

CONTENTS

Preface		vii
Chapter 1	Potential and Limitations of Metagenomic Functional Analyses <i>Laura Terrón-González, Olga Genilloud and Eduardo Santero</i>	1
Chapter 2	Metagenomics: Library Construction and Screening Methods <i>Roberto S. Dias, Livia C. F. Silva, Monique R. Eller, Valéria M. Oliveira, Sergio O. DE Paula and Cynthia C. Silva</i>	45
Chapter 3	The Use of Ion Torrent PGM for Bacterial Diversity Analyses: The Study Case of Five Brazilian Hydroelectric Reservoirs <i>Diego Assis das Graças, Rafael Azevedo Baraúna, Luciano Chaves Franco, Tiago Ferreira Leão, Pablo Henrique Caracciolo Gomes de Sá, Adonney Allan de Oliveira Veras, Adriana Ribeiro Carneiro, Jaqueline Meireles, Kenny da Costa Pinheiro, Artur Luiz da Costa da Silva and Rommel Thiago Jucá Ramos</i>	67
Chapter 4	Metagenomic Profiling for Assessing Environmental Healthy <i>Felipe H. Coutinho, João Victor R. Ferreira, Andressa S. Silva, Ida Carolina N. Direito, Denise M. M. Pessoa and Alexander M. Cardoso</i>	87
Chapter 5	Mining Novel Genes and Enzymes of Uncultured Eukaryotic Microorganisms by an RNA-Based Approach <i>Nobutada Kimura</i>	99
Chapter 6	Developments in the Retrieval of Novel Biocatalysts by Metagenomic Approaches <i>Digvijay Verma and T. Satyanarayana</i>	115
Chapter 7	Isolation of Soil Metagenomic DNA: Challenges and Solutions <i>Sonia Sharma, Kailash Narayan Bhardwaj, Sangeeta Pandey and Ramesh Chander Kuhad</i>	137
Chapter 8	Microbial Exploration in Extreme Conditions: Metagenomic Analysis and Future Perspectives <i>S. Ramganes, A. T. Maredza and M. Tekere</i>	157
Index		183
