

Contents

Preface		vii
Chapter I	Glycans as Potential Diagnostic Biomarkers and the Importance of Developing Methods for Glycan Analysis <i>Erika Lattová, Hélène Perreault and Monika Poláková</i>	1
Chapter II	Glycosaminoglycans as Modulators of Intercellular Communication <i>Jaroslava Halper</i>	27
Chapter III	Congenital Disorders of Glycosylation <i>I. Martínez Duncker, C. Asteggiano and H. H. Freeze</i>	59
Chapter IV	Glycobiology of Human Hepatocellular Carcinoma: Biochemical Basis and Clinical Applications <i>Roberta Salinas-Marín, Miguel A. Mayoral-Chávez, Joe Tiralongo, Rosella Mollicone, and Iván Martínez-Duncker</i>	83
Chapter V	Heparan Sulfate Proteoglycans and Congenital Disorder of O-linked Glycosylation: Biochemical and Molecular Bases of Multiple Osteochondromatosis <i>Carla G. Asteggiano, M. Andrea Delgado, M. Beatriz Bistué Millón, and Raquel Dodelson de Kremer</i>	103
Chapter VI	Structural Characterization and Application of Antiviral Polysaccharides <i>Jung-Bum Lee, Kyoko Hayashi and Toshimitsu Hayashi</i>	121
Chapter VII	Immunomodulatory Properties of Helminth Glycans <i>Miguel Angel Pineda and William Harnett</i>	141
Chapter VIII	Structure, Function and Formation of Glycans in <i>Drosophila</i> <i>Miki Yamamoto-Hino, Hideyuki Okano, Osamu Kanie and Satoshi Goto</i>	165

Chapter IX	Fungal Cell Wall: Biosynthesis of Glycoproteins and their Importance in Fungal Biology	189
	<i>Héctor M. Mora-Montes, Arturo Flores-Carreón, Diana F. Díaz-Jiménez, Arturo Hernández-Cervantes, Adolfo López-Esparza, Luis A. Pérez-García, Roberto J. González-Hernández, and Claudia I. Robledo-Ortiz</i>	
Chapter X	Galactofuranosyl-containing Glycans: Occurrence, Synthesis and Biochemistry	207
	<i>Carla Marino, Carola Gallo-Rodriguez and Rosa M. de Lederkremer</i>	
Chapter XI	Carbohydrate-binding Glycoproteins of <i>Lentinula Edodes</i> and <i>Grifola Frondosa</i>: Common Mushroom Origin, Uncommon Mycelial Localization, Different Functionality	269
	<i>Valentina E. Nikitina and Olga M. Tsvileva</i>	
Chapter XII	Requirement of Acidic Amino Acids in the Glucuronyltransferase-P (GlcAT-P) Flexible Loop for its Enzyme Activity	295
	<i>Yasuhiko Kizuka, Naoki Nakagawa, Ippei Morita, and Shogo Oka</i>	
Index		313
