

CONTENTS

Preface		vii
Chapter 1	Molecular Dynamics of Proteins: Towards Function Identification via Stability <i>Ian Ilizaliturri-Flores, Jorge L. Rosas-Trigueros, Beatriz Zamora-López, José Correa-Basurto, Claudia G. Benítez-Cardoza and Absalom Zamorano</i>	1
Chapter 2	Investigation of Structural Properties of Drug-Metabolizing Enzymes Using Molecular Dynamics Simulation <i>Akifumi Oda, Kana Kobayashi and Ohgi Takahashi</i>	25
Chapter 3	Double-Pulse Laser Control of Ultrafast Optical Kerr Effect in Liquid <i>V. G. Nikiforov and V. S. Lobkov</i>	41
Chapter 4	ZnO Nano-Structures for Biosensing Applications: Molecular Dynamics Simulations <i>Safaa Al-Hilli and Magnus Willander</i>	59
Chapter 5	Molecular Dynamics Simulations Of Liquid and Ionic Solvation Of Carbon Tetrachloride: Based on Atom-Bond Electronegativity Equalization Method Fused into Molecular Mechanics (ABEEM/MM) <i>Xin Li, Li-Dong Gong, and Zhong-Zhi Yang</i>	103
Index		119
