Symposium Participants	v
Foreword	xv
Germline	
Reprogramming the Epigenome in <i>Arabidopsis</i> Pollen F. Borges, J.P. Calarco, and R.A. Martienssen	1
Surprises from the Chromosome Front: Lessons from <i>Arabidopsis</i> on Telomeres and Telomerase A.D.L. Nelson and D.E. Shippen	7
Reproductive Versatility and the Epigenetic Control of Female Gametogenesis J.-P. Vielle- Calzada, E. Hernández-Lagana, D. Rodríguez-Leal, I. Rodríguez-Arévalo, G. León-Marti- nez, U. Abad-Vivero, E. Demesa-Arévalo, A. Armenta-Medina, and C. Alvarez-Mejía	17
Hypothesis: Selection of Imprinted Genes Is Driven by Silencing Deleterious Gene Activity in Somatic Tissues F. Berger, T.M. Vu, J. Li, and B. Chen	23
Stem Cells and Polarity	
Of Blades and Branches: Understanding and Expanding the <i>Arabidopsis</i> Ad/Abaxial Regulatory Network through Target Gene Identification T. Liu, B.J. Reinhart, E. Magnani, T. Huang, R. Kerstetter, and M.K. Barton	31
How to Pattern a Leaf N. Bolduc, D. O'Connor, J. Moon, M. Lewis, and S. Hake	47
On Fate and Flexibility in Stomatal Development D.L. Wengier and D.C. Bergmann	53
Signaling and Development	
Developmental Plasticity in Plants M. de Jong and O. Leyser	63
Stem Cell Signaling in Immunity and Development H. Lee, O.-K. Chah, J. Plotnikov, and J. Sheen	75
A Tale of Two Systems: Peptide Ligand-Receptor Pairs in Plant Development J.S. Lee and K.U. Torii	83
Toward a Systems Analysis of the Root P.N. Benfey	91
Domestication and Evolution	
Epigenetic Variation, Inheritance, and Selection in Plant Populations S. Hirsch, R. Baumberger, and U. Grossniklaus	97
The Molecular Basis of Vernalization in Different Plant Groups T.S. Ream, D.P. Woods, and R.M. Amasino	105
Color and Scent: How Single Genes Influence Pollinator Attraction H. Sheehan, K. Hermann, and C. Kuhlemeier	117
Epigenetics	
Epiallelic Variation in <i>Arabidopsis thaliana</i> R.C. O'Malley and J.R. Ecker	135
DNA Methylation, H2A.Z, and the Regulation of Constitutive Expression D. Coleman-Derr and D. Zilberman	147
What Triggers Differential DNA Methylation of Genes and TEs: Contribution of Body Methylation? S. Inagaki and T. Kakutani	155
Active DNA Demethylation in Plants and Animals H. Zhang and J.-K. Zhu	161

Illustrations of Mathematical Modeling in Biology: Epigenetics, Meiosis, and an Outlook <i>D. Richards, S. Berry, and M. Howard</i>	175
Small RNAs	
microRNA Biogenesis and Turnover in Plants <i>K. Rogers and X. Chen</i>	183
Use of Forward Genetic Screens to Identify Genes Required for RNA-Directed DNA Methylation in <i>Arabidopsis thaliana</i> <i>C. Eun, Z.J. Lorkovic, T. Sasaki, U. Naumann, A.J.M. Matzke,</i> <i>and M. Matzke</i>	195
A Transcription Fork Model for Pol IV and Pol V-Dependent RNA-Directed DNA Methylation <i>C.S. Pikaard, J.R. Haag, O.M.F. Pontes, T. Blevins, and R. Cocklin</i>	205
Deep Sequencing from <i>hen1</i> Mutants to Identify Small RNA 3' Modifications <i>J. Zhai and B.C. Meyers</i>	213
Small RNA-Regulated Networks and the Evolution of Novel Structures in Plants <i>Y. Plavskin and M.C.P. Timmermans</i>	221
Plant Pathogen Responses	
Effector Biology of Plant-Associated Organisms: Concepts and Perspectives <i>J. Win,</i> <i>A. Chaparro-Garcia, K. Belhaj, D.G.O. Saunders, K. Yoshida, S. Dong, S. Schornack,</i> <i>C. Zipfel, S. Robatzek, S.A. Hogenhout, and S. Kamoun</i>	235
Effector Recognition and Activation of the <i>Arabidopsis thaliana</i> NLR Innate Immune Receptors <i>A.D. Steinbrenner, S. Goritschnig, K.V. Krasileva, K.J. Schreiber, and B.J. Staskawicz</i>	249
A Rolling Stone Gathers No Moss, but Resistant Plants Must Gather Their MOSES <i>K.C.M. Johnson, O.X. Dong, Y. Huang, and X. Li</i>	259
Natural Variation in Maize Defense against Insect Herbivores <i>L.N. Meihls, H. Kaur,</i> <i>and G. Jander</i>	269
Mechanisms of Nuclear Suppression of Host Immunity by Effectors from the <i>Arabidopsis</i> Downy Mildew Pathogen <i>Hyaloperonospora arabidopsidis</i> (Hpa) <i>M.-C. Caillaud,</i> <i>L. Wirthmueller, G. Fabro, S.J.M. Piquerez, S. Asai, N. Ishaque, and J.D.G. Jones</i>	285
Photosynthesis and Metabolism	
Photosystem II: The Water-Splitting Enzyme of Photosynthesis <i>J. Barber</i>	295
The Remarkable Pliability and Promiscuity of Specialized Metabolism <i>J.-K. Weng and J.P. Noel</i>	309
Author Index	321
Subject Index	322
