

Contents

Preface	vii
Research and Review Studies	1
Chapter I Codon and Codon Pairs Usage in Bacteria <i>Boris I. Bachvarov, Kiril T. Kirilov and Ivan G. Ivanov</i>	3
Chapter II Maillard Reaction and Spontaneous Mutagenesis in <i>Escherichia coli</i> <i>Roumyana Mironova, Yordan Handzhiyski, Toshimitsu Niwa, Alfredo Berzal-Herranz, Kirill A. Datsenko, Barry L. Wanner and Ivan Ivanov</i>	51
Chapter III Nucleoid Architecture and Dynamics in Bacteria <i>Ryosuke L. Ohniwa, Kazuya Morikawa, Toshiko Ohta, Chieko Wada and Kunio Takeyasu</i>	91
Chapter IV Genome Reduction in <i>Bacillus subtilis</i> and Enhanced Productivities of Recombinant Proteins <i>Yasushi Kageyama, Takuya Morimoto, Katsutoshi Ara, Katsuya Ozaki and Naotake Ogasawara</i>	119
Chapter V Molecular Detection and Characterization of Food and Waterborne Viruses <i>Alain Houde, Kirsten Mattison, Pierre Ward and Daniel Plante</i>	137
Chapter VI hTERT in Cancer Chemotherapy: A Novel Target of Histone Deacetylase Inhibitors <i>Jun Murakami, Jun-ichi Asaumi, Hidetsugu Tsujigiwa, Masao Yamada, Susumu Kokeguchi, Hitoshi Nagatsuka, Tatsuo Yamamoto and You-Jin Lee</i>	187
Chapter VII Dynamics of DNA Polymerase <i>Ping Xie</i>	225

Chapter VIII	Inhibiting Viral DNA Polymerase for HBV Therapy	263
	<i>Min Jiang and Yuanhao Li</i>	
Chapter IX	Modeling DNA Translocation and Unwinding by Helicase RecG	283
	<i>Ping Xie</i>	
Chapter X	<i>De Novo</i> DNA Synthesis by DNA Polymerase	299
	<i>Xingguo Liang, Tomohiro Kato and Hiroyuki Asanuma</i>	
Chapter XI	Bacteriophage $\phi 29$ DNA Polymerase: An Outstanding Replicase	329
	<i>Miguel de Vega and Margarita Salas</i>	
Chapter XII	Bacterial Replicative DNA Helicases	353
	<i>Subhasis B. Biswas, and Jessica J. Clark, Deepa S. Kurpad and Esther E. Biswas</i>	
Chapter XIII	Effect of Substrate Traps on Hepatitis C Virus NS3 Helicase Catalyzed DNA Unwinding: Evidence for Enzyme Catalyzed Strand Exchange	389
	<i>Ryan S. Rypma, Angela M. I. Lam and David N. Frick</i>	
Short Communication		
	Discovery of Orphan Helicases and Deorphanization by Genome-Wide Analyses in Two Model Organisms, <i>S. Cerevisiae</i> and <i>C. Elegans</i>	411
	<i>Toshihiko Eki and Fumio Hanaoka</i>	
Index		433
