

CONTENTS

Preface		vii
Chapter 1	Metabolic Rate of Marine Fish in Early Life and its Relationship to their Ecological Status <i>Irina Rudneva, Valentin Shaida</i>	1
Chapter 2	Antioxidant Defense in Marine Fish and its Relationship to their Ecological Status <i>Irina Rudneva</i>	31
Chapter 3	Does Habitat Affect the Genomic GC Content? A Lesson from Teleostean Fish: A Mini Review <i>Ankita Chaurasia, Erminia Uliano, Luisa Bernà, Claudio Agnisola and Giuseppe D'Onofrio</i>	61
Chapter 4	Genetic Structure of Masu Salmon, <i>Oncorhynchus Masou</i> <i>Shigeru Kitanishi and Toshiaki Yamamoto</i>	81
Chapter 5	Facultative Catadromy in the Freshwater Eel Genus <i>Anguilla</i> between Fresh Water and Sea Water Habitats <i>Naoko Chino and Takaomi Arai</i>	99
Chapter 6	Impacts of Anthropic Factors on Native Freshwater Fish in Brazilian Semiarid Region <i>Sathyabama Chellappa, Wallace Silva do Nascimento, Thiago Chellappa and Naithirithi T. Chellappa</i>	115
Chapter 7	Fish Ecology, Conservation Biology and New Insights from the Archaeological Evidence in the Beagle Channel (Tierra del Fuego, Argentina) <i>Atilio Francisco Zangrando and María Paz Martinoli</i>	131
Chapter 8	Ecology of Early Life-History Stages of Anadromous Shads <i>Eduardo Esteves</i>	151

Chapter 9	Heat Shock Proteins Modulate Signaling Pathways in Survival of Stressed Fish to Polluted Environments	173
	<i>Ekambaram Padmini</i>
