

CONTENTS

Preface		vii
Chapter 1	Thermochemical Processing of Wood from Invasive Arboreal Species for Sustainable Bioenergy Generation and Activated Carbons Production <i>A. L. Cukierman, G. V. Nunell, M. E. Fernández, J. De Celis, M. R. Kim, L. Gurevich Messina, and P. R. Bonelli</i>	1
Chapter 2	Invasive Rodents in the United States: Ecology, Impacts, and Management <i>Gary W. Witmer and William C. Pitt</i>	47
Chapter 3	A Multi-Disciplinary Approach for Developing Tools to Monitor Invasive Buprestid Beetle Species <i>Michael J. Domingue and Thomas C. Baker</i>	77
Chapter 4	The Invasive Beaver <i>Castor canadensis</i> in the Tierra Del Fuego Archipelago: A Mitochondrial DNA and Spatial Genetic Structure Analysis for Controlling Population Expansion <i>Mariana Fasanella and Marta Susana Lizarralde</i>	101
Chapter 5	Leaf Cutting-Ants: Control Methods and Sustainability <i>Gabriela Ortiz and Maria Izabel Camargo Mathias</i>	123
Chapter 6	Freshwater Pollution and Biological Water Quality Monitoring: The Increasing Problem of Invasive Species and Accurate Ecological Assessment <i>Calum MacNeil</i>	141
Chapter 7	Aquarium Trade as a Pathway for the Introduction of Invasive Species into Mexico <i>Roberto Mendoza Alfaro, Carlos Ramírez Martínez, Salvador Contreras Balderas, Patricia Koleff Osorio, and Porfirio Álvarez Torres</i>	155
