTER 4

Taxonomic Evidence: Structural and Biochemical Characters 65

CHAPTER 5

The Evolution of Plant Diversity 119

CHAPTER 6

An Overview of Green Plant Phylogeny 157

CHAPTER 7

Lycophytes, Ferns, and Gymnosperms 193

CHAPTER 8

Phylogenetic Relationships of Angiosperms 237

APPENDIX ONE

Botanical Nomenclature 589

APPENDIX TWO

Specimen Preparation and Identification 601

Contents

CHAPTER 1 The Science of Plant Systematics 1

What Do We Mean by *Plant*? 1

What Do We Mean by *Systematics*? 2

The Phylogenetic Approach 3

How Do We Reconstruct Phylogeny? 3

What Is Monophyly? 5

The Practice of Plant Systematics 6

Why Is Systematics Important? 7

Aims and Organization of This Book 11

Literature Cited & Suggested Readings 12

CHAPTER 2 Methods and Principles of Biological Systematics 13

**Discovering Phylogeny: How Phylogenetic
Trees Are Constructed 13**

Evolutionary Trees and What They Depict:
Reading the Tree 13

Sources of DNA Sequence Data 15

Gene-by-Gene Approaches 16

Genomic Approaches 17

Sequence Alignment 17

Rooting 20

Homoplasy 21

Tree Building: Clustering Algorithms and
Neighbor Joining 23

Models of Evolution 24

Should You Believe the Tree: Bootstrapping
and Comparison of Trees 26

Methods That Use an Optimality Criterion 27

Comparing Trees from Different Methods
and Sources of Data 34

Using Phylogenetic Trees 37

Constructing a Classification 37

Describing Evolution: Mapping Characters
onto Trees 41

Assigning Dates to Nodes in Phylogenies 45

Literature Cited & Suggested Readings 46

CHAPTER 3 Classification and System in Flowering Plants: Historical Background 49

Classification, Nature, and Stability 50

Botany, Classification, and Biology 51

Understanding Relationships 52

Classifications and Memory 55

The Formation of Higher Taxa 55

Plant Groupings over the Years 60

Literature Cited & Suggested Readings 62

CHAPTER 4

Taxonomic Evidence: Structural and Biochemical Characters 65

Morphology 65

Duration and Habit 66

Roots 66

Stems 67

Buds 68

Leaves 68

Floral Morphology 73

Pollination Biology 79

Pollination Syndromes 80

Coevolution between Plant and Pollinator 82

Deception and Nonnutritive Rewards in
Orchid Pollination 82

Avoiding Self-Pollination 84

Inflorescences, Fruits, and Seeds 85

Fruit Types 87

Seeds 91

Fruit and Seed Dispersal 91

Anatomy 94

Secondary Xylem and Phloem 94

Nodal Anatomy 95

Leaf Anatomy 96

Secretory Structures 97

Crystals 97

Arrangement of Xylem and Phloem in the Stem 98

Floral Anatomy and Development 99

Embryology 100

Ovules and Megagametophytes 101

Embryo and Endosperm 101

Agamospermy 102

Chromosomes 103

Chromosome Number 103

Chromosome Structure 104

Methods of Chromosome Study 105

Palynology 108

Development of the Anther 108

Pollen Structure, Viability, and
Methods of Study 108

Secondary Metabolites 110

Alkaloids 110

Betalains and Anthocyanins 111

Glucosinolates 111

Cyanogenic Glycosides 111

Polyacetylenes 111

Terpenoids 112

Flavonoids 113

Proteins 113

Literature Cited & Suggested Readings 114

CHAPTER 5

The Evolution of Plant Diversity 119

Plant Diversity Is the Result of Evolution 120

Variation in Plant Populations and Species 124

Sources of Variation 124

Local and Geographic Patterns of Variation 125

Speciation 126

Reproductive Isolation of Species 128

Origins of Reproductive Isolating Barriers 134

Hybridization and Introgression 134

Polyploidy 141

Plant Breeding Systems 144

Species Concepts 146

Plant Species Challenges 149

Summary 151

Literature Cited & Suggested Readings 152

CHAPTER 6

An Overview of Green Plant Phylogeny 157

Endosymbiotic Events 159

"Algae" 159

Viridophytes (Green Plants) 160

Chlorophytes 161

Streptophytes 162

Embryophytes (Land Plants) 164

Liverworts 164

Mosses 165

Hornworts 165

Phylogenetic Relationships within

Embryophytes 165

Transition to Land 165

Tracheophytes (Vascular Plants) 167

Lycophytes 169

Euphyllophytes 169

Spermatophytes (Seed Plants) 173

Major Characteristics of Spermatophytes 173

Early Evolution of Spermatophytes 175

Extant Lineages of Spermatophytes 176

Angiosperms (Flowering Plants) 180

Flowers and the Angiosperm Life Cycle 180

Time of Origin of Angiosperms 180

Relationships of Angiosperms to Other Groups 181

Relationships within Angiosperms 184

Angiosperm Pollination, Dispersal, and
Diversification 186

Summary 187

Literature Cited & Suggested Readings 188

CHAPTER 7

Lycophytes, Ferns, and Gymnosperms 193

LYCOPHYTES 195

Lycopodiales 195

Lycopodiaceae 195 ■ *Selaginellaceae* 197

MONILOPHYTES (FERNS) 198

Equisetales 200

Equisetaceae 200

Psilotales 201

Psilotaceae 201

Ophioglossales 202

Ophioglossaceae 202

LEPTOSPORANGIATE FERNS 202

Osmundales 205

Osmundaceae 205

Salviniales 206

Marsileaceae 206

Cyatheales 207

Cyatheaceae 207

Polypodiales 208

Dennstaedtiaceae 208 ■ *Pteridaceae* 209

Eupolypods I 210

Dryopteridaceae 210 ■ *Polypodiaceae* 210

Eupolypods II 211

Cystopteridaceae 211 ■ *Aspleniaceae* 212

Thelypteridaceae 213 ■ *Woodsiaceae* 213

Athyriaceae 214 ■ *Blechnaceae* 215

Onocleaceae 215

GYMNOSPERMS 216

Cycadales (Cycads) 217

Cycadaceae 217 ■ *Zamiaceae* 218

Ginkgoales 220

Ginkgoaceae 220

Coniferales (Conifers) 222

Pinaceae 223 ■ *Cupressaceae* 225

Podocarpaceae 228 ■ *Araucariaceae* 228

Taxaceae 229

Gnetales 230

Ephedraceae 231

Literature Cited & Suggested Readings 232

CHAPTER 8

Phylogenetic Relationships of Angiosperms 237

ANA GRADE (Amborellales, Nymphaeales,

Austrobaileyales) 244

Amborellales 244

Amborellaceae 244

Nymphaeales 245

Nymphaeaceae 246 ■ Cabombaceae 248

Austrobaileyales 248

Schisandraceae 248

Mesangiospermae (including Magnoliids, Monocots, Eudicots) 250

Magnoliid Clade (Magnoliidae) 250

Magnoliales 250

Magnoliaceae 250 ■ Annonaceae 253 ■

Myristicaceae 255

Laurales 255

Lauraceae 255

Canellales 257

Winteraceae 257

Piperales 258

Piperaceae 259 ■ Aristolochiaceae 261

A Clade of Uncertain Position 262

Ceratophyllales 262

Ceratophyllaceae 262

MONOCOTS (Monocotyledoneae) 263

Alismatales 263

Araceae 263 ■ Alismataceae 266 ■

Hydrocharitaceae 268 ■ Potamogetonaceae 269

Liliales 269

Liliaceae 271 ■ Colchicaceae 272 ■

Smilacaceae 273 ■ Melanthiaceae 274

Asparagales 276

Asparagaceae 280 ■ Ruscaceae 280 ■

Agavaceae 282 ■ Hyacinthaceae 283 ■

Alliaceae 284 ■ Amaryllidaceae 285 ■

Asphodelaceae 286 ■ Iridaceae 287 ■

Hypoxidaceae 287 ■ Orchidaceae 288

Dioscoreales 291

Dioscoreaceae 291

Commelinoid Monocots (Commelinidae) 293

Arecales 293

Areaceae 293

Commelinales 296

Commelinaceae 296 ■ Haemodoraceae 298 ■

Pontederiaceae 298

Poales 300

Bromeliaceae 302 ■ Typhaceae 305 ■

Eriocaulaceae 307 ■ Xyridaceae 307 ■

Juncaceae 309 ■ Cyperaceae 309 ■

Restionaceae 311 ■ Poaceae 312

Zingiberales 317

Musaceae 317 ■ Zingiberaceae 319

Marantaceae 321 ■ Cannaceae 323

EUDICOTS (Tricolpates; Eudicotyledoneae) 323

Ranunculales 323

Menispermaceae 325 ■ Ranunculaceae 327 ■

Berberidaceae 329 ■ Papaveraceae 331

Proteales and Other Eudicots 333

Platanaceae 333 ■ Proteaceae 334

CORE EUDICOTS (Core Tricolpates) 335

Superrosids (Superrosidae) 335

Saxifragales 335

Saxifragaceae 335 ■ Crassulaceae 337 ■

Hamamelidaceae 340 ■ Altingiaceae 342

Rosid Clade (Rosidae) 342

Vitales 343

Vitaceae 343

FABIDS (Fabidae, Eurosids I) 343

Zygophyllales 343

Zygophyllaceae 343

Oxalidales 346

Oxalidaceae 346

Celastrales 347

Celastraceae 347

Malpighiales 348

Malpighiaceae 349 ■ Chrysobalanaceae 353 ■

Euphorbiaceae 353 ■ Phyllanthaceae 356 ■

Clusiaceae 357 ■ Calophyllaceae 358 ■

Hypericaceae 359 ■ Rhizophoraceae 360 ■

Violaceae 362 ■ Passifloraceae 362 ■

Salicaceae 365

Fabales 367

Fabaceae 367 ■ Polygalaceae 373

- Rosales 375**
Rosaceae 376 ■ *Rhamnaceae* 385 ■
Ulmaceae 386 ■ *Cannabaceae* 388 ■
Moraceae 389 ■ *Urticaceae* 392
- Cucurbitales 393**
Cucurbitaceae 393 ■ *Begoniaceae* 395
