

CONTENTS

Preface		vii
Chapter 1	Desalination Impacts on the Marine Environment <i>P. Palomar and I. J. Losada</i>	1
Chapter 2	International Protection of the Marine Environment <i>Angela Carpenter</i>	51
Chapter 3	Isolation and Molecular Characterization of Marine Bacteria isolated from the Beagle Channel, Argentina <i>Héctor A. Cristóbal, Adriana E. Alvarenga and Carlos M. Abate</i>	87
Chapter 4	Ecophysiological Significance of Selective Feeding of Heterotrophic Nanoflagellates in Marine Environment <i>Bidyut R. Mohapatra and Kimio Fukami</i>	119
Chapter 5	Microbial Marine Community as Source of Hydrolytic Enzymes. Study on Thermal Adaptation of Esterases and Lipases from Marine Micro-Organisms <i>Luigi Mandrich and Donatella de Pascale</i>	141
Chapter 6	Potential for Petroleum Aliphatic Hydrocarbon Degradation of the Key Bacteria in Temperate Seas <i>Maki Teramoto and Shigeaki Harayama</i>	157
Chapter 7	The Hypersaline Gulf: A Model Study of Potential Impacts of Seawater Desalination on the Marine Environment <i>H. H. Al-Barwani and A. Purnama</i>	167
Chapter 8	Dynamics of Suspended Particulate Matter in the Menai Strait (UK) and its Implications for Ecosystem Functioning and Management <i>V. Krivtsov, J. Gascoigne and M. W. Skov</i>	179
Chapter 9	Concrete and Marine Environment <i>Moetaz El-Hawary</i>	199
