
CONTENTS

Preface		vii
Chapter I	Mutation Detection in <i>TP53</i> Gene: Alternatives in Point Mutation Technologies <i>Angélica Rangel-López, Alfonso Méndez-Tenorio, Mauricio Salcedo, Rogelio Maldonado and Kenneth L. Beattie</i>	1
Chapter II	Mutational Hotspots of <i>TP53</i> Gene Associated to DNA Damage <i>Angélica Rangel-López and José Ramón Paniagua-Sierra</i>	5
Chapter III	DNA Damage Related to Exposure to Oil Spills: The Prestige Experience <i>Beatriz Pérez-Cadahía, Josefina Méndez, Eduardo Pásaro, Vanessa Valdiglesias and Blanca Laffon</i>	29
Chapter IV	The Biggest Winners in DNA and Protein Sequence Analysis: Metagenomics, DNA Microarray, Biosensors, Molecular Subtyping, and Phage Recombinant Probes <i>Sufian F. Al-Khaldi, Magdi M. Mossoba, Betsy Jean Yakes, Eric Brown, Devang Sharma and Santina Carnazza</i>	61
Chapter V	Role of Effectors on Hypoxia Due to Nitric Oxide Production in Human Alveolar Epithelial Cells and Oxygen Depletion in Human Hepatocytes <i>Soonjo Kwon and Rakesh Sharma</i>	87
Chapter VI	Methods, Strategies and Facts for Improving the Analysis of Genetic Variations Using DNA Arrays <i>Angelica Rangel-López, Alfonso Méndez-Tenorio, Rogelio Maldonado-Rodríguez and Kenneth L. Beattie</i>	105
Chapter VII	Plasma Cell Dyscrasias <i>Cherie H. Dunphy</i>	131
Index		151
