

# INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

## 4th International Conference on Bioinformatics and Computational Biology

March 12-14, 2012  
Imperial Palace Hotel  
Las Vegas, Nevada, USA

### TECHNICAL PAPER INDEX

#### DATA MINING APPLICATIONS IN BIOINFORMATICS

|                                                                                                                                                                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Impact of Receptor Clustering on the Membrane-based Stage of a Signalling Pathway</b><br><i>Bertrand R. Caré and Hédi A. Soula (University of Lyon, France)</i>                                                                                                                                  | 1  |
| <b>An Exact Algorithm for Reconstructing Genomic Scaffolds</b><br><i>Zhihui Liu (Shandong Institute of Business and Technology, China), Brendan Mumeey, Kelly Spendlove, and Binhai Zhu (Montana State University, USA)</i>                                                                         | 7  |
| <b>Local Search Techniques for Placing Unique Restriction Sites in Synthetic Genomes</b><br><i>Mahfuza Sharmin, Monjura Afrin, and M. Sohel Rahman (Bangladesh University of Engineering and Technology, Bangladesh)</i>                                                                            | 13 |
| <b>Prediction of Type III Secretion Apparatus in Unannotated Bacterial Genomes</b><br><i>Manonmani Kumar (Duke University, USA) and Sathish AP Kumar (National University, USA)</i>                                                                                                                 | 19 |
| <b>Comparative Analysis of Machine Learning Techniques for the Prediction of the DMPK Parameters Intrinsic Clearance and Plasma Protein Binding</b><br><i>Edward Lowe, Jr., Mariusz Butkiewicz, Zollie White III, Matthew Spellings, Albert Omlor, and Jens Meiler (Vanderbilt University, USA)</i> | 25 |
| <b>A Text Mining and Visualization Tool for Generating Protein Interaction Hypothesis</b><br><i>Xiaohui Yuan and Jarvie J. Samuel (University of North Texas, USA)</i>                                                                                                                              | 31 |

#### DATA ANALYSIS AND MODELING

|                                                                                                                                                                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>HSPp-BLAST: Highly Scalable Parallel PSI-BLAST for Very Large-scale Sequence Searches</b><br><i>Bhanu Rekepalli, Aaron Vose and Paul Giblock (University of Tennessee, USA and Oak Ridge National Laboratory, USA)</i>                                                                   | 37 |
| <b>SMAAlign: Alignment of DNA Sequences with Gap Constraints</b><br><i>Faisal Alobaid, Kishan Mehrotra, Chilukuri Mohan and Ramesh Raina (Syracuse University, USA)</i>                                                                                                                     | 43 |
| <b>Efficient Algorithms for the Restricted LCS Problem</b><br><i>Effat Farhana (Bangladesh University of Engineering and Technology and Ahsanullah University of Science and Technology, Bangladesh), and M. Sohel Rahman (Ahsanullah University of Science and Technology, Bangladesh)</i> | 51 |
| <b>Directed Dot Plots - Enhancing Sequence Alignments with Principles of Perception</b><br><i>David Cox (Independent Researcher, Raleigh, NC, USA)</i>                                                                                                                                      | 57 |
| <b>New Algorithm for Selecting Degenerate Primers to Clone DNA using a Short Peptide Sequence</b><br><i>Farag A. Elshaari, Fatum A. Elshaari, and Mohamed A. Elshaari (University of Benghazi, Libya)</i>                                                                                   | 63 |

|                                                                                                                                                                                                                                               |    |
