

CONTENTS

Preface	vii
G-Quadruplex Ligands: A Selective Approach to Telomeres Length Regulation, Both Directly and through Telomerase Inhibition	1
<i>Marco Franceschin, Armandodoriano Bianco and Maria Savino</i>	
Evaluation of a Synthetic Biomimetic Ligand for the Purification of Therapeutic Proteins	19
<i>Dimitris Platis and Nikolaos E. Labrou</i>	
Phytoestrogens' Biochemical Aspects and Biological Activities	33
<i>Rita de Cássia da Silveira e Sá and Luciana Valente Borges</i>	
The Structure of α_1-Proteinase Inhibitor Polymer: Facts and Hypotheses	87
<i>Ewa Marszał</i>	
Increase in Amino Acids and Ammonia during Liquefaction of Semen	99
<i>Thomas W. Stief</i>	
Prebiosis with Fermentable Carbohydrates in Pig Nutrition: A Holistic Approach to Productivity	109
<i>Ajay Awati</i>	
Altering Plant Secondary Metabolism to Achieve Broad Spectrum Insect Control and Reduce Mycotoxins	131
<i>Eric T. Johnson, Patrick F. Dowd and T. Scott Pinkerton</i>	
Index	153
