

Contents

Preface		vii
Chapter 1	Analytical Methods of the Determination of Arginine Amino Acid <i>R.M. Callejon, C. Ubeda, A.M. Troncoso and M.L. Morales,</i>	1
Chapter 2	Alternative Metabolic Pathways of Arginine and their Pathophysiological Roles <i>András Hrabák and Zoltán Kukor</i>	33
Chapter 3	Free Amino Acid Analysis in Natural Matrices <i>Graciliana Lopes, Patrícia Valentão and Paula B. Andrade</i>	67
Chapter 4	Discovery of Argininosuccinate Synthetase and Argininosuccinate Lyase <i>Olivier Levillain</i>	91
Chapter 5	Expression and Localization of Argininosuccinate Synthetase and Argininosuccinate Lyase in the Female and Male Rat Kidneys <i>Olivier Levillain and Heinrich Wiesinger</i>	111
Chapter 6	Chemical Structure and Toxicity in Arginine-Based Surfactants. <i>Aurora Pinazo, Lourdes Pérez, María Rosa Infante, María Pilar Vinardell, Montse Mitjans, María Carmen Morán and Verónica Martínez</i>	125
Chapter 7	Arginine: Physico-Chemical Properties, Interactions with Ion-Exchange Membranes, Recovery and Concentration by Electrodialysis <i>T. Eliseeva, E. Krisilova, G. Oros and V. Selemenov</i>	143
Chapter 8	Central Functions of L-Arginine and its Metabolites for Stress Behavior <i>Shozo Tomonaga, D. Michael Denbow and Mitsuhiro Furuse</i>	163
Chapter 9	Arginine Requirement and Metabolism in Marine Fish Larvae-Review of Recent Findings <i>Margarida Saavedra</i>	191

Chapter 10	Arginine-Rich Cell-Penetrating Peptides in Cellular Internalization <i>Betty Revon Liu, Huey-Jenn Chiang and Han-Jung Lee</i>	207
Chapter 11	Effects of Deep Sea Water on Changes in Free Amino Acids and Tolerance to Fusarium Root Rot in Mycorrhizal Asparagus Plants <i>Abu Shamim Mohammad Nahiyan, Mika Yokoyama and Yoichi Matsubara</i>	219
Chapter 12	Influence of Arginine-Containing Peptides on the Haemostasis System <i>Maria Golubeva and Marina Grigorjeva</i>	229
Chapter 13	Newly Identified Transcriptional Regulation by Mcm1p at <i>ARG1</i> Promoter <i>Sungpil Yoon</i>	237
Index		253
