<i>Preface</i>	<i>xv</i>
<i>Acknowledgments</i>	<i>xvii</i>

PART I

The Nature and Study of Paleoethnobotanical Remains	1
1 Paleoethnobotanical Remains	3
<i>Introduction: The Paleoethnobotanical Approach</i>	3
<i>Paleoethnobotanical Data and Their Study</i>	5
<i>Macroremains</i>	5
<i>Pollen</i>	13
<i>Phytoliths</i>	15
<i>Starch</i>	20
<i>Studying Archaeobotanical Remains</i>	20
<i>The Comparative Collection</i>	23
2 Deposition and Preservation of Paleoethnobotanical Remains	27
<i>Introduction</i>	27
<i>Macroremain Deposition and Preservation</i>	31
<i>Summary</i>	31
<i>Grinding Stone Example</i>	32
<i>Phytolith Deposition and Preservation</i>	33
<i>Summary</i>	33
<i>Grinding Stone Example</i>	34

<i>Starch Deposition and Preservation</i>	34
<i>Summary</i>	34
<i>Grinding Stone Example</i>	35
<i>Pollen Deposition and Preservation</i>	36
<i>Summary</i>	36
<i>Grinding Stone Example</i>	37
<i>Conclusion: Deposition and Preservation of Paleoethnobotanical Remains</i>	38
 3 <i>Field Sampling and Recovery</i>	41
<i>Introduction</i>	41
<i>Strategies and Techniques for Sampling</i>	41
<i>Flotation and Fine-Sieving</i>	48
<i>Flotation Example: Using a SMAP-Style System</i>	50
<i>Collecting Artifacts and Residues for Starch (and Other Microfossil) Analysis</i>	54
<i>Guidelines for Selecting Artifacts</i>	54
<i>Field-Sampling of Residues for Microfossil Study</i>	55
 4 <i>Approaches to Paleoethnobotanical Interpretation</i>	58
<i>Introduction</i>	58
<i>Qualitative Analysis</i>	59
<i>Quantitative Analysis</i>	61
<i>Common Measures Used to Interpret Archaeobotanical Data</i>	61
<i>Raw Data Tabulation</i>	61
<i>Ubiquity/Percentage Presence</i>	66
<i>Ratios</i>	68
<i>Diversity</i>	70
<i>Application of Multivariate Techniques</i>	71
<i>Reading a Stratigraphic Diagram</i>	71
 PART II	
<i>Interpreting Paleoethnobotanical Data: Case Studies</i>	77
 5 <i>Investigating Neanderthal Lifeways Through Paleoethnobotany</i>	79
<i>Introduction</i>	79
<i>Background to the Case Study</i>	80
<i>Neanderthal Diet(s): The Contribution of Plant and Animal Foods</i>	82
<i>Neanderthals as Top Predators: Faunal and Isotope Evidence</i>	82
<i>Neanderthals as Foragers: Botanical Evidence</i>	84
<i>Foraging Practices of Early Modern Humans</i>	92
<i>Discussion: Plant Foods in the Neanderthal Diet</i>	98
<i>Neanderthal-Plant Interrelationships Beyond Diet</i>	99
<i>Medicinal Plant Use</i>	99
<i>Fuel Selection</i>	99
<i>Ecosystem Management</i>	103

<i>Spatial Organization of Sites as a Reflection of Modern Behavior</i>	103
<i>Early Modern Human Example: Sibudu Cave, South Africa</i>	105
<i>Summary and Discussion: Neanderthals and Modern Behaviors</i>	
<i>Beyond Diet</i>	106
<i>Conclusion: Investigating Neanderthal Lifeways Through Paleoethnobotany</i>	107
 6 <i>The Paleoethnobotany of Maize: Understanding Domestication and Agriculture</i>	112
<i>Introduction</i>	113
<i>Is It Maize? Identifying and Characterizing Maize Remains</i>	113
<i>Introduction</i>	113
<i>Macroremains</i>	114
<i>Pollen</i>	118
<i>Phytoliths</i>	121
<i>Starch</i>	124
<i>Summary and Discussion: Identifying Maize</i>	129
<i>Assessing the Importance of Maize in Prehistoric Foodways</i>	130
<i>Introduction</i>	130
<i>Assessing the Abundance of Maize</i>	131
<i>Assessing the Impact of Maize on the Landscape</i>	135
<i>Summary and Discussion: Identifying the Importance and Impact of Maize</i>	138
<i>Conclusion: Contributions of Paleoethnobotany to Studying Domestication and Agriculture</i>	140
 7 <i>Archaeobotany and Insights Into Social Relationships at Cahokia</i>	146
<i>Introduction</i>	146
<i>Overview of Cahokia: The Site, Chiefdom, and Subsistence Base</i>	147
<i>Cahokia: Site and Cultural Sequence</i>	147
<i>Subsistence and Land Use</i>	151
<i>Changing Social Relationships and Foodways: An Overview</i>	152
<i>Maize, Elites, and Ritual at Cahokia</i>	154
<i>Insights From Macroremains, Cooking Pots, and Residues</i>	156
<i>Stable Isotope and Skeletal Studies of Human Remains</i>	163
<i>Summary: Maize and Social Status at Cahokia</i>	165
<i>Food, Status, and Social Relationships: Beyond Maize</i>	167
<i>Animals in Ritual and Diet of Elites and Nonelites at Cahokia</i>	167
<i>Black Drink and Cacao</i>	168
<i>Conclusion: Contributions of Paleoethnobotany to Understanding Social Relationships at Cahokia</i>	169
 8 <i>An Individual's Relationship to the Natural World: Ötzi, the Tyrolean Iceman</i>	174
<i>Introduction</i>	174
<i>Discovery and Excavation</i>	176

	<i>The Iceman's Equipment and Clothing</i>	178
	<i>Studies of the Iceman's Body</i>	181
	<i>Health and Cause of Death</i>	181
	<i>Clues to Ötzi's Diet and Travels</i>	182
	<i>Environmental and Archaeological Studies of the Iceman Site and Region</i>	185
	<i>Conclusion: Insights from Paleoethnobotany Into the Life and Times of Ötzi</i>	192
9	Plants and Healing/Health	198
	<i>Introduction</i>	198
	<i>Interpretation Based on Medicinal Properties of Plants</i>	199
	<i>Eastern North America</i>	202
	<i>Europe and Southwest Asia</i>	203
	<i>Africa</i>	205
	<i>Medicinal Plants in Compelling Archaeological Contexts</i>	207
	<i>Central and South America</i>	207
	<i>Europe</i>	209
	<i>East Asia</i>	212
	<i>Coprolites and Latrines: Evidence From the Ingestion of Medicinal Plants</i>	213
	<i>North America</i>	213
	<i>South America</i>	214
	<i>Southwest Asia and Europe</i>	217
	<i>Analyzing Medicinal Preparations/Residues</i>	220
	<i>North America</i>	220
	<i>Europe and Africa</i>	221
	<i>Identifying Active Plant Agents in Human Remains</i>	222
	<i>Conclusion: Investigating Plants and Healing/Health Through Paleoethnobotany</i>	223
10	Conclusion: Investigating Ancient Lifeways Through Paleoethnobotany	228
	<i>Introduction</i>	228
	<i>Methodological Aspects of Making Convincing Interpretations</i>	228
	<i>Approaching Interpretation at Different Scales of Analysis</i>	231
	<i>Final Thoughts</i>	233
	<i>Index</i>	237
