

Contents

Acronyms — XIII

- 1 Introduction — 1**
 - 1.1 Why should we care about biodiversity? — 1
 - 1.2 Role of computational bioacoustics — 3
 - 1.3 The benefits of computational bioacoustics — 5
 - 1.4 Book organization — 7
 - 1.5 How to use this book — 10
 - 1.6 The home page for this book — 12
- 2 Why computational bioacoustics? — 13**
 - Introduction — 13
 - 2.1 Ancient roots — 15
 - 2.2 Contemporary bioacoustics — 17
 - 2.3 Computational bioacoustics — 22
 - 2.4 Relations between bioacoustics and computational bioacoustics — 25
 - 2.5 Research topics and application areas — 28
- 3 Definition of tasks — 32**
 - Introduction — 32
 - 3.1 One-species detection — 37
 - 3.2 Species identification — 39
 - 3.3 Multi-label species identification — 41
 - 3.4 One-category recognition — 45
 - 3.5 One-species recognition — 47
 - 3.6 Multispecies diarization — 49
 - 3.7 Localization and tracking of individuals — 52
 - 3.8 Sound event-type recognition — 54
 - 3.9 Abundance assessment — 57
 - 3.10 Clustering of sound events — 58
 - 3.11 Biodiversity assessment indices — 60
 - 3.12 Practical difficulties related to real-world operation — 62
- 4 Acoustic libraries — 64**
 - Introduction — 64
 - 4.1 The training library — 68
 - 4.1.1 TL organization — 68
 - 4.1.2 Creation of training libraries — 71

4.1.3	Manual creation of TLs —	72
4.1.4	TLs based on clean recordings —	75
4.1.5	Challenges related to TLs' creation —	76
4.1.6	Computational bioacoustics in support of TL creation —	77
4.1.7	What if large TLs are not feasible? —	77
4.2	The acoustic background library —	77
4.2.1	What if large BL is not available? —	79
4.2.2	Computational bioacoustics in support of BL creation —	80
4.3	The validation library —	82
4.3.1	Computational bioacoustics in support of VL creation —	85
4.4	The evaluation library —	86
4.4.1	Computational bioacoustics in support of EL creation —	87
	Concluding remarks —	88
5	One-dimensional audio parameterization —	89
	Introduction —	89
5.1	Audio pre-processing —	90
5.1.1	Variable-length segmentation —	92
5.1.2	Uniform-length segmentation —	93
5.2	Audio parameterization —	93
5.3	Post-processing of audio features —	96
5.3.1	Statistical standardization —	98
5.3.2	Temporal derivatives —	98
5.3.3	Shifted delta coefficients —	99
	Concluding remarks —	100
6	Two-dimensional audio parameterization —	101
	Introduction —	101
6.1	The audio spectrogram —	102
6.2	The thresholded spectrogram —	105
6.3	Morphological filtering of the thresholded spectrogram —	107
6.4	MFCC estimation with robust frames selection —	114
6.5	Points of interest-based features —	121
6.6	Bag-of-instances audio descriptors —	126
	Concluding remarks —	135

7	Audio recognizers — 137
	Introduction — 137
7.1	Overview of classification methods — 137
7.2	One-species detectors — 143
7.3	Single-label classification with a single model per category — 148
7.4	Single-label classification with multi-classifier schemes — 151
7.5	MIML classification schemes — 154
	Concluding remarks — 159
8	Application examples — 161
	Introduction — 161
8.1	The ARBIMON project — 164
8.1.1	The ARBIMON Acoustics project — 164
8.1.2	The ARBIMON II project — 167
8.2	The AmiBio project — 170
8.3	The Pantanal Biomonitoring Project — 178
8.4	The SABIOD project — 181
8.5	The ENTOMATIC project — 182
8.6	The REMOSIS project — 184
	Concluding remarks — 185
9	Useful resources — 189
	Introduction — 189
9.1	Online audio data sets and resources — 190
9.1.1	The xeno-canto repository — 190
9.1.2	The Borror Laboratory of Bioacoustics Sound Archive — 191
9.1.3	The Macaulay Library — 191
9.1.4	The British Library Sound Archive — 191
9.1.5	Sound Library of the Wildlife Sound Recording Society — 192
9.1.6	The BioAcoustica repository — 192
9.1.7	The Animal Sound Archive at the Museum für Naturkunde in Berlin — 193
9.1.8	Australian National Wildlife Collection Sound Archive — 193
9.1.9	The Western Soundscape Archive — 193
9.1.10	The DORSA Archive — 194
9.1.11	The Nature Sounds Society — 194
9.1.12	The Acoustics Ecology Institute — 194

9.1.13	Sound resources not listed here —	194
9.2	Software tools and services —	195
9.3	Online information —	198
9.4	Scientific forums —	199
9.5	Technology evaluation campaigns —	200
	Concluding remarks —	203

Epilogue—	205
